

TRADE MARKS ORDINANCE (Cap. 559)

OPPOSITION TO TRADE MARK APPLICATION NO.: 303288853

MARK:

CLASSES: 9, 16, 35, 38, 41 and 42

APPLICANT: ALIBABA GROUP HOLDING LIMITED

OPPONENT: KUNSHAN XINHAIYUN TRADING CO., LTD. (昆山欣海韵贸易有限公司)

STATEMENT OF REASONS FOR DECISION

Background

1. On 30 January 2015, Alibaba Group Holding Limited (“the Applicant”) filed an application (“the subject application”) under the Trade Marks Ordinance (Cap. 559) (“the Ordinance”) for the registration of the series of marks

“ ” (“the subject marks”).

2. Registration is sought in respect of goods and services in classes 9, 16, 35, 38, 41 and 42 (“the subject goods and services”) (see Annex).
3. Particulars of the subject application were published on 21 August 2015. Kunshan Xinhaiyun Trading Co., Ltd. (昆山欣海韵贸易有限公司) (“the Opponent”) filed on 20 November 2015 a notice of opposition to the subject

application together with a statement of grounds of opposition (“Notice of Opposition”). A counter-statement (“Counter-statement”) was filed by the Applicant on 3 March 2016 in response to the Notice of Opposition filed.

4. As evidence in support of the opposition, on 1 December 2016 the Opponent filed under rule 18 of the Trade Marks Rules (Cap.559, sub. leg.) (“the Rules”) a statutory declaration, together with exhibits, made by Zhang Dan as authorized by the Opponent (“Zhang’s SD”). The Applicant filed on 1 June 2017 under rule 19 of the Rules a statutory declaration, together with exhibits, made by Li Kam Ming Angela, Senior Legal Counsel, Head of Soft IP of the Applicant in support of its application (“Li’s SD”).
5. The opposition hearing was heard on 21 November 2018. The Opponent was represented by Ms. Wendy Wong of CLT Patent & Trademark (H.K.) Limited and the Applicant was represented by Mr. Douglas Clark, Counsel, instructed by Mayer Brown.

Notice of Opposition

6. The Opponent pleads in the Notice of Opposition that each of the subject marks, which consists of the Chinese simplified word “双” and numeral “11”, is a familiar expression which designates either four numeral one (i.e. 1111) or the calendar date 11th November; it can be used, *inter alia*, on packaging and in advertising and promotion to designate the production or expiry date of a product, the date of rendering of services, the date of a festival, an event or incident, etc.
7. It is also pleaded that the expression “双11” is commonly used in everyday language as well as in trade to designate the calendar date 11th November; as the subject marks can designate that calendar date in relation to any traders’ goods or services of the kind applied for, they cannot serve to distinguish the Applicant’s subject goods and services from those of other undertakings; and the representation of the subject marks does not endow the marks with any distinctive character.

8. Further, the Opponent pleads that the subject marks consist of signs which have become customary in the current language, or in the honest and established practices of trade, including without limitation the trade in the subject goods and services; insofar as the subject marks are applied to goods or services that are not produced or rendered on 11th November, that do not relate to a festival, an event or incident that takes place on 11th November, or that do not expire on 11th November, the subject marks are alleged to be deceptive; and the range of the subject goods and services is so broad and diverse that the subject application could not have been filed in good faith.
9. The Opponent seeks to oppose registration of the subject marks pursuant to sections 11(1)(b), 11(1)(c), 11(1)(d), 11(4)(b) and 11(5)(b) of the Ordinance. The Opponent requests that the subject application be refused with costs to be awarded in favour of the Opponent.

Counter-Statement

10. The Applicant pleads in the Counter-statement that the subject marks consist of two stylized composite marks of the term “双11” in series, which are coined by the Applicant; the coined term “双11” is not a familiar expression for the numeral “1111” or the calendar date 11th November, and it completely lacks the minimum information required for designation of a specific date (namely, reference to a day, month and year), as such it cannot be used on packaging, advertisements or promotional materials to designate the production or expiry date of a product, the date on which services are rendered, etc.
11. It is also pleaded that the coined term “双11” on its own is sufficiently distinctive; the combination of a Chinese character with two roman numerals is unusual, and the stylized representation of the Chinese simplified word “双” as a ribbon knot and the numeral “11” as a series of square blocks further increases the overall distinctiveness of the subject marks; as such, the subject marks are sufficiently distinctive to distinguish the Applicant’s goods and services from those of other traders, and are incapable of application to the goods and services

of any other trader.

