

香港特別行政區政府知識產權署商標註冊處
Trade Marks Registry, Intellectual Property Department
The Government of the Hong Kong Special Administrative Region

接納註冊 (全文本)

商標註冊處處長已根據《商標條例》(第 559 章)第 42 條, 接納下列商標的註冊申請。現根據《商標條例》第 43 條及《商標規則》(第 559 章附屬法例)第 15 條, 公布申請的詳情。

根據《商標條例》第 44 條及《商標規則》第 16 條, 任何人擬就下列商標的註冊提出反對, 須在本公告公布日期起計的三個月內, 採用表格第 T6 號提交反對通知。(例如, 若果公布日期為 2003 年 4 月 4 日, 則該三個月的後一日為 2003 年 7 月 3 日。)反對通知須載有反對理由的陳述及《商標規則》第 16(2)條所提述的事宜。反對人須在提交反對通知的同時, 將該通知的副本送交有關申請人。

有關商標註冊處處長根據商標條例(第 43 章)第 13 條/商標條例(第 559 章)附表 5 第 10 條所接納的註冊申請, 請到 <http://www.gld.gov.hk/cgi-bin/gld/egazette/index.cgi?lang=c&agree=0> 檢視電子憲報。

ACCEPTANCE FOR REGISTRATION (FULL VERSION)

The Registrar of Trade Marks has accepted the following trade marks for registration under section 42 of the Trade Marks Ordinance (Cap. 559). Under section 43 of the Trade Marks Ordinance and rule 15 of the Trade Marks Rules (Cap. 559 sub. leg.), the particulars of the applications are published.

Under section 44 of the Trade Marks Ordinance and rule 16 of the Trade Marks Rules, any person who wishes to oppose the registration of any of these marks shall, within the 3-month period beginning on the date of this publication, file a notice of opposition on Form T6. (For example, if the publication date is 4 April 2003, the last day of the 3-month period is 3 July 2003.) The notice of opposition shall include a statement of the grounds of opposition and the matters referred to in rule 16(2). The opponent shall, at the same time as he files the notice of opposition, send a copy of it to the applicant of the application in question.

For applications for registration accepted by the Registrar of Trade Marks under section 13 of the Trade Marks Ordinance (Cap. 43)/section 10 of Schedule 5 to the Trade Marks Ordinance (Cap. 559), please view e-gazette at <http://www.gld.gov.hk/cgi-bin/gld/egazette/index.cgi?lang=c&agree=0>.

1, 9, 11, 21, 37, 38, 39, 40, 43

[511] 貨品 / 服務說明 :
Specification:

類別 1:

用於工業、科學、攝影、農業、園藝、森林的化學品，未加工人造成樹脂，未加工塑料物質，肥料，滅火用合成物，淬火和金屬焊接用製劑，保存食用化學品，鞣料；工業用固態氣體；液體二氧化硫；碳；工業矽；硝酸；工業用氨；氫氧化鈉；矽酸鹽；碳水化合物；工業用三氯甲烷；二氯甲烷；科學用放射性元素；凍劑；過濾材料；離子交換劑；生物化學催化劑；顯影劑；未加工合成樹脂；土壤調節製劑；滅火混合劑；金屬回火劑；焊接用化學品；食品防腐用化學品；鞣料（鞣革劑）；工業用粘合劑；紙漿。

類別 9:

科學、航海、測量、攝影、電影、光學、衡具、量具、信號、檢驗（監督）、救護（營救）和教學用具及儀器，處理、開關、傳送、積累、調節或控制電的儀器和器具，錄製、通訊、重放聲音和形像的器具，磁性數據載體，錄音盤，光碟，DVD 盤和其他數字存儲媒介；投幣啟動裝置的機械結構，收銀機，計算機器，數據處理裝置，計算機；計算機軟件；滅火器械；可攜式電腦；電腦鍵盤；掃描器（資料處理設備）；電子字典；與電腦聯用的印表機；傳真機；手提無線電話機；電視機；攝

