

香港特別行政區政府知識產權署商標註冊處
Trade Marks Registry, Intellectual Property Department
The Government of the Hong Kong Special Administrative Region

接納註冊 (全文本)

商標註冊處處長已根據《商標條例》(第 559 章)第 42 條，接納下列商標的註冊申請。現根據《商標條例》第 43 條及《商標規則》(第 559 章附屬法例)第 15 條，公布申請的詳情。

根據《商標條例》第 44 條及《商標規則》第 16 條，任何人擬就下列商標的註冊提出反對，須在本公告公布日期起計的三個月內，採用表格第 T6 號提交反對通知。(例如，若果公布日期為 2003 年 4 月 4 日，則該三個月的最後一日為 2003 年 7 月 3 日。)反對通知須載有反對理由的陳述及《商標規則》第 16(2)條所提述的事宜。反對人須在提交反對通知的同時，將該通知的副本送交有關申請人。

有關商標註冊處處長根據商標條例(第 43 章)第 13 條/商標條例(第 559 章)附表 5 第 10 條所接納的註冊申請，請到 <http://www.info.gov.hk/pd/egazette/> 檢視電子憲報。

ACCEPTANCE FOR REGISTRATION (FULL VERSION)

The Registrar of Trade Marks has accepted the following trade marks for registration under section 42 of the Trade Marks Ordinance (Cap. 559). Under section 43 of the Trade Marks Ordinance and rule 15 of the Trade Marks Rules (Cap. 559 sub. leg.), the particulars of the applications are published.

Under section 44 of the Trade Marks Ordinance and rule 16 of the Trade Marks Rules, any person who wishes to oppose the registration of any of these marks shall, within the 3-month period beginning on the date of this publication, file a notice of opposition on Form T6. (For example, if the publication date is 4 April 2003, the last day of the 3-month period is 3 July 2003.) The notice of opposition shall include a statement of the grounds of opposition and the matters referred to in rule 16(2). The opponent shall, at the same time as he files the notice of opposition, send a copy of it to the applicant of the application in question.

For applications for registration accepted by the Registrar of Trade Marks under section 13 of the Trade Marks Ordinance (Cap. 43)/section 10 of Schedule 5 to the Trade Marks Ordinance (Cap. 559), please view e-gazette at <http://www.info.gov.hk/pd/egazette/>.

類別 Class 6

Applicant's Address for Service: VINCENT LUK & ASSOCIATES
UNIT A, 13TH FLOOR, NATHAN COMMERCIAL BUILDING, 430 NATHAN
ROAD, KOWLOON, HONG KONG.
- [511] 類別編號：
Class(es) No(s).: 6, 7, 9, 17, 35, 37, 38, 39, 40, 41, 42, 45
- [511] 貨品／服務說明：
Specification: Class 6:
metal hardware and metal construction materials; all machined, rolled, cast, shaped,
processed, semi-processed products based on aluminium, copper, lead, tin and alloys
thereof, sintered hard metals; metal materials and containers for the transport,
storage, handling of radioactive substances or other hazardous substances; all
included in Class 6.
Class 7:
electricity generators, dynamos, engines other than for land vehicles, clutches;
starters for engines; engine control centre; rotary and stationary electrical machines,
cylinders, particularly pneumatic and hydraulic, clutches (non-electrical) and
transmission devices (except for land vehicles); regulators (machine parts); speed
regulators, for machines and engines; voltage regulators, electronic variable speed
drives for electrical motors; electrical motors, combinations thereof with variable
speed drive; all included in Class 7.
Class 9:
electrotechnical, electronic and mechanical devices, equipment and instruments for
the control, distribution, transformation, accumulation, setting, measurement,
signalling, regulation, control, protection, monitoring, switching, start-up inspection
of electrical energy; electrical pipes; electrical couplings; circuit changing switches;
electrical capacitors; electrical conductors; electricity lines; self-acting switches;
connection boxes; electrical energy control, connection and distribution panels;
connections; electrical converters; fibre optic cables; electrical cables; ducts for
electrical cables; circuit breakers; isolating switches, main switches, cabinets,
electrical energy distribution consoles; electrical wires; identification wires or
sheaths for electrical wires; indicators (electricity); inductors (electricity); rotors
(electricity); break-make contacts (electricity); electrical line connectors; limiters
(electricity); current rectifiers; rheostats; attenuators (electricity); electrical resistors;
variometers; electrical installation and network protection, inspection, management,
monitoring and supervision systems; computerised energy management equipment
and systems, applied to the operation of energy transport networks, the determination
of consumer requirements and energy flow regulation between power plants and the
distribution network; energy management software; software applied to the
protection, inspection, management, monitoring and supervision of electrical
installations and networks; devices for the transmission, reception, storage and
processing of sound, images or data; computers, computer peripherals;
electrotechnical, electronic or mechanical devices, equipment and instruments for the
inspection of motors and electrical, electronic and computer equipment; electrical
storage batteries and batteries, fuel cells, chargers, coils, electrical and electronic
components, stations; sub-stations, boards, panels for inspection, setting, measuring,
signalling, regulating, controlling, protecting and monitoring electrical energy;
decentralised energy production stations; high, medium and low voltage electrical
equipment, that is, isolating switches, lightning arresters, measurement attenuators
(including electronic, digital and optoelectronic) for indoor, outdoor stations or
stations under metal or insulating casings; transformers and autotransformers, power
outlet, branch circuit boxes, measurement attenuators, short-circuit; line insulators
and insulators for electrical equipment; electrical energy transformation and
distribution station, optical and electro-optical equipment; alarm devices, order
transmitters, alert system, luminous or mechanical signalling, acoustic and optical
signalling; current power, control and frequency voltage regulators; stationary and
rotary converters, energy converters; electronic and/or digital relays used for the
protection and control of electrical energy power supply, inspection, measurement
and management systems and associated software; electrical, electronic and digital

