

香港特別行政區政府知識產權署商標註冊處

Trade Marks Registry, Intellectual Property Department

The Government of the Hong Kong Special Administrative Region

接納註冊 (全文本)

商標註冊處處長已根據《商標條例》(第 559 章)第 42 條，接納下列商標的註冊申請。現根據《商標條例》第 43 條及《商標規則》(第 559 章附屬法例)第 15 條，公布申請的詳情。

根據《商標條例》第 44 條及《商標規則》第 16 條，任何人擬就下列商標的註冊提出反對，須在本公告公布日期起計的三個月內，採用表格第 T6 號提交反對通知。(例如，若果公布日期為 2003 年 4 月 4 日，則該三個月的最後一日為 2003 年 7 月 3 日。)反對通知須載有反對理由的陳述及《商標規則》第 16(2)條所提述的事宜。反對人須在提交反對通知的同時，將該通知的副本送交有關申請人。

有關商標註冊處處長根據商標條例(第 43 章)第 13 條/商標條例(第 559 章)附表 5 第 10 條所接納的註冊申請，請到 <http://www.gld.gov.hk/cgi-bin/gld/egazette/index.cgi?lang=c&agree=0> 檢視電子憲報。

ACCEPTANCE FOR REGISTRATION (FULL VERSION)

The Registrar of Trade Marks has accepted the following trade marks for registration under section 42 of the Trade Marks Ordinance (Cap. 559). Under section 43 of the Trade Marks Ordinance and rule 15 of the Trade Marks Rules (Cap. 559 sub. leg.), the particulars of the applications are published.

Under section 44 of the Trade Marks Ordinance and rule 16 of the Trade Marks Rules, any person who wishes to oppose the registration of any of these marks shall, within the 3-month period beginning on the date of this publication, file a notice of opposition on Form T6. (For example, if the publication date is 4 April 2003, the last day of the 3-month period is 3 July 2003.) The notice of opposition shall include a statement of the grounds of opposition and the matters referred to in rule 16(2). The opponent shall, at the same time as he files the notice of opposition, send a copy of it to the applicant of the application in question.

For applications for registration accepted by the Registrar of Trade Marks under section 13 of the Trade Marks Ordinance (Cap. 43)/section 10 of Schedule 5 to the Trade Marks Ordinance (Cap. 559), please view e-gazette at <http://www.gld.gov.hk/cgi-bin/gld/egazette/index.cgi?lang=e&agree=0>.

類別 Class 6

- [511] 類別編號 : 7, 9, 42
Class(es) No(s).:
- [511] 貨品/服務說明 : Class 7:
Specification: Machines and machine tools; tape dispensers, labeling machinery; laminating machinery and label imprinting equipment; label dispensers (machines); release backing removal machinery that removes backing from adhesive labels; labeling machinery, laminating machinery, labelers (machines); imprinting equipment; machines for making self-adhesive materials, namely, labels and tags; printing machines; attaching machines for labels, tags, fasteners and ties to or around articles for packaging; portable labelers (machines) for applying labels; application machines for thermoplastic marking materials; removal machines for thermoplastic marking materials; machines for dispensing plastic fasteners to attach articles and merchandise together; label printing machines; electro-mechanical sorting systems; eletro-mechanical transfer systems for physical objects; conveyance belts; parts and fittings of the aforesaid; all included in Class 7.
Class 9:
Scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signalling, teaching apparatus and instruments; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity; apparatus for recording, transmission or reproduction of sound or images; magnetic data carriers, recording discs; automatic vending machines and mechanisms for coin-operated apparatus; calculating machines, data processing equipment and computers; computer software, computer programs; information-processing programs, information-processing micro-programs; software; software programs for providing access to an information-processing or data-transmission network; software for controlling access to an information-processing network; data-transmission software; control