像機；DVD 播放機；積體電路；電子晶片；半導體器件；電池；電池充電器。

類別 11:

照明、加溫、蒸汽、烹調、冷藏、乾燥、通風、供水以及衛生設備裝置；電燈泡；照明用發光管；日光燈；水果烘烤器；可攜式烤肉架；烘蛋奶餅的電鐵模；煤氣熱水器；電熱水器；冷凍機；牛奶冷凍裝置；製霜淇淋機；水龍頭；壓力水箱；水管調製開關；抽水馬桶；衛生間用手乾燥器；淋浴器；坐浴浴盆；電動暖足器；電熱毯；電熱窗簾。

類別 21:

家庭或廚房用具及容器，梳子及海棉，刷子（畫筆除外），製刷材料，清掃用具，鋼絲絨，未加工或半加工玻璃（建築用玻璃除外）；不屬別類的玻璃器皿、瓷器及陶器；餐具；成套烹飪鍋；蒸籠；陶瓷或玻璃器皿；陶器、瓷器；瓷器裝飾品；飲用器皿；毛巾架；梳子；電動牙刷；牙籤；化妝品清潔用具；食品保溫容器；清掃器；鋼化玻璃；室內水族池；捕鼠器。

類別 37:

房屋建築；修理；安裝服務；建築施工監督；商品房建造；建築；水下建築；採礦；車輛保養和修理；飛機保養與修理；造船；照相器材修理；鐘錶修理；保險櫃的保養和修理；防銹；輪胎硫化處理；傢俱保養；服裝翻新；消毒；電梯安裝、修理；電話安裝和修理；火警器的安裝和修理。

類別 38:

電訊；無線電廣播；電視播放；電視廣播；有線電視播放；電腦終端通訊；電腦輔助資訊與圖像傳輸；電子信件；電訊資訊；提供與全球電腦網路的電訊連接服務；遠端會議服務；提供全球電腦網路使用者接入服務；語音郵件服務。

類別 39:

運輸；商品貯藏；貨物發運；商品包裝；船運貨物；汽車運輸；空中運輸；汽車出租；貨物貯藏；集裝箱出租；潛水鐘出租；能源分配；給水；操作運河船閘；快遞；旅遊安排；管道運輸。

類別 40:

材料處理；定做材料裝配；金屬電鍍；鐳射切割；染色；木器製作；紙張處理；光學玻璃研磨；燒製陶器；食物冷凍；剝製加工；服裝製作；圖樣印刷；廢物和垃圾回收；廢物處理；廢

物和垃圾的焚化；淨化有害材料；廢物和可再回收材料的分類；空氣淨化；空氣除臭；空氣清新；空調設備出租；空間供暖設備出租；水淨化；能源生產。

類別 43:

提供食物和飲料服務；臨時住宿；住所；飯店；臨時住宿處出租；旅遊房屋出租；養老院；日間托兒所；為動物提供食宿；出租椅子、桌子等辦公用具。

[511] 貨品 / 服務說明 :
Specification: Class 1:
Chemical products, preparations and substances for use in science and industry; papers (chemically treated or containing chemicals); test papers; sensitized papers; indicator papers; silica (chemically treated); cellulose powders; chemically treated cellulose; ion-exchange materials (chemical preparation); buffer solutions; all for filtration, separation, analysis and testing in laboratories, industry, environmental and medical testing and research; biochemicals, chemicals and chemical products for laboratory, scientific and medical research, biological processing and the production of pharmaceuticals, namely, buffers for cell cultures and chromatography, cell growth media and sera, proteins and amino acids, media components, namely, amino acids, sera, chemical and biochemical additives, nutritional media for maintenance and growth of cells in culture, namely, classical, sera-free, chemically-defined and stem-cell media, growth media, reagents, buffers for cell cultures and chromatography, and distilled water; deionized water for laboratory, scientific and medical research; biological reagents to maintain embryonic stem cells and/or embryos in in vitro culture for in vitro scientific and medical research use; cell culture reagents for scientific research, medical research, and the production of pharmaceuticals; purified water for scientific research, medical research, and the production of pharmaceuticals, namely, water for injection; eukaryotic cell nutrition media and sera (not for medical purpose); cell culture media for scientific, laboratory and research use; chemical nucleation preparations for scientific use; chemical preparations for industrial and scientific purposes; chemical preparations for use in chromatography; chemical products and preparations for life science purposes; chemical products for in vitro use in analytical tests and in analytical processes; chemical products for in vitro use in biochemical separation; chemical