relays, such as remote-controlled relays, protection relays, auxiliary relays, measurement relays; fuses; indicators, transducers and monitoring, analysis, communication, measurement, inspection and control systems for electrical networks and for stations and for electrical energy production, transport and distribution sub-stations and for electrical equipment; shielded or conventional electrical stations, stations and sub-stations under metal or insulating casing for electrical energy transport and distribution networks; conversion stations, compensators, particularly reactive energy compensators; electrical control tables and panel; electrical testing equipment and stations; programmable logic controllers; automated process monitoring, analysis, communication, measurement, inspection and control and supervision hardware and equipment for industry and for electrical energy production, transport and distribution; electrical energy conversion hardware and equipment; hardware and equipment for electrical energy transport and distribution line; telecommunications hardware and equipment on electrical energy transport and distribution lines; electronic printed circuit board, electronic microcircuits, electronic microcircuit or board of component implementation software; automated process control and supervision software; programming, implementation and operation software for the abovementioned hardware, equipment and software; electrical energy communication and transport wires and cables; electrical energy inspection and control sub-stations, boards, panels; stations under metal or gas insulation insulating casing; hybrid stations with air-insulated devices and devices under metal or gas insulation insulating casings; electrical protection systems; electrical, electrotechnical, electromagnetic, electronic, optoelectronic, inspection, monitoring, signalling, measurement and calculation units, instruments, devices and systems; recording devices, particularly intended for the observation of variable electrical energy values; ammeters, amplifiers, recorders, capacitance measurement devices; control panels for electrical energy, electrical and electronic installations for the remote control of industrial operations, electrical and electronic inspection devices, detectors, electrical loss indicators, indicators for electrical energy; devices for information processing, precision measurement devices, telephone sets, telephone and telecommunications transmitters; electrical energy supply, filtering, transformation, maintenance and storage devices; annunciator boards (electricity); interference suppressor devices (electricity); electrical coils; terminals (electricity); connection boxes (electricity); junction boxes (electricity); valve boxes (electricity); electrical collectors; control panels (electricity); electrical switching devices; equipment for electricity lines; connectors and connection panels; electrical contacts; electricity distribution cabinets; identification wires for electrical wires; frequency meters; computer interfaces; switches; electrical line connectors; junction sleeves for electrical cables; ohmmeters; lightning rods; electrical connections; voltage surge regulators; voltage regulators; saddles (electricity); transistors (electronics); range finders; trip switches; voltmeters; electrical energy and electrical energy characteristic supervision, monitoring, inspection devices and instruments; energy consumption evaluation devices and instruments; energy consumption habit evaluation devices and instruments; production, transport and electrical energy device and instrument supervision, monitoring, inspection equipment and instruments, electrical energy management devices and instruments; electronic and electrotechnical installations and equipment for electrical energy production, transport and distribution networks; thyristor conversion bridges; electrical equipment and instruments for energy transport and distribution networks; solid state reactive energy controller; status measurement, transmission and instruction devices; electrical device, installation and network measurement, inspection, monitoring, signalling, disconnection, regulation, protection devices and equipment; electrical or electronic inspection, signalling, detection equipment, instruments or devices; equipment intended to measure and record electrical interference; electrical energy transformation cabinets equipped with electrical devices, that is, isolation switches, main switches, circuit breakers and/or transformers and devices associated with the monitoring, protection and switching of said electrical devices; low voltage electrical distribution unit; modular low voltage electrical distribution columns and units comprising protection and switching equipment; dielectric fluid and/or insulating gas and/or off-load high voltage and medium voltage circuit breakers; high voltage

