The remaining goods or services on the register now read as follows:

類別 Class 6

Mounting accessories, namely masts, pedestals and stands, cover flanges, cover plates, brackets, rooftop cover plates, rooftop rafter fasteners, ducts, earthing terminals; earthing clamps; earthing busbars; clamps and terminals, tightening straps, fixtures, in particular for installing antennae and for installing communication systems on and in buildings; metal surface mounting frames.

類別 Class 7

Turning devices (rotors) for the automatic alignment of antennae.

類別 Class 9

Scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signalling, checking (supervision), life-saving and teaching apparatus and instruments; electric, electrotechnical, electronic and optoelectronic apparatus, instruments and equipment and systems consisting thereof (as far as included in class 9); apparatus, equipment, instruments, components and assemblies consisting thereof for recording, transmission, broadcasting, receiving, reproduction, output, manipulation, editing, processing, formation, absorbing, distribution, conversion, blocking, equalising, transfer, filtration, measurement, regulating, monitoring and/or storage of signals, data, sounds, signs, images, text and/or films; antennae being communications apparatus and being components, in particular transmission antennae, receiving antennae, car antennae, car radio antennae, antennae for use on railway vehicles, radio antennae, television antennae, satellite antennae, active and passive antennae, antennae with integrated mechanical, electric, electromechanical or electronic components, antennae for installation inside buildings and/or for outdoor use, disguised antennae, antennae for telecommunications, in particular for mobile communications; phase shifters, in particular for adjusting a variable radiation angle (downtilt angle) of antennae in mobile communications systems, remote-controlled phase shifters; communication base stations, baseband signal processors, transmitter assemblies, receiver assemblies, repeaters, channel amplifiers, broadband amplifiers, transmitters, receivers, transducers, frequency translators, demodulators, modulators, decoders, encoders, remote radio heads, converters, microwave converters; remote power injection filters (bias tees), crossover units, hubs, filters, band-pass filters, duplex filters, repeaters, relays, multiplexers, diplexers, duplexers, triplexers, transceivers, final amplifiers, splitters; controllers for signal transmission, in particular in mobile communications systems, bypass circuits, converters, including protocol, voltage, electricity, power and/or frequency transducers or converters, coupling and/or decoupling apparatus for feeding in data, signals and/or voltages and for decoupling data, signals and/or voltages into or from lines, patch panels, VHF range amplifiers; active and passive devices, assemblies and components for cable networks and for

satellite and terrestrial receivers/antennae systems for television signals, audio signals and interactive services, in particular DVB-S/T/C, DVB-S2/T2/C2, IP / networks and other kinds of signals and transmission standards, in particular receivers, feed systems, SAT-IP servers, head-ends and head-end stations for processing analogue and digital radio and/or TV programs; DVB transcoders, DVB transceivers, DVB transmodulators, TV and DVB transducers, TV modulators, power supply units, modems, active branch circuits or distribution circuits, switching matrixes; control bus demultiplexers, encoders, input splitters, output collectors (output distribution bars), inserts and modules, equalisers, multiplexers and demultiplexers, coupling and/or decoupling apparatus for feeding in data, signals and/or voltages and for decoupling data, signals and/or voltages ; channel blocking devices and range blocking devices, cable equalisers, analogue-digital switches and apparatus for transmitting signals via voltage and/or power supply lines; overvoltage protective devices; computers, communications computers, calculators, data processing apparatus, data processing installations, computer peripheral devices; telephone, telephone extension, videophone, mobile telephone, car telephone and fax apparatus and systems, answering machines, intercoms, dialling apparatus, domestic telephone apparatus, intercom systems; monitors being parts of domestic communication and surveillance systems; image scanning apparatus; optical, mechanical, electric, electromechanical, electrotechnical and electronic apparatus for measuring technology and control technology, in particular also for building technology, system control, system monitoring and/or sensor technology, in particular apparatus for installation inside buildings or for outdoor use for transmission, processing, distribution and/or receiving of signals for wired and/or wireless communication, including related control equipment; signal processing apparatus, power supply devices, power supply assemblies, test receivers and antennae measuring apparatus; lasers; systems for sending and receiving signals transmitted via optical fibres; optical conversion, transmission, broadcasting and receiving devices; mounting and connective accessories, namely electrical distributors, duplexers, electrical blocking devices, circulators, insulators, signal splitters, sockets, lightning arresters and lightning current arrestors, building entry points, multiplexers, multiswitches, cable switch boxes, communications cables, waveguides, in particular optical waveguides, glass fibre cables and related connecting elements; parts for all of the aforesaid apparatus, instruments, equipment and assemblies; systems consisting of a combination of the aforesaid apparatus, instruments, equipment and/or assemblies; computer software (downloadable); computer software (recorded); application software, namely applications (apps) for mobile and stationery end devices; all of the aforesaid goods in class 9 in particular for communications technology, broadband communications technology, broadcast technology, receiver technology, network technology, broadband network technology and for transmission of signals, data, sounds, images, films and/or text; electric animal prods; light emitting diodes (LED).