products for separation of molecules for industrial and scientific use; chemical products for use in centrifugal processes in biological and biochemical research and clinical investigations into cells, viruses and sub-cellular particles; silicon coated silica colloids; chemical products for use in biological and biochemical research; chemical products for in vitro use in research and in biochemistry; chemical products for use in gel filtration and in the separation of biomolecules; chemical substances for in vitro laboratory use; chemical products and substances, all for in vitro research and biotechnological purposes; none of the aforementioned goods for use in agriculture, horticulture and forestry; chemical products for use with medical science; chemical products for laboratory use for in vitro analysis and/or testing; chemical products, namely reagents, density gradient media, cell growth media, biochemicals, enzymes and proteins for scientific, laboratory in vitro research, analysis and/or testing, biochemical research use; chemical products, namely, silica based density centrifugation media, to be used in biochemical and clinical research; chemical reagents and substances for analyses (other than for medical or veterinary purposes); chemical reagents, chemicals, biochemicals, proteins and cells for scientific, laboratory in vitro analysis and/or testing and medical research use; chemical products, namely, density centrifugation media, to be used in biochemical and clinical research; chemical solutions and preparations consisting of pre-mixed reactants and reagents for scientific and research use in connection with amplification, analysis or labelling of nucleic acids; chemicals and chemical products for purification purposes; premade buffer concentrates for purification of proteins; chemicals and chemical reagents and preparations for scientific purposes, namely for use in the amplification, analysis or labelling of nucleic acids; enzymes; chemicals and chemical reagents for protein and proteome analysis; biochemical and biological preparations for use in industry, science and research; radioactive elements, isotopes, preparations and reagents for industrial, research and scientific purposes; gases and gas mixtures for industrial, research and scientific purposes; chemical kits comprising a lysis buffer and an enzyme for use in the

generation of DNA for sequencing or cloning, and restriction analysis from plaques, bacterial colonies or bacterial cultures; chemical reagents and preparations, all for use in assays and all for the identification, determination or for the qualitative or quantitative analyses of substances or of fluids; chemical substances for use in performing analyses; preparations for diagnosis for scientific or research purposes; dyes for scientific or research purposes; fluorescent dyes for labelling nucleotides and proteins; fluorescent labels for nucleotides and proteins (fluorescent chemicals); chemicals, chemical reagents and preparations for use in the purification or selective recovery of particular components from a mixture; chemicals, chemical reagents and preparations for use in the purification or selective recovery of oligonucleotides, proteins, PCR or DNA products from a mixture using spin-column chromatography; sorbents, elution solvents and buffer solutions; chemicals, chemical reagents, radioactive elements and preparations for use in fluorometric assays and radioactive assays; fluorescent reagents; scintillants (photographic chemicals); films and photosensitive materials, papers and plates; films for use in autoradiography, fluorography or light detection techniques; sensitised films and chemical preparations and reagents for use therewith; film emulsions, developers, fixers and sensitisers; fixing baths; radioactive and non-radioactive preparations for scientific or research purposes; chemical reagents, preparations and gels for use in electrophoresis; protein preparations; protein molecular weight markers (in the nature of protein) for use in measuring molecule sizes and concentrations for in vitro scientific and research use; non-radioactive chemical reagents and preparations for use in the labeling and detection of immobilized nucleic acids and proteins; chemicals for chromatography media; chemical products for use in separation and purification; chemicals that facilitate the separation of mixtures of organic or biological materials; chromatography chemicals; chemicals for scientific use, namely beads as microcarriers; chemicals for use in industry and science, namely high molecular substances for use as molecular sieve and ion exchange substances; chemicals used in industry, science and photography, as well as in agriculture,