12. The Applicant pleads that the coined term “双11” is not commonly used in everyday language or in trade to designate the calendar date 11th November and has never been used or understood in Hong Kong as a reference to 11th November; the coined term is a fanciful creation designed and used exclusively by the Applicant and it has acquired additional distinctive character exclusively associated with the Applicant through substantial use and promotion; as such, the subject marks comprising of such distinctive term are sufficiently distinctive to differentiate the Applicant’s goods and services from those of other traders.
13. It is also averred that the coined term “双11” does not exist in authoritative Chinese dictionaries and has not become customary in the current language of trade; prior to its creation and adoption by the Applicant, the term “双11” had not been used or referred to in trade; the Applicant is the first business entity to use the term “双11” in trade and given the extensive use and promotion of the term, it has become known and associated exclusively with the Applicant’s sales and promotional campaign and their related goods and services; the subject marks consist of stylized designs and distinctive features and the subject marks do not consist exclusively of signs which have become commonplace, and cannot be said to be customary in the current language of trade.
14. The Applicant pleads that the subject marks are not deceptive because the coined term “双11” does not designate the calendar date 11th November and there are other distinctive elements of the subject marks which are unrelated to any calendar dates; and that the subject application was filed in good faith as the subject goods and services are directly relevant to the Applicant’s diverse businesses and the Applicant honestly intends to use and/or allow others to use the subject marks in relation to the subject goods and services.
15. The Applicant denies all grounds pleaded in the Notice of Opposition and avers that the Opponent filed the subject opposition proceedings as a deliberate and unreasonable act to disrupt the Applicant’s business and to obstruct the Applicant from obtaining its legitimate right and interest in the subject marks, since the

coined term has acquired a distinct and clear reputation, and is exclusively associated with the Applicant given the unique meaning attributed to it by the Applicant's use and promotion.

16. The Applicant requests that the subject application be allowed to proceed to registration and the opposition be dismissed with costs against the Opponent.

Relevant date

17. The relevant date for considering the opposition is 30 January 2015, that is the filing date of the subject application for registration.

The Opponent's evidence

18. Mr. Clark of the Applicant submits that Zhang's SD adduced by the Opponent is inadmissible as the notary did not sign on it and it does not appear to have been signed by Zhang before the notary; accordingly, the opposition should be deemed to have been withdrawn under rule 18(3) of the Rules.
19. The issue of whether Zhang has actually made the declaration before the notary as required by rule 80(1)(b)¹ of the Rules has been raised by the Registrar in her letter of 9 February 2017.
20. Ms. Wong of the Opponent explains that due to some communication problems with the previous agent, the Opponent was not able to answer the Registrar's queries in time. She has now confirmed with the Opponent that Zhang has actually signed the declaration before the notary in the Mainland China. It is submitted that the standard wording used by the Chinese notary on the notarial certificate attached to Li's SD could have no other meaning but to confirm that Zhang has actually made and signed the declaration before the notary, and

¹ Rule 80(1)(b) of the Rules provides that "(1) For the purposes of any proceedings before the Registrar, a statutory declaration or affidavit may be made and subscribed as follows-(a)... ; and (b) in any place outside Hong Kong, before any court, judge, justice of the peace, notary, notary public, consul or other person authorized by law to administer an oath or to exercise notarial functions in that place for the purpose of any legal proceeding."

therefore Zhang's SD should not be denied its effectiveness.