software; development tool software (development of software environment); function command software; software packages; software for the development of applications intended for radiocommunications apparatuses and devices equipped with radiocommunications means, notably electronic modules; software for data-transmission or machine-to-machine communications, or communications between machines, sensors, measuring instruments and data servers, software for data-transmission or communications in the field of automotives, or laptops and personal digital assistants (PDA); software for programming radiocommunications apparatuses, notably electronic modules, and devices equipped with radiocommunications means, automatic dispensers, prepayment apparatuses, software for communications with operators' networks; software for computer operating systems; computer operating programs, extensions for computer systems, utility programs and tools in the field of applications software for connecting personal computers; micro-software; databases; user-interfaces; information-processing hardware, namely network equipment (routers, servers, switches, hubs, firewalls), peripheral connection ports (firewire, USB, Small Computer System Interface), wireless connections and software for the development, upkeep, maintenance and use of local area networks (LANs), and wide-area networks (WANs); information-processing hardware and software for the reception, display and operation of the transmission/broadcasting of video and audio signals and digital data, routers, hubs; servers; switches, micro-software, namely computer operating systems software; fixed-function servers; networked information-processing hardware; semiconductor devices; information-processing hardware and software for the creation, facilitating and management of remote access to and communications with local area networks (LANs), virtual private networks (VPNs), wide-area networks (WANs) and global computer networks; server operating software, software for use in providing multiple-user access to a global computer information network for searching, retrieving, transferring, handling and disseminating information, computer software tools for the facilitation of third party software applications; computer hardware and software for wireless network communications; electronic and electromechanical apparatuses, products and instruments used with computers; apparatuses and instruments for conducting, distributing, transforming, accumulating, setting, controlling and commanding electrical current, transmitters and receivers of electrical signals, electrical and electronic monitoring apparatuses, measuring apparatuses, apparatuses for the remote reading of data, notably from electrical meters; electrical accumulators; fixed and mobile radiocommunications equipment; information-processing apparatuses; computers, notably information-processing servers, palmtop computers (PDA), database servers; electronic-signal transmitters and receivers, electronic modules for the exchange of data and/or sound, still or moving images, messages, notably in mobile telephony equipments, in an automotive or an automatic dispenser; apparatuses and equipment for the transmission, recording, reproduction, modification, broadcasting, reception of data, sound, still or moving images, messages; magnetic recording

carriers, magnetic data carriers, CD-ROMs, acoustic discs, optical discs; optical data carriers, optical readers; computer software for audio and video graphics for real-time information and for the transfer, transmission, reception, processing and digitisation of images; apparatuses and instruments for the recording, processing, reception, reproduction, transfer, modification, compression, decompression, radio-broadcasting, merging and/or improvement of data; data compression and decompression algorithms in the form of computer software; testing and calibration apparatuses; data recorded in electronic, optical or magnetic form, telephony and radiotelephony installations, apparatuses, transmitters and receivers, notably of a mobile, portable or fixed type; radio waves antennas, micro-waves dishes, notably for the broadcasting, transmission and reception of data, sound, still or moving images; audio-video terminals, multimedia terminals, telecommunications apparatuses and instruments, telecommunications terminals; frequency filters; computer hardware; computers, microcomputers; computer peripherals; local area networks of computers; information-processing equipment, information-processing hardware, mobile information-processing equipment; remote-control apparatuses and equipment for the transfer, recording, playback and reproduction of sound, images, and/or computer data; electronic apparatuses and equipment for remote logging in to a computer and/or telecommunications network; electric and electronic components and devices, hybrid circuits, electronic apparatus containing hybrid circuit and semiconductor components; semiconductors; semiconductor components, in particular transistors, diodes, memories, integrated circuits, large-scale integrated circuits, wafers, integrated-circuit chips; interfaces, computer keyboards, mouse devices, workstations; microprocessors, semiconductors, semiconductor processors, semiconductor processor chips, electronic memories, printed circuits, electrical accumulators, memory boards, memory-board readers, printed-circuit boards, electronic-circuit boards, computer memory devices; semiconductor memory devices; video circuit boards; audio circuit boards; audio-video circuit boards; video graphic accelerators; multimedia accelerators; video processors; electronic self-service kiosks; stand-alone user interfaces; all-in-one computer kiosks; automated e-mail and/or mobile phone notification systems; monitoring systems; feedback systems; status-update systems; teaching apparatuses and instruments, apparatuses and instruments used for conferences, exchange and editing of documents, cameras; image-taking apparatuses; headsets; video apparatuses, video circuit boards; instruction materials relating to computers and data, recorded magnetically, optically or electronically; downloadable electronic publications, instruction guides in electronic form sold by unit or downloadable from a global computer network; electro-mechanical sorting systems; portable data collection terminal; computer peripheral devices; radio frequency identification (RFID) devices, radio frequency identification (RFID) printers, radio frequency identification (RFID) writers, radio frequency identification (RFID) readers, and radio frequency identification (RFID) scanners; barcode devices including bar code

