類別 Class 10

Electronic imaging apparatus, namely, thermal imaging devices for diagnosing, quantifying, and screening skin surface temperature changes and visualizing and documenting temperature patterns and changes, all for medical use

紀錄冊內的貨品或服務現修改如下:

The remaining goods or services on the register now read as follows:

類別 Class 9

Electronic visions systems, namely, image processors and cameras sensing electromagnetic radiation including visible light, infrared radiation and other thermal radiation; electromagnetic sensitive imaging systems comprised of laser illumination and infrared cameras, lenses, display units, mounting devices, gimbals,

circuit boards, programmable semiconductor microprocessors, operating software, all sold as a unit; and parts for electromagnetic sensitive imaging systems, namely, laser illumination and infrared cameras, lenses, display units, mounting devices, gimbals, circuit boards, programmable semiconductor microprocessors, and operating software; heat sensitive imaging systems comprised of video and infrared cameras, display units, mounting devices, circuit boards, programmable semiconductor microprocessors, operating software, and parts thereof; precision reticules and reticule assemblies and electro optical gimbals; apparatus for detecting, measuring, recording, transmitting, analyzing, and reproducing images and sound, namely, gimbals, stabilized thermal imagers, security cameras, panoramic thermal imagers, multi-sensors with daylight tv and geo pointing capabilities, radiometric detection cameras for utility application, hand held optical weapon sight products, namely, terminal weapon sights, image intensified weapon sights, and optically fused weapon sights, laser designators, cores, namely, cooled and uncooled magnetic cores, infrared detectors, ROICs, namely, read out integrated circuits and imagers, components of thermal imaging equipment, namely, dewars, cryocoolers and laser components, namely, laser optics; imaging systems comprised of image processing hardware and software for use in range phenomenology, target recognition and detection, plume and atmospheric phenomenology and non destructive testing. infrared thermal cameras for building diagnostics, energy auditing and home inspection, property and facility management, HVAC (heating, ventilating, and air conditioning) and plumbing, moisture and restoration, automation and safety, electrical and mechanical, utilities, manufacturing industries, service companies, electrical contractors, gas imaging for petrochemical and refineries, SF6 (sulfur hexafluoride) gas detection, oil and gas extraction, environmental enforcement, municipal gas distribution, and service companies, range phenomenology, tracking, infrared signatures, high speed/stop motion, laser designation, directed energy weapons, and research and development; infrared cameras and related software used in conjunction with report generation, building applications, research and development, tracking systems for tracking persons, objects, and other targets comprised of pixel resolution, windowing full frame rate, integration time range, digital output, noise-equivalent temperature differentiation (NETD), filter wheel, optical interface, analogue signals, lens, mounting, and power supply; pointing systems for pointing out persons, objects, crystalline laser materials and other targets comprised of thermal imager, daylight/color ccd tv camera, electron-multiplying ccd (EMCCD) camera, eye safe laser rangefinder, laser pointer, stabilized gimbals, assembly, electronic control unit; guidance systems comprised of thermal imager, daylight camera, laser payloads, system interfaces, namely, laser spot tracker, navigation/radar interface, display and recorder, moving map systems, digital video output for the purpose of navigating, guiding and controlling air, land and maritime vehicles without direct or continuous human control; global positioning systems. remove control systems comprised of remote controls for ergonomic hand control unit, laptop control unit, and simplified control unit and clamp-on meters, multimeters, power supplies, fiber optic meters, thermometers, humidity meters, airflow meters, light meters, sound meters, tachometers, pressure meters, calibrators, water quality meter; and mounting devices for an tilt dome; infrared cameras; Computer software for connecting together middleware platforms, namely, servers and network protocols with graphical user interface software; software for use in connection with security applications, namely, security cameras and for use with thermal energy and stabilized camera systems; software for real time analysis of radiometric thermal imaging; software used for predictive maintenance and operating science cameras; pre-recorded media in the form of DVD, CD Rom, thumb drives, tapes, featuring electronic vision systems videos, data and sound.

#### 類別 Class 41

Educational services, namely, conducting live and web-based seminars and classes in the field of infrared thermography technology and applications and distribution of

course materials in connection therewith; educational services, namely, developing courses and seminars for others in the field of infrared thermography technology and applications and distribution of course materials in connection therewith.

類別 Class 42

Design and development of computer software for others.