21. I have to point out that although the notary's signature block on the declaration is left blank, the notary has actually signed on a notarial certificate which is placed at the last page of the well-bound document which comprises Zhang's SD and exhibits and the notarial certificate. It is stated on the English translation of the notarial certificate, *inter alia*, that "This is to certify that Zhang Dan the appointed agent of KUNSHAN XINHAIYUN TRADING COMPANY LIMITED attended my office on 28 October 2016 and signed the Declaration."²
22. After considering all the relevant circumstances and the parties' submissions, including the fact that Zhang has personally attended the notary's office and signed on the declaration as well as the cover sheets for each of the exhibits on the same date as the notary signed on the notarial certificate, I accept that Zhang's SD was actually made and signed before the notary.
23. According to Zhang's SD, the Opponent is a limited liability company established in the Mainland China. Attachment-1 to Zhang's SD contains a copy of the Opponent's business licence.
24. Zhang repeats considerably what has been pleaded in the Notice of Opposition. It is further elaborated that the expression "双11" is clearly referable to the calendar date 11th November and similar expressions have been commonly used to refer to a date, festival, an incident or event, such as "十一國慶" for the National Day of China on 1st October, "七一回歸" for the anniversary date of HK's reunification with China on 1st July, "五四運動" for the May Fourth Movement on 4th May, "九一八事變" for the Manchurian incident on 18th September 1931, "七七事變" for the Marco Polo Bridge incident on 7th July 1937, "雙十二事變" for the Xian incident on 12 December 1936, "雙十節" for the Double Ten Festival of Taiwan, "雙七" for the 7th day of July of the Lunar calendar, "雙六" for an ancient game, etc. Attachment-2 to Zhang's SD

² 中文原文: "茲証明昆山欣海韵貿易有限公司的委托代理人張聘于二〇一六年十月二十八日來到我處, 在前面聲明文件上簽字。"

includes relevant printouts downloaded from the Internet.

25. In order to support the allegation that the expression “双11” has become customary in the current language and/or in the honest and established practices of trade to designate the calendar date 11th November, attachment-3 to Zhang’s SD includes copies of various articles and promotional materials on the use of the expression “双11” in trade in Mainland China.

The Applicant’s evidence

26. According to Li’s SD, the Applicant is a company incorporated under the laws of Cayman Islands. The Applicant and its affiliates (collectively, the “Alibaba Group”) is a family of Internet-based businesses whose mission is to make it easy for anyone to buy and sell online anywhere in the world. Since its establishment in 1999, the Applicant has established a premier online marketplace for businesses and consumers and the Alibaba Group has developed leading businesses in e-commerce, online payment services and cloud computing, etc. reaching internet users in more than 240 countries and regions. Exhibits LKMA-1 to LKMA-3 to Li’s SD include printouts of the Applicant’s website setting out the different businesses, selected events, milestones and accomplishments of the Applicant, and extracted copies of the Applicant’s Annual Reports of 2015 and 2016.
27. Alibaba Group’s businesses include e-commerce business, cloud computing, mobile media and entertainment, and other innovation initiatives. The Applicant’s e-commerce business is comprised of marketplaces operating in retail and wholesale commerce in China, and international and cross-border commerce. Alibaba Group’s websites can be accessed worldwide and the Applicant’s services are available to users worldwide, including Hong Kong.
28. In September 2014, Alibaba Group completed its initial public offering on the New York Stock Exchange which generated a lot of press coverage worldwide in media such as Bloomberg, Forbes, and Reuters.

29. In 2008, Alibaba Group launched a B2C (business-to-consumers) platform under the brand “Taobao Mall” in English and “淘宝商城” in Chinese (the “Taobao Mall”). The Taobao Mall was rebranded in 2010 as Tmall and “天猫” and an independent platform was launched. The Taobao Mall and Tmall, since their respective launch, have been accessible worldwide, including Hong Kong. Tmall was the largest B2C platform in China in terms of monthly active users in 2015. As of 31 March 2016, there were over 100,000 brands on Tmall including some major international brands.
30. Tmall Global was launched in 2014 as an extension of Tmall, designated to address the increasing demand from Chinese consumers for international products and brands that do not have a presence in China. There is a dedicated page for products from Hong Kong brand owners on the Tmall Global platform and a printout of the dedicated page is displayed at exhibit LKMA-6.
31. Tmall.com is consistently in the top 50 most visited website globally and ranked 14 amongst the top 100 websites in the world in 2017. The value of confirmed orders of products and services on Tmall (including Tmall Global) for 2013 to 2016 increases from RMB 253 billion to 1215 billion, with an average of RMB 705 billion per annum. The number of active buyers on the Applicant’s China retail marketplaces (including Tmall) for 2014 to 2016 increases from 255 million to 423 million. Copies of extracts of the Applicant’s 2016 Annual Report are included at exhibit LKMK-8.
32. In 2009, Tmall first designated the calendar date 11th November and promoted it by the coined term “双 11” (known as “Double 11” in English) as an annual promotional shopping day in China. The Applicant’s Double 11 campaign has since become the most important shopping event in China. The sales figures of the annual campaign increased from RMB 50 million in 2009 to 91 billion in 2015, with an average of RMB 29.6 billion per annum. Copies of contracts with some of the merchants for the campaign are displayed at exhibit LKMA-5.
33. Alibaba Group has invested a lot of money, time and effort to create consumer recognition of the subject marks and/or its variants and/or the coined term “双