printers, bar code readers and bar code scanners; radio frequency identification (RFID) smart tags and labels featuring embedded microchips, integrated circuits, antennas and transponders for recording, receiving, storing, encoding, updating and transmitting data; printers, print engines and printer modules for testing RFID transponders, reading and writing RFID data, and creating encoded smart tags and labels by applying RFID components; radio frequency identification devices, namely, proximity tags, proximity tag readers and proximity tag writers for monitoring security access, identification, inventory or physical state; radio frequency identification (RFID) systems and their individual components, namely, radio frequency identification (RFID) credentials, readers and writers for communicating with the radio frequency identification (RFID) credentials, and programmers for programming the radio frequency identification (RFID) credentials, wherein the radio frequency identification (RFID) credentials are in the form of cards, tags, or keys, and wherein the radio frequency identification (RFID) credentials and the readers and writers communicate using radio frequency identification (RFID) contactless or radio frequency identification (RFID) proximity technology; magnetic stripe systems and their individual components, namely, magnetic stripe cards and readers for communicating with the magnetic stripe cards; reverse polarity pulse communication (Wiegand) systems and their individual components, namely, credentials and readers for communicating with the credentials, all using reverse polarity pulse communication (Wiegand) technology, wherein the credentials are in the form of cards, tags or keys; radio frequency identification (RFID) reader and writer modules for original equipment manufacturers (OEM's); contact smart chip modules; multiple technology-based credentials and readers and writers, which combine one or more radio frequency identification (RFID) technologies with one or more technologies selected from magnetic stripe technology, reverse polarity pulse communication (Wiegand) technology, contact smart chip technology, key pad technology, bar code technology, biometric technology, anti-counterfeiting technology, and photo identification technology; data routers for computer networks used in the fields of security and access control; software for issuing and managing radio frequency identification (RFID) credentials; batteries, battery chargers and docking stations; rechargeable batteries, rechargeable battery packs; control apparatuses and instruments; security control systems, electric theft-prevention installations; anti-theft warning apparatus; sensor detection gates, electronic security gates; electronic surveillance devices; microphones; cameras and digital cameras; video cameras; optical lenses for cameras; optical apparatus and instruments; remote sensing devices; sound buzzers, alert lights; mobile telephones; telephone answering machines, modems; information-processing hardware and software for the transmission and reception of facsimiles; radio paging receivers; telephone exchanges, radio telephony or radio-paging terminals; self-service transaction units; self-service contingency units; self service staff-counter stations; RFID tagging stations; RFID conversion units; automatic shelving units; automatic item

shelving and positioning systems; express pick-up systems; automatic reserved item pick-up and temporary shelving systems; RFID devices to read and write electronic data with the tags (RFID handheld unit); automatic retrieval units; RFID system architecture and management systems; monetary fine payment systems; library user fee payment units; automatic fee collection units; library access control systems; e-mail and/or mobile phone authentication and transaction notification systems; self-services consultancy, design, testing, quality control and assurance services; library management systems with centralised database; automatic update, monitoring and status notification system; backup and redundancy systems; parts, modules, fittings and apparatuses of the aforesaid; all included in Class 9.

Class 42:

Scientific and technological services and research and design relating thereto; industrial analysis and research services; design and development of computer hardware and software; computer network services; development of computer based networks; computer programming; rental of computers, computer apparatus, computer software and computer programs; installation, maintenance, repair and updating of computer software; recovery of computer data; computer software and hardware design services; consultancy in the field of computer hardware; design of telecommunications apparatus and installations; research relating to telecommunication techniques; design of communication apparatus and systems; testing of computing equipment; testing of cable installations for optical communications apparatus; computer system design and analysis; computer database consultancy services; computer hardware time sharing facilities; provision of computer time sharing facilities; design services, technical and engineering drawing services, commissioned writing of control programs, data processing programs and programs for information processing apparatus; consultancy relating to design, testing, quality control and assurance; all included in Class 42.