horticulture and forestry; in particular scientific, medical, biological, laboratory and forensic chemicals, in the form of substances, fluids, solutions, applied to media or not and media and matrices, for collection, transport, archiving, and analysis of collected samples and specimens; chemicals used in industry, science and photography, as well as in agriculture, horticulture and forestry; unprocessed artificial resins, unprocessed plastics in the form of powder, liquids or pulp; manures; fire extinguishing compositions; tempering and soldering preparations; chemical substances for preserving foodstuffs; tanning substances; adhesives used in industry; kits and reagents for analysis or diagnosis used for scientific purposes, namely kits consisting of a packed column of chemical solids that function to facilitate the separation of mixtures of organic or biological materials based on their differing molecular weights or structures for use in the purification of Glutathione S-transferase-tagged recombinant proteins; prepared microtitre plates containing chromatographic substances; chemicals, namely agarose for use in the purification of proteins for in vitro use; chemicals, namely, polymers for use in the purification of DNA from small molecules by gel filtration and for the fractionation of lipids, hormones, vitamins and other small biomolecules; chromatography chemicals and media; chromatography media for purification of monoclonal antibodies; high molecular chemical substances for research and industrial purposes, namely microcarriers for growth of primary mammalian cells, diploid cell strains from animals or humans and established cell lines; laboratory reagents, namely proteins for binding and detecting antibodies and chromatography packings and chromatography columns for purifying biological molecules; laboratory reagents, namely, silica beads for scientific and research; nutrients for cultured animal cells and media for growing animal cells in a cell culture for scientific and laboratory use; polymers being chemical compounds for industrial use in the purification of chemical substances; process chromatography media for large scale purification of monoclonal antibodies; reagent kits for DNA and RNA sequencing for use in genomic research; reagents for use with quantitative cell pharmacology profiling instrument systems for scientific and research

use; sample preparations of nucleic acids using silica-based membranes; scientific, biological, laboratory and forensic chemicals, in the form of substances, fluids and solutions; all for the collection, transportation, storage and analysis of samples and specimens; serum for use as a supplement with cell culture media used to grow cells in scientific and laboratory research; resins designed and used in biopharmaceutical manufacturing; process chromatography membranes (chemical products) used in biopharmaceutical manufacturing; genomic and diagnostic chemical and biological products designed and used for extraction, isolation, cloning or amplification of nucleic acids (DNA, RNA, mRNA) in molecular biology research for analytical or preparative purposes; assays for research purposes; nucleic acid and protein transfer media, particularly for laboratory and clinical use; laboratory and forensic media, namely, supporting composite material in the form of, tissue culture media for collection, transport, archiving, and analysis of collected samples and specimens.

Class 5:

Sterilizing preparations; filtering preparations, materials and media for pharmaceutical, medical and sanitary purposes; air purifying preparations; filter capsules for pharmaceutical and medical purposes; diagnostic preparations for medical purposes, diagnostic test kits for medical purposes; filters for the treatment, separation, or decontamination of gas, air or liquids for medical purposes; chemical reagents for medical purposes; bacterial and biological preparations and cultures for medical use; cellulose for pharmaceutical purposes; chemico-pharmaceutical preparations; chemical nucleation preparations for medical use; chemical reagents and substances for analysis for medical and veterinary purposes, excluding clinical medical diagnostic products and services; diagnostic agents, products and preparations for clinical or medical purposes; diagnostic agents, products and preparations for use in the amplification, analysis or labelling of nucleic acids; pharmaceutical and veterinary preparations, medicines and substances; contrast media for medical imaging; diagnostic scanning agents for in vivo use; radio-pharmaceutical products; radioactive sources and standards for use in nuclear medicine; chemicals, in the form of