11” (collectively, the “Applicant’s Marks”) throughout the world, including in Hong Kong. The Applicant’s Marks have been widely promoted and advertised and have acquired a considerable level of fame and recognition among the public. Since their first use, the Applicant’s Marks have received a lot of media coverage, through publications and articles relating to the Applicant’s Marks and the founder of the Applicant, Mr. Jack Ma. Exhibit LKMA-7 includes sample copies of such media coverage.

34. The Applicant’s Double 11 campaign has been widely promoted and advertised in China. Included at exhibits LKMA-17 to LKMA-22 are photos of advertisements placed at Beijing airport, apartment buildings, bus stops, underground stations and other places in various cities in China, and a sample copy of an advertising contract.
35. Prior to the Applicant coining the term “双 11”, no one would refer to the date of 11th November as “双 11” and it is not a common expression for 11th November. By comparison, 2nd February is not commonly known as “Double 2”, nor is 6th June known as “Double 6”.
36. Previously 11th November was commonly referred to as “Singles’ Day”³ which was popular among young and single mainland Chinese people. A number of social gatherings for singles would be held on this day, with the aim of helping single men and women find their life partners.
37. The Applicant coined the Applicant’s Marks and was the first commercial undertaking to use such marks in connection with its Double 11 campaign and related goods and services. The Applicant’s Marks have no dictionary meaning and can distinguish the Applicant’s goods and services from those of others. While Singles’ Day on 11th November primarily targets singles, the Applicant’s Double 11 campaign is targeted at all people and has no connection with Singles’ Day or the calendar date 11th November as the campaign lasts for a few months every year and not just one day on 11th November.

³ The Singles Day is named as “光棍節” or “光光節” in Chinese. It is also called “脫光節”, namely the day to celebrate not being single any more.

38. The term “双 11” or its English translation “Double 11” is not listed in authoritative Chinese or English dictionaries as an existing term or a common name for a particular kind of goods or services. The subject marks are now known by the general public particularly those in the retail and wholesale business and consumers who enjoy online shopping due to the extraordinary success of the Applicant’s Double 11 campaign. Alibaba Group has spent a great deal of time, effort and money in promoting the Applicant’s Double 11 campaign together with the subject goods and services and the Applicant enjoys a substantial reputation and goodwill in the Applicant’s Marks, including the subject marks. In the minds of the public, the subject marks have become exclusively and distinctively associated with the Applicant.
39. On 11th November 2015, the Applicant’s Double 11 campaign 2015 achieved total sales of US\$9.3 billion. Consumers from 217 countries and territories placed some 278 million orders for about a million different products during that 24-hour period. Copies of various newspaper articles from South China Morning Post, Wen Wei Po and Hong Kong Economic Times downloaded from the internet are displayed at exhibit LKMA-9.
40. In 2016, the Applicant’s Double 11 campaign was again conducted in Hong Kong, Taiwan and overseas. In Hong Kong, the campaign was promoted through billboards at the airport, major MTR stations, trams, online social media and internet platforms, with additional coverage in the lead-up to 11th November to reinforce the message of Tmall’s arrival in Hong Kong. Exhibits LKMA-10 to LKMA-16 include photos of advertisements and screenshots of online platforms and newspaper websites. The Applicant’s Double 11 campaign in 2016 in Hong Kong incurred an expenditure of HK\$2.22 million and achieved a total of 0.17 billion eyeball exposure.
41. The Applicant has applied for or registered the subject marks and/or the Applicant’s Marks in various places including China, Hong Kong, Japan, Macau, Malaysia, Singapore, South Korea and Taiwan. A list of the relevant worldwide applications and registrations and sample copies of the trade mark registration certificates are set out at exhibit LKMA-23.