Specification: Scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signalling, teaching apparatus and instruments; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity; apparatus for recording, transmission or reproduction of sound or images; magnetic data carriers, recording discs; automatic vending machines and mechanisms for coin-operated apparatus; calculating machines, data processing equipment and computers; computer software, computer programs; information-processing programs, information-processing micro-programs; software; software programs for providing access to an information-processing or data-transmission network; software for controlling access to an information-processing network; data-transmission software; control software; development tool software (development of software environment); function command software; software packages;

software for the development of applications intended for radiocommunications apparatuses and devices equipped with radiocommunications means, notably electronic modules; software for data-transmission or machine-to-machine communications, or communications between machines, sensors, measuring instruments and data servers, software for data-transmission or communications in the field of automotives, or laptops and personal digital assistants (PDA); software for programming radiocommunications apparatuses, notably electronic modules, and devices equipped with radiocommunications means, automatic dispensers, prepayment apparatuses, software for communications with operators' networks; software for computer operating systems; computer operating programs, extensions for computer systems, utility programs and tools in the field of applications software for connecting personal computers; micro-software; databases; user-interfaces; information-processing hardware, namely network equipment (routers, servers, switches, hubs, firewalls), peripheral connection ports (firewire USB, Small Computer System Interface), wireless connections and software for the development, upkeep, maintenance and use of local area networks (LANs), and wide-area networks (WANs); information-processing hardware and software for the reception, display and operation of the transmission/broadcasting of video and audio signals and digital data, routers, hubs; servers; switches, micro-software, namely computer operating systems software; fixed-function servers; networked information-processing hardware; semiconductor devices; information-processing hardware and software for the creation, facilitating and management of remote access to and communications with local area networks (LANs), virtual private networks (VPNs), wide-area networks (WANs) and global computer networks; server operating software, software for use in providing multiple-user access to a global computer information network for searching, retrieving, transferring, handling and disseminating information, computer software tools for the facilitation of third party software applications; computer hardware and software for wireless network communications; electronic and electromechanical apparatuses, products and instruments used with computers; apparatuses and instruments for conducting, distributing, transforming, accumulating, setting, controlling and commanding electrical current, transmitters and receivers of electrical signals, electrical and electronic monitoring apparatuses, measuring apparatuses, apparatuses for the remote reading of data, notably from electrical meters; electrical accumulators; fixed and mobile radiocommunications equipment; information-processing apparatuses; computers, notably information-processing servers, palmtop computers (PDA), database servers; electronic-signal transmitters and receivers, electronic modules for the exchange of data and/or sound, still or moving images, messages, notably in mobile telephony equipments, in an automotive or an automatic dispenser; apparatuses and equipment for the transmission, recording, reproduction, modification, broadcasting, reception of data, sound, still or moving images, messages; magnetic recording carriers, magnetic data carriers, CD-ROMs, acoustic discs, optical discs; optical data carriers, optical readers; computer software

for audio and video graphics for real-time information and for the transfer, transmission, reception, processing and digitisation of images; apparatuses and instruments for the recording, processing, reception, reproduction, transfer, modification, compression, decompression, radio-broadcasting, merging and/or improvement of data; data compression and decompression algorithms in the form of computer software; testing and calibration apparatuses; data recorded in electronic, optical or magnetic form, telephony and radiotelephony installations, apparatuses, transmitters and receivers, notably of a mobile, portable or fixed type; radio waves antennas, micro-waves dishes, notably for the broadcasting, transmission and reception of data, sound, still or moving images; audio-video terminals, multimedia terminals, telecommunications apparatuses and instruments, telecommunications terminals; frequency filters; computer hardware; computers, microcomputers; computer peripherals; local area networks of computers; information-processing equipment, information-processing hardware, mobile information-processing equipment; remote-control apparatuses and equipment for the transfer, recording, playback and reproduction of sound, images, and/or computer data; electronic apparatuses and equipment for remote logging in to a computer and/or telecommunications network; electric and electronic components and devices, hybrid circuits, electronic apparatus containing hybrid circuit and semiconductor components; semiconductors; semiconductor components, in particular transistors, diodes, memories, integrated circuits, large-scale integrated circuits, wafers, integrated-circuit chips; interfaces, computer keyboards, mouse devices, workstations; microprocessors, semiconductors, semiconductor processors, semiconductor processor chips, electronic memories, printed circuits, electrical accumulators, memory boards, memory-board readers, printed-circuit boards, electronic-circuit boards, computer memory devices; semiconductor memory devices; video circuit boards; audio circuit boards; audio-video circuit boards; video graphic accelerators; multimedia accelerators; video processors; electronic self-service kiosks; stand-alone user interfaces; all-in-one computer kiosks; automated e-mail and/or mobile phone notification systems; monitoring systems; feedback systems; status-update systems; teaching apparatuses and instruments, apparatuses and instruments used for conferences, exchange and editing of documents, cameras; image-taking apparatuses; headsets; video apparatuses, video circuit boards; instruction materials relating to computers and data, recorded magnetically, optically or electronically; downloadable electronic publications, instruction guides in electronic form sold by unit or downloadable from a global computer network; electro-mechanical sorting systems; portable data collection terminal; computer peripheral devices; radio frequency identification (RFID) devices, radio frequency identification (RFID) printers, radio frequency identification (RFID) writers, radio frequency identification (RFID) readers, and radio frequency identification (RFID) scanners; barcode devices including bar code printers, bar code readers and bar code scanners; radio frequency identification (RFID) smart tags and labels featuring embedded