類別 Class 11

LED light bulbs, LED luminaires, illumination devices with LED luminaires; control and monitoring devices for LED luminaires; reflector heating panels for antennae and

outdoor temperature controls therefor; ventilators for cooling electric or electronic apparatus, instruments, devices or assemblies.

類別 Class 16

Printed matter, in particular technical descriptions, operating instructions, mounting instructions, operating manuals, application guidelines, datasheets, program descriptions for software, press information, catalogues, manuals, prospectuses, flyers, fold-out albums, brand books, editing manuals, editorial guidelines, educational books, advertising brochures; pictures, photographs and graphic representations; instructional and teaching material (except apparatus); paper bags; bags made of rock flour.

類別 Class 35

Retailing, wholesaling, mail order and online trade in relation to antennae being communications apparatus and being components; electric, electrotechnical, electronic and optoelectronic apparatus, instruments and devices and their parts and systems consisting thereof.

類別 Class 37

Installation and repair of antennae being communications apparatus and components; installation and repair of electric, electrotechnical, electronic and optoelectronic apparatus, instruments, devices, assemblies, and their parts as well as systems consisting thereof; mounting of antennae as communications apparatus and as components; mounting of electric, electrotechnical, electronic and optoelectronic apparatus, instruments and devices, their parts and systems consisting thereof, in particular in the field of communications technology, broadband communications technology, broadcasting technology, transmission technology and receiver technology, telecommunications technology, as well as related consultancy in these fields.

類別 Class 38

Telecommunications; broadcasting and/or transmission of data, information and programs, including electronic services, namely compiling, storing, decoding, forwarding, distributing, exchanging and sending of messages and data; providing electronic mail systems for exchanging and redirecting messages and data; operating and providing of data transmission networks; online services, namely transmission of messages; operating a teleshopping channel; operation of telecommunications systems, in particular providing access to computer databases, computer short messaging systems, computer networks, computerised research and reference materials, interactive communications networks, computer software; rental and operation of data transmission networks, mailboxes, e-mail services; rental of electric, electronic and electrotechnical equipment and systems consisting thereof for communications technology, broadband communications technology, broadcast technology, transmission technology, receiver technology and telecommunications technology.

類別 Class 42

Engineering services; planning, development and rental of antennae being communications apparatus and being components; planning and development of electric, electrotechnical, electronic and optoelectronic apparatus, instruments and equipment, their parts and systems consisting thereof, in particular in the field of communications technology, broadband communications technology, broadcast technology, transmission technology and receiver technology, telecommunications technology and related consultancy in these fields; planning, development, design and installation of data transmission networks, mailboxes, e-mail services; rental of electric, electrotechnical, electronic and optoelectronic apparatus, instruments and devices, their parts and systems consisting thereof (except such for telecommunication purposes and as far as included in class 42); development, design, updating and rental of computer software; software as a service (SaaS); research relating to technology.

類別 Class 45

Licensing of intellectual property rights; licensing of technology.