42. Specifically, the Applicant has obtained registration for the plain word mark “双11” in classes 35, 38 and 41 in China. In an invalidation action filed against the Applicant’s plain word mark “双十一” in class 35 under registration no. 10136470 in China, the Chinese Trademark Office held in its decision that the mark possesses distinctiveness as it was coined and had been continuously used and promoted by the Applicant; the mark has obtained a high reputation through the Applicant’s long term use on the Taobao and Tmall platforms; the registration was maintained as the mark had distinctiveness and did not consist of a word or name commonly used to describe or refer to services in class 35. A copy of the relevant decision is displayed at exhibit LKMA-24.

Opposition under section 11(1)(d) of the Ordinance

43. Section 11(1)(d) of the Ordinance precludes registration of trade marks which consist exclusively of signs which have become customary in the current language or in the honest and established practices of the trade.

44. It is the Opponent’s pleaded case that the term “双11” is commonly used in everyday language as well as in trade to designate the calendar date 11th November; and therefore the subject marks consist exclusively of signs which have become customary in the current language and/or in the honest and established practices of the trade, including without limitation the trade in the subject goods and services.

45. As pointed out by Mr. Clark, the Opponent has filed evidence with an attempt to show that similar expressions consisting of the Chinese character “双” in front of numeral(s) can be used to indicate a date where the day of the month is the same as the number for the month (such as “双十” for 10th October) (see paragraph 24 above). However, I note that the examples of “雙十節” and “雙十二事變” are only used to designate specific memorial dates and historical events and there are other descriptive words such as “節” and “事變” in the expressions. I do not find it is a norm to use similar expressions to designate any other dates of the calendar. Therefore, I do not accept that expressions starting with “双” and

ending with numeral(s) are commonly used in everyday language to designate any calendar date, such as “双11” for 11th November.

46. With regard to the allegation that the term “双11” has become customary in the honest and established practices of trade to designate the calendar date 11th November on which large scale online sales promotions are held, the evidence adduced by the Opponent is only relevant to the Mainland. Ms. Wong submits that the evidence in the Mainland is relevant to the Hong Kong market to some extent due to the close connection between Hong Kong and the Mainland. But she does not elaborate or explain how and to what extent it is relevant and there is no evidence such as market survey result in support of her submission.
47. On the other hand, Mr. Clark submits that the term “双11” is coined by the Applicant and it has not been used in trade before the Applicant started using it. It is only through the Applicant’s extensive use and promotion of the term that it has become known and associated exclusively with the Applicant’s Double 11 campaign and the related goods and services in the Mainland China.
48. He emphasizes that the Opponent’s evidence only relates to the Mainland and not Hong Kong. He also submits that the subject goods and services cover a very wide range of goods and services in various classes but the Opponent has not identified for which goods and/or services the subject marks are customarily used in trade. Moreover, Mr. Clark contends that it will never be honest for someone to use the subject marks which are stylized.
49. I agree with the Applicant that the term “双11” does not exist in authoritative Chinese dictionaries and had not been used or referred to in common language or in trade in Hong Kong before its use by the Applicant in relation to its Double 11 campaign in the Mainland China. I note from Zhang’s SD that all uses of the Applicant’s Marks, including the term “双11” and the subject marks, are only relevant to the Mainland China market, and as shown from Li’s SD the Applicant only started promoting and using such term and marks exclusively with the Applicant’s Double 11 campaign in Hong Kong in 2016 (which post-dated the relevant date). Accordingly, there is nothing to support the assertion that the

term “双11” or the subject marks have become customary in the honest and established practices of trade in Hong Kong at or before the relevant date.

50. I therefore do not find the subject marks have become customary in the current language or in the honest and established practices of the trade in Hong Kong at or before the relevant date. The opposition under section 11(1)(d) of the Ordinance must fail.

Opposition under section 11(1)(c) of the Ordinance

51. Section 11(1)(c) of the Ordinance excludes from registration trade marks which consist exclusively of signs which may serve, in trade or business, to designate the kind, quality, quantity, intended purpose, value, geographical origin, time of production of goods or rendering of services, or other characteristics of the goods or services in respect of which registration is sought.