energy transport device consisting of one or more live conductors, located inside a grounded casing, the insulation between the conductors and the ground being provided by a dielectric fluid; safety verification device for electrical equipment; recording device for process control; storage and display equipment for information relating to events such as control and inspection signals; device used for the overall inspection and testing of protection relay circuitry for electrical networks and machines; electronic equipment intended to perform remote inspection and remote control of energy networks or other structures; remote monitoring and remote control centre equipment for the collection and processing of information in centralised technical management systems; computer programs recorded on all data media, and associated software, applications; single-phase or multi-phase gas insulation high voltage electrical current transport line; single-phase or multi-phase DC or AC electrical current transport line; application software for the management of electrical network inspection and monitoring systems; microprocessor-based automation system intended for the inspection and remote control of electrical energy distribution panels; status monitoring system for electrical equipment, namely main switches, isolating switches and contactors; medium and high output electrical transformers for electrical energy production, transport and distribution; high voltage to low voltage transformers for mains electrical power supply; prefabricated medium and high voltage energy distribution and transport stations; all included in Class 9.

Class 17:

insulating materials; insulators intended for energy production, transport and distribution; shaped, processed, semi-processed insulating material products; all included in Class 17.

Class 35:

business organisation and management consulting; trade or industrial business management; business expertise; cost price analysis; third-party supply services; market research and studies; all these services being related to/used for production, transport, and energy distribution; all included in Class 35.

Class 37:

installation, repair, and maintenance services of devices, equipment and infrastructure for electrical energy production transportation, or distribution; construction of electrical energy production, transportation, or distribution factories; construction of electrical installations; installation (implementation), and maintenance services for all equipment, material and machines related to electronic, electro-technical, and mechanical fields associated with electrical energy production, transportation, and distribution; construction of electrical energy transportation and distribution lines; all included in Class 37.

Class 38:

telecommunications/communications services by computer terminals, calculators, and local and remote command automatic operation systems related to the control, adjustment, measurement, signalling, regulation, command, protection, and supervision of electrical energy; all included in Class 38.

Class 39:

energy transportation and distribution services; operation and management of third-party energy transportation and distribution networks; information and consulting services related to energy transportation and distribution; all included in Class 39.

Class 40:

third-party on-demand material assembly services; energy production services; operation and management for third-party energy production infrastructures; operation (initialization) services for all equipment, material and machines related to electronic, electro-technical and mechanical fields associated with electrical energy production, transportation, and distribution; all included in Class 40.

Class 41:

training and education services in the field of electrical energy production, transportation, and distribution; organisation and hosting of symposiums, conferences, congresses, and expos; all included in Class 41.

Class 42:

engineering and research services in the field of electrical energy production, transportation, and distribution; technical analysis and study services in the field of

electrical energy production, transportation, and distribution; simulation and quality control services in the field of electrical energy production, transportation, and distribution; research, design, and development of new products or product sets for third parties in the field of electrical energy production, transportation, and distribution; update or improvement of product, product set, or infrastructure performance designed for electrical energy production, transportation, and/or distribution; design, update, maintenance, and leasing of software applied to the field of electrical energy production, transportation, and distribution; study of technical projects of any equipment, material, and machines related to electrical energy production, transportation, and distribution; material and product tests, studies, design, and infrastructure project management related to energy production, transportation, and distribution; study of turnkey station, sub-station, and workstation projects for electrical energy production, transportation, and distribution; inspection of construction sites, power stations, power sub-stations, workstations for electrical energy production, transportation, and distribution; all included in Class 42.

Class 45:

security consulting services in the field of electrical energy production, transportation, and distribution; all included in Class 45.