microchips, integrated circuits, antennas and transponders for recording, receiving, storing, encoding, updating and transmitting data; printers, print engines and printer modules for testing RFID transponders, reading and writing RFID data, and creating encoded smart tags and labels by applying RFID components; radio frequency identification devices, namely, proximity tags, proximity tag readers and proximity tag writers for monitoring security access, identification, inventory or physical state; radio frequency identification (RFID) systems and their individual components, namely, radio frequency identification (RFID) credentials, readers and writers for communicating with the radio frequency identification (RFID) credentials, and programmers for programming the radio frequency identification (RFID) credentials, wherein the radio frequency identification (RFID) credentials are in the form of cards, tags, or keys, and wherein the radio frequency identification (RFID) credentials and the readers and writers communicate using radio frequency identification (RFID) contactless or radio frequency identification (RFID) proximity technology; magnetic stripe systems and their individual components, namely, magnetic stripe cards and readers for communicating with the magnetic stripe cards; reverse polarity pulse communication (Wiegand) systems and their individual components, namely, credentials and readers for communicating with the credentials, all using reverse polarity pulse communication (Wiegand) technology, wherein the credentials are in the form of cards, tags or keys; radio frequency identification (RFID) reader and writer modules for original equipment manufacturers (OEM's); contact smart chip modules; multiple technology-based credentials and readers and writers, which combine one or more radio frequency identification (RFID) technologies with one or more technologies selected from magnetic stripe technology, reverse polarity pulse communication (Wiegand) technology, contact smart chip technology, key pad technology, bar code technology, biometric technology, anti-counterfeiting technology, and photo identification technology; data routers for computer networks used in the fields of security and access control; software for issuing and managing radio frequency identification (RFID) credentials; batteries, battery chargers and docking stations; rechargeable batteries, rechargeable battery packs; control apparatuses and instruments; security control systems, electric theft-prevention installations; anti-theft warning apparatus; sensor detection gates, electronic security gates; electronic surveillance devices; microphones; cameras and digital cameras; video cameras; optical lenses for cameras; optical apparatus and instruments; remote sensing devices; sound buzzers, alert lights; mobile telephones; telephone answering machines, modems; information-processing hardware and software for the transmission and reception of facsimiles; radio paging receivers; telephone exchanges, radio telephony or radio-paging terminals; self-service transaction units; self-service contingency units; self service staff-counter stations; RFID tagging stations; RFID conversion units; automatic shelving units; automatic item shelving and positioning systems; express pick-up systems; automatic reserved item pick-up and temporary shelving systems;

RFID devices to read and write electronic data with the tags (RFID handheld unit); automatic retrieval units; RFID system architecture and management systems; monetary fine payment systems; library user fee payment units; automatic fee collection units; library access control systems; e-mail and/or mobile phone authentication and transaction notification systems; self-services consultancy, design, testing, quality control and assurance services; library management systems with centralised database; automatic update, monitoring and status notification system; backup and redundancy systems; parts, modules, fittings and apparatuses of the aforesaid; all included in Class 9.