52. The said provision is broadly similar to Article 7(1)(c) of the Council Regulation (EC) No. 40/94 of 20 December 1993 on the Community Trade Mark. In *Wm. Wrigley Jr Co v OHIM* [2004] R.P.C. 18, the European Court of Justice (“the ECJ”) discussed the approach to the said regulation and stated the following principles :-

“31. By prohibiting the registration as Community trade marks of such signs and indications, Article 7(1)(c) of Regulation No. 40/94 pursues an aim which is in the public interest, namely that descriptive signs or indications relating to the characteristics of goods or services in respect of which registration is sought may be freely used by all. That provision accordingly prevents such signs and indications from being reserved to one undertaking alone because they have been registered as trade marks (see, inter alia, in relation to the identical provisions of Article 3(1)(c) of First Council Directive 89/104/EEC of 21 December, 1988 to approximate the laws of the Member States relating to trade marks ([1989] O.J. L40/1), *Windsurfing Chiemsee*, para.25, and *Joined Cases C-53/01 to C-55/01 Linde and Others* [2003] E.C.R. I-0000, para.73).

32. In order for OHIM to refuse to register a trade mark under Article 7(1)(c) of

Regulation No. 40/94, it is not necessary that the signs and indications composing the mark that are referred to in that article actually be in use at the time of the application for registration in a way that is descriptive of goods or services such as those in relation to which the application is filed, or of characteristics of those goods or services. It is sufficient, as the wording of that provision itself indicates, that such signs and indications could be used for such purposes. A sign must therefore be refused registration under that provision if at least one of its possible meanings designates a characteristic of the goods or services concerned.”

53. In the light of these principles, for a mark to be precluded from registration under section 11(1)(c) of the Ordinance, it does not have to be the normal way of describing the goods or services in question. It is sufficient if the mark could be used for the purpose of designating the characteristics of such goods or services. The mark is therefore objectionable if at least one of its possible meanings designates a characteristic of the goods or services in question.
54. It is the Opponent’s pleaded case that the term “双11” is a familiar expression which designates either four numeral one (i.e. 1111) or the calendar date 11th November, and can be used, *inter alia*, on the packaging of goods and in advertising and promotion of goods and services, to designate the production or expiry date of a product, the date of rendering of services, the date of a festival, an event or incident, etc.
55. Each of the subject marks consists of the Chinese character “双” and Arabic numeral “11” in stylized representation with “双” as a ribbon knot and “11” as a series of square blocks. The character and numeral “双” and “11” mean “double” and “eleven” respectively. In Chinese, we do not call 1st January as “雙1” or 2nd February as “雙2”, etc. The alleged designations of 10th October and 12th December as “雙十節” and “雙十二事變” are unique as 10th October is the Establishment Day of the Republic of China and there was an important historical incident happened on 12th December in 1936. Moreover, it is important to note that we do not call those events “雙十” and “雙十二” but “雙

十節” and “雙十二事變” instead. In my view, the term “雙11”, without any other word, could not possibly designate the calendar date of 11th November.

56. In the circumstances, when the subject marks are applied on the subject goods and services, I do not find they may designate the production or expiry date of the subject goods in classes 9 and 16, or the date on which the subject services in classes 35, 38, 41 and 42 are rendered, or other characteristics of the subject goods and services.
57. As I find each of the subject marks is not descriptive of the subject goods and services, the opposition under section 11(1)(c) of the Ordinance must fail.

Opposition under section 11(1)(b) of the Ordinance

58. Section 11(1)(b) of the Ordinance precludes registration of trade marks which are devoid of any distinctive character.
59. It is similar to section 3(1)(b) of the 1994 Act which prevents from registration, without proof of distinctiveness, trade marks which are not so wholly lacking in trade mark content as to be registrable at all but which, without evidence of use, do not display a sufficiently distinctive content.
60. A mark possesses a distinctive character within the meaning of section 11(1)(b) only if it, assuming no use, serves to identify the goods and services in respect of which registration is applied for as originating from a particular undertaking, and thus to distinguish those goods and services from goods and services of other undertakings. Such distinctiveness must be assessed by reference to, first, the goods or services in respect of which registration is sought and, second, the perception of the relevant persons, i.e. the presumed expectations of an average consumer of the category of goods or services in question, who is reasonably well informed and reasonably observant and circumspect (*Nestlé SA's Trade Mark Application (HAVE A BREAK)* [2004] F.S.R. 2, applying *Linde AG v Deutsches Patent- und Markenamt* [2003] R.P.C. 45).
61. The Opponent pleads that each of the subject marks is a familiar expression of