Class 41:

providing pachinko parlors, providing amusement arcade services; rental of amusement machines and equipment; hire of equipment for games; amusement arcade gaming machine rental services; video arcade services; video game arcade services; rental of pachinko machines, providing of information of new machines in new opening pachinko parlors at computer terminals through telecommunication, providing of pachinko games playable computer terminals through telecommunication, musical education, planning/arranging and promotion of seminars relating to music, exhibition of materials relating to original/specimen copy,

literature, chart, photos, films and records, production of artist books relating to musician and actor, information of organization and promotion relating to movie, performance of plays, live show performance and musical performances by internet, organization and promotion relating to movie, performance of plays, live show performance and musical performances, movie showing/production/distribution, information about game/musical performance/movie showing, live show performances, direction or presentation about plays, musical performances, information in relation to musical performances, production of videotapes/videodiscs/records/pre-recorded magnetic disks/pre-recorded magnetic tapes and others for television programs, production of master disks of records/compact disks/mini disks, planning and conducting contests relating to shows, plays, music, providing studios of sound or image, providing music accessible through computer networks, providing facilities for entertainment, providing facilities or information for movies, show performance, drama staging, music performances of education, booking of seats for show performances by internet, booking of seats for show performances, rental of cinematographic films, rental of record players, rental of records, compact discs and/or sound recorded magnetic tapes, rental of toys, rental of playing apparatus, providing of game at computer terminals through telecommunication; entertainment services relating to amusement machines; photography; all included in Class 41.

Class 42:

design, preparation and/or maintenance of computer software, design of graphic software systems; agencies or liaison services relating to licensing contracts based on portrait rights and using stage names for public entertainers, agencies or liaison services relating to copyrights, design planning, design, preparation and/or maintenance of computer programs relating to copyrights, preparation of home pages in internet, research, analysis and/or advice on computer networks for construction or management, rental of uniforms for body guarding, rental of computers (including central processing units; programmed-data-carrying electronic circuits/magnetic disks/magnetic tapes optical magnetic disk, CD-ROM; and peripheral equipment for computers); all included in Class 42.

[511]	貨品／服務說明： Specification:	Class 9: electrotechnical, electronic and mechanical devices, equipment and instruments for the control, distribution, transformation, accumulation, setting, measurement, signalling, regulation, control, protection, monitoring, switching, start-up inspection of electrical energy; electrical pipes; electrical couplings; circuit changing switches; electrical capacitors; electrical conductors; electricity lines; self-acting switches; connection boxes; electrical energy control, connection and distribution panels; connections; electrical converters; fibre optic cables; electrical cables; ducts for electrical cables; circuit breakers; isolating switches, main switches, cabinets, electrical energy distribution consoles; electrical wires; identification wires or sheaths for electrical wires; indicators (electricity); inductors (electricity); rotors (electricity); break-make contacts (electricity); electrical line connectors; limiters (electricity); current rectifiers; rheostats; attenuators (electricity); electrical resistors; variometers; electrical installation and network protection, inspection, management, monitoring and supervision systems; computerised energy management equipment and systems, applied to the operation of energy transport networks, the determination of consumer requirements and energy flow regulation between power plants and the distribution network; energy management software; software applied to the protection, inspection, management, monitoring and supervision of electrical installations and networks; devices for the transmission, reception, storage and processing of sound, images or data; computers, computer peripherals; electrotechnical, electronic or mechanical devices, equipment and instruments for the inspection of motors and electrical, electronic and computer equipment; electrical storage batteries and batteries, fuel cells, chargers, coils, electrical and electronic components, stations; sub-stations, boards, panels for inspection, setting, measuring, signalling, regulating, controlling, protecting and monitoring electrical energy; decentralised energy production stations; high, medium and low voltage electrical equipment, that is, isolating switches, lightning arresters, measurement attenuators (including electronic, digital and optoelectronic) for indoor, outdoor stations or stations under metal or insulating casings; transformers and autotransformers, power outlet, branch circuit boxes, measurement attenuators, short-circuit; line insulators and insulators for electrical equipment; electrical energy transformation and distribution station, optical and electro-optical equipment; alarm devices, order transmitters, alert system, luminous or mechanical signalling, acoustic and optical signalling; current power, control and frequency voltage regulators; stationary and rotary converters, energy converters; electronic and/or digital relays used for the protection and control of electrical energy power supply, inspection, measurement and management systems and associated software; electrical, electronic and digital relays, such as remote-controlled relays, protection relays, auxiliary relays, measurement relays; fuses; indicators, transducers and monitoring, analysis, communication, measurement, inspection and control systems for electrical networks and for stations and for electrical energy production, transport and distribution sub-stations and for electrical equipment; shielded or conventional electrical stations, stations and sub-stations under metal or insulating casing for electrical energy transport and distribution networks; conversion stations, compensators, particularly reactive energy compensators; electrical control tables and panel; electrical testing equipment and stations; programmable logic controllers; automated process monitoring, analysis, communication, measurement, inspection and control and supervision hardware and equipment for industry and for electrical energy production, transport and distribution; electrical energy conversion hardware and equipment; hardware and equipment for electrical energy transport and distribution