substances, fluids or solutions, applied to media, or not and media for medical and diagnostic purposes, including chemicals, media and matrices for collection, transport, archiving, and analysis of collected samples and specimens; nutrients for cultured animal cells and media for growing animal cells in a cell culture for growing animal cells to produce biological materials for medical therapeutic or clinical diagnostic use; medical and pharmaceutical chemicals in the form of substances, fluids and solutions; all for the collection, transportation, storage and analysis of samples and specimens; cell culture media, reagents and buffers used ex-vivo for the further manufacturing of cell and gene therapies; nutrients for micro organisms, reagents for medical and veterinary purposes, serums; chemical nucleation preparations for medical use, namely for maintaining cell viability following freezing and thawing; chemically treated paper for collection, isolation, and storage of biological samples for diagnostic, clinical and medical use; diagnostic preparations, namely, polystyrene microspheres for clinical or medical laboratory use; nutrients for cultured animal cells and media for growing animal cells in a cell culture for growing animal cells to produce biological materials for medical therapeutic or clinical diagnostic use; cell culture products (for medical purpose); cell culture media and serum designed and used for the growth and expansion of cells (for medical purpose).

Class 7:

Heat sealing machines for sealing plastic tubes that are used in the laboratory, pharmaceutical, medical and biomedical fields; pharmaceutical processing industrial machine (bioreactor used for the production of biological material for medical treatment or clinical diagnosis); pharmaceutical processing industrial machine (mixer used for the production of biological material for medical treatment or clinical diagnosis); pharmacy machines for separating and sorting pills and their components; Precision positioning equipment, namely, mechanical actuators, screw actuators, electrical motors; hydrodynamic cleaning apparatus for cleaning particulate matter from industrial substrates; filtration units; filter tubes and cartridges for machines; gas generators (machines); apparatus for chemical separation (machines); electrochemical gas compressors (machines);

membranes for gas separation machines; filters for chemical processing machines; apparatus for use in chemical and mechanical purification and separation (machines); agitating machines (for chemical processing); mixing or blending machines (for chemical processing) and other chemical processing machines and apparatus; chemical processing machines and apparatus for use in handling large scale bioprocess chemicals, and parts and fittings for the aforesaid goods; computerized mixing system comprising of pump station, control panel, tubing, mixing implement of media for bioprocess; parts and fittings of the aforesaid goods; pipeworks for chemical processing machines and apparatus; machines and instruments for synthesizing deoxyribonucleic acid for preparations.

Class 9:

Chromatography columns; storage containers, mainly metal, glass or high polymer materials for use in laboratories; chromatographic and electrophoretic devices for science and technical goals, as well as accessories, including racks, stands, fittings, tanks pressure; laboratory equipment; laboratory filters, namely filters surface, depth filters, strainers, including membranes and filters of hyperfiltration membranes in layers, fabrics and porous masses, such as sheet, tapes, rolls, round filters, filter sleeve, pleated filters and folding of paper, high polymer materials, organic fibers, inorganic, synthetic and/or natural material sintered and/or metallic materials; separation apparatus, namely filtering apparatus for science; laboratory, pilot plant and production equipment, namely, bioreactors, electronic controllers for use with bioreactors and bag assemblies in the nature of fluid handling bags and bag manifold systems comprising a plurality of bags connected together with associated tubing, connectors and fittings, filters, ports, liners, chambers, capsules, filter holders, sensors, mixing impellers, tank dispensers and pumps all specifically adapted for use with bioreactors, sold separately and in combination, for use in mixing animal cells suspended in cell culture media and for controlling the temperature, pH and other conditions of the suspension, for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory, pilot plant and production equipment, namely, mixers, electronic