the calendar date 11th November which can be used to designate the production or expiry date of a product, the date of rendering of services, the date of a festival, an event or incident, etc.; as such the subject marks can designate that calendar date in relation to any traders' goods or services of the kind applied for and cannot serve to distinguish the Applicant's subject goods and services from those of other undertakings. Further, it is pleaded that the representation of the subject marks does not endow the marks with any distinctive character; there is nothing in the subject marks which serves to distinguish the subject goods and services of the Applicant from those of another trade origin.

62. I have already held in paragraph 57 above that the subject marks are not descriptive of the subject goods and services. And I agree with the Applicant that the stylized representation of the subject marks, with the character “双” as a ribbon knot and the numeral “11” as a series of square blocks, has actually endowed some distinctiveness to the subject marks. In my view, each of the subject marks, without evidence of use, displays a sufficiently distinctive content and is able to distinguish the subject goods and services of the Applicant from those of other undertakings. Hence, the subject marks are not devoid of any distinctive character in relation to the subject goods and services.
63. Therefore, the opposition under section 11(1)(b) of the Ordinance must fail.

Opposition under section 11(4)(b) of the Ordinance

64. Section 11(4)(b) of the Ordinance provides that a trade mark shall not be registered if it is likely to deceive the public. It is an absolute ground for refusal and is concerned with deceptiveness which is inherent in the mark itself, as opposed to deception caused by the similarity of the mark to another under section 12.⁴ Whether a mark as a whole is deceptive must be considered against the goods and services applied for and in the general context of the relevant trade. If a mark gives rise to an expectation which will not be fulfilled, then registration will be refused. The expectation must be a real one, as

⁴ *QS by S. Oliver Trade Mark* [1999] R.P.C. 520 at 524; *Kerley's Law of Trade Marks and Trade*

opposed to something obscure or fanciful, arising from the mark itself.⁵ The relevant public is the consumer who is reasonably observant and circumspect and thus sufficiently alert and sensible such as not to need protection from claims that might only deceive a relatively small number of customers.⁶ For this ground of refusal to apply, there must be actual deceit or a sufficiently serious risk that the consumer will be deceived.⁷

65. It is pleaded by the Opponent that insofar as the subject marks are applied to goods or services that are not produced or rendered on 11th November, that do not relate to a festival, an event or incident that takes place on 11th November, or that do not expire on 11th November, the subject marks are deceptive.
66. As indicated above, section 11(4)(b) is concerned with deceptiveness which is inherent in the mark itself and registration will be refused if a mark gives rise to an expectation which will not be fulfilled. I have already found in paragraph 55 above that the term “双11” does not designate the calendar date 11th November. I do not see how the subject marks, when considered against the subject goods and services and in the general context of the relevant trade, would give rise to an expectation which will not be fulfilled.
67. As I am not convinced that there is actual deceit or a sufficiently serious risk that the relevant consumer will be deceived, the ground of opposition under section 11(4)(b) of the Ordinance fails.

Opposition under section 11(5)(b) of the Ordinance

68. Section 11(5)(b) of the Ordinance provides that:

“(5) A trade mark shall not be registered if, or to the extent that –

...

Names (15th Edition) para. 8-201.

⁵ *Kerly's Law of Trade Marks and Trade Names* (15th edition), paragraphs 8-200 and 8-201.

⁶ *Smirnoff Trade Marks* (UK Reg) (23 Nov 2001) [2006] RPC 16, upheld on appeal ([2003] EWHC 970(CH)).

⁷ *Emanuel v Continental Shelf* [2006] ETMR 56

(b) the application for registration of the trade mark is made in bad faith.”