line; telecommunications hardware and equipment on electrical energy transport and distribution lines; electronic printed circuit board, electronic microcircuits, electronic microcircuit or board of component implementation software; automated process control and supervision software; programming, implementation and operation software for the abovementioned hardware, equipment and software; electrical energy communication and transport wires and cables; electrical energy inspection and control sub-stations, boards, panels; stations under metal or gas insulation insulating casing; hybrid stations with air-insulated devices and devices under metal or gas insulation insulating casings; electrical protection systems; electrical, electrotechnical, electromagnetic, electronic, optoelectronic, inspection, monitoring, signalling, measurement and calculation units, instruments, devices and systems; recording devices, particularly intended for the observation of variable electrical energy values; ammeters, amplifiers, recorders, capacitance measurement devices; control panels for electrical energy, electrical and electronic installations for the remote control of industrial operations, electrical and electronic inspection devices, detectors, electrical loss indicators, indicators for electrical energy; devices for information processing, precision measurement devices, telephone sets, telephone and telecommunications transmitters; electrical energy supply, filtering, transformation, maintenance and storage devices; annunciator boards (electricity); interference suppressor devices (electricity); electrical coils; terminals (electricity); connection boxes (electricity); junction boxes (electricity); valve boxes (electricity); electrical collectors; control panels (electricity); electrical switching devices; equipment for electricity lines; connectors and connection panels; electrical contacts; electricity distribution cabinets; identification wires for electrical wires; frequency meters; computer interfaces; switches; electrical line connectors; junction sleeves for electrical cables; ohmmeters; lightning rods; electrical connections; voltage surge regulators; voltage regulators; saddles (electricity); transistors (electronics); range finders; trip switches; voltmeters; electrical energy and electrical energy characteristic supervision, monitoring, inspection devices and instruments; energy consumption evaluation devices and instruments; energy consumption habit evaluation devices and instruments; production, transport and electrical energy device and instrument supervision, monitoring, inspection equipment and instruments, electrical energy management devices and instruments; electronic and electrotechnical installations and equipment for electrical energy production, transport and distribution networks; thyristor conversion bridges; electrical equipment and instruments for energy transport and distribution networks; solid state reactive energy controller; status measurement, transmission and instruction devices; electrical device, installation and network measurement, inspection, monitoring, signalling, disconnection, regulation, protection devices and equipment; electrical or electronic inspection, signalling, detection equipment, instruments or devices; equipment intended to measure and record electrical interference; electrical energy transformation cabinets equipped with electrical devices, that is, isolation switches, main switches, circuit breakers and/or transformers and devices associated with the monitoring, protection and switching of said electrical devices; low voltage electrical distribution unit; modular low voltage electrical distribution columns and units comprising protection and switching equipment; dielectric fluid and/or insulating gas and/or off-load high voltage and medium voltage circuit breakers; high voltage energy transport device consisting of one or more live conductors, located inside a grounded casing, the insulation between the conductors and the ground being provided by a dielectric fluid; safety verification device for electrical equipment; recording device for process control; storage and display equipment for information relating to events such as control and inspection signals; device used for the overall inspection and testing of protection relay circuitry for electrical networks and machines; electronic equipment intended to perform remote inspection and remote control of energy networks or other structures; remote monitoring and remote control centre equipment for the collection and processing of information in centralised technical management systems; computer programs recorded on all data media, and associated software, applications; single-phase or multi-phase gas insulation high voltage electrical current transport line; single-phase or multi-phase DC or AC electrical current transport line; application software for the management of electrical

network inspection and monitoring systems; microprocessor-based automation system intended for the inspection and remote control of electrical energy distribution panels; status monitoring system for electrical equipment, namely main switches, isolating switches and contactors; medium and high output electrical transformers for electrical energy production, transport and distribution; high voltage to low voltage transformers for mains electrical power supply; prefabricated medium and high voltage energy distribution and transport stations; all included in Class 9.