69. The term “bad faith” is not defined in the Ordinance. In *Gromax Plasticulture Ltd v Don & Low Nonwovens Ltd* [1999] R.P.C. 367 at 379, Lindsay J. said in relation to section 3(6) of the UK Trade Marks Act 1994 (equivalent to section 11(5)(b) of the Ordinance):

“I shall not attempt to define bad faith in this context. Plainly it includes dishonesty and, as I would hold, includes also some dealings which fall short of the standards of acceptable commercial behaviour observed by reasonable and experienced men in the particular area being examined. Parliament has wisely not attempted to explain in detail what is or is not bad faith in this context: how far a dealing must so fall-short in order to amount to bad faith is a matter best left to be adjudged not by some paraphrase by the courts (which leads to the danger of the courts then construing not the Act but the paraphrase) but by reference to the words of the Act and upon a regard to all material surrounding circumstances.”

70. In *Harrison v Teton Valley Trading Co (CHINAWHITE)* [2005] F.S.R. 10, the English Court of Appeal said (at paragraph 26):

“The words “bad faith” suggest a mental state. Clearly when considering the question of whether an application to register is made in bad faith all the circumstances will be relevant. However the court must decide whether the knowledge of the applicant was such that his decision to apply for registration would be regarded as in bad faith by persons adopting proper standards.”

71. Further, in *Ajit Weekly Trade Mark* [2006] R.P.C. 25, the Appointed Person stated as follows:

“The subjective element of the test means that the tribunal must ascertain what the defendant knew about the transaction or other matters in question. It must then be decided whether in the light of that knowledge, the defendant’s conduct is dishonest judged by ordinary standards of honest people, the defendant’s own standards of honesty being irrelevant to the determination of the objective element.”

72. An allegation that a trade mark has been applied for in bad faith is a serious allegation. It should not be made unless it can be fully and properly pleaded and should not be upheld unless it is distinctly proved and this will rarely be possible by a process of inference (*ROYAL ENFIELD Trade Marks* [2002] R.P.C. 24 at paragraph 31).
73. It is the Opponent's case that the range of goods and services being applied for under the subject application is so broad and diverse that the subject application could not have been filed in good faith.
74. The Applicant avers that it has filed the subject application in good faith and there is no basis or evidence to suggest otherwise; the subject goods and services are directly relevant to the Applicant's diverse businesses, including, without limitation, its (and/or its affiliates') operation of online platforms on which a wide range of goods and services are traded, and its (and/or its affiliates') provision of a wide range of technology-related goods and services; and the Applicant has a legitimate right and honestly intends to use and/or allow others to use the subject marks in relation to the subject goods and services.
75. Mr. Clark reiterates the Applicant's reply in Li's SD that there is no limitation as to the number of goods or services to be applied for in a trade mark application and it is not necessary to submit evidence of use in order to obtain a trade mark registration in Hong Kong; so long as the marks in question are being used by the Applicant in relation to the subject goods or services, or so long as the Applicant honestly intends to use the subject marks, or allows them to be used, in relation to those goods or services, he is not aware of any circumstances under which the subject marks would give rise to a reasonable suspicion of the Applicant's entitlement to the subject marks or the honesty of its intention.
76. In the present case, I accept that at the relevant date the Applicant has an honest intention to use the subject marks in relation to the subject goods and services. There is evidence that the Applicant has used or allowed the subject marks to be used for the sales and promotion of a very wide range of goods and services on its various online marketplaces in relation to its Double 11 campaign in the Mainland China before the relevant date. The Applicant has also adduced

evidence of use of the subject marks for the Applicant's Double 11 campaign in Hong Kong after the relevant date.

77. Taking into account all the relevant circumstances of this case, I do not find there is any basis for concluding that the Applicant's decision to apply for registration of the subject marks in respect of the subject goods and services would be regarded as in bad faith by persons adopting proper standards. The ground of opposition under section 11(5)(b) of the Ordinance is not made out.

Conclusion

78. The opposition against the subject application fails as none of the Opponent's grounds of opposition has been made out.

Costs

79. As the opposition has failed, I award the Applicant costs. Subject to any representations as to the amount of costs or calling for special treatment, which either party makes within one month from the date of this decision, costs will be calculated with reference to the usual scale in Part I of the First Schedule to Order 62 of the Rules of the High Court (Cap. 4A) as applied to trade mark matters, unless otherwise agreed between the parties.

(Connie Law)
for Registrar of Trade Marks