controllers for use with mixers and bag assemblies in the nature of fluid handling bags and bag manifold systems comprising a plurality of bags connected together with associated tubing, connectors and fittings, filters, ports, liners, chambers, capsules, filter holders, sensors, mixing impellers, tank dispensers and pumps for use with mixers, sold separately and in combination, for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory, biological pilot plant and biological production equipment for use in pharmaceutical and biological product laboratories and testing facilities, namely, plastic bags for use in holding biological material and related reagents for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory equipment, namely, liners of plastic for tanks used in holding biological material and related reagents; laboratory apparatus for freezing and thawing in clean room environments or in cryopreservation; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory assets and data; laboratory apparatus and instruments, namely, pre-packed columns for use in chromatography; cell processing laboratory apparatus and instruments with integrated computer software used to analyze, harvest, culture, process, expand and purify cells; parts and accessories for use with such laboratory apparatus and instruments, namely pre-filled plastic cassettes, trays, cell culture bags, tubing and filters; laboratory apparatus and instruments for use in science, research and industry; measuring apparatus and instruments; radiological apparatus and instruments for industrial purposes; computers and printers, and software and programmes for use therewith; glassware for laboratory use; and parts and fittings for the aforesaid goods; chemistry apparatus and instruments; liquid chromatography apparatus for scientific use; apparatus for use in separation and purification for scientific use; laboratory and research equipment, consisting of empty and pre-packed columns of chemical solids for use in purification; apparatuses of molecular biology, namely filter membranes and membranes of transfer, in particular, immobilizing membranes to detect nucleic acids and proteins; chromatography apparatus for laboratory use; chromatography systems;

apparatus and instruments for use in chromatography; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory assets and data; computer software for use in image analysis; imaging apparatus and instruments, namely a charge coupled device (CCD) camera for capturing images for analysis and use in the life science research field; computer software for use on laboratory systems in the life sciences industry; downloadable computer software, namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; freezing apparatus for scientific research and laboratory purposes; modular biologics manufacturing system (laboratory apparatus) used for growing, purifying, concentrating, isolating and packaging biological materials in chemical, biotechnological and pharmaceutical processes, consisting of a bioreactor used to grow cell cultures and fermentations, a mechanical mixing machine for agitating biological media, a filler machine used for packaging pharmaceutical products, a separation machine used for isolating, purifying and concentrating biological materials, and connecting computer hardware and software, substantially all within a plastic or metal enclosure; pre-packed columns for use in purification (laboratory apparatus); supported and unsupported nitrocellulose microporous membranes for the media transfer and immobilisation of nucleic acids and proteins; thawing apparatus for scientific research and laboratory purposes; laboratory equipment namely, chromatographic columns, gas, water and other liquid or fluid filtering units, in the nature of tubes, cartridges, membrane filters and integral hardware therefor; extraction thimbles, and programmable electronically controlled hot plate/stirrers for laboratory use; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory equipment and data; laboratory apparatus and instruments for use in science, research and industry, namely, purification columns, electrophoresis apparatus not for medical purposes and western blotting systems comprised of computer hardware, software and scanners all used for qualitative and

quantitative analysis of proteins; computers, printers, and software and programs all for use with running experiments on purification, electrophoresis and western blotting apparatus, namely, computers, printers, software and programs for screening, analyzing and evaluating proteins, and structural parts and fittings for the aforesaid apparatus; scientific apparatus and instruments used for radiology for the purpose of measuring, monitoring and surveying; computers, printers and software programs used for the purpose of life science research and for nuclear cardiology and medical imaging, for use by laboratories, pharmacies, doctors, hospitals, and medical service providers; radiology apparatus and instruments for the reading and interpretation of autoradiographs and films, namely automated film readers and scanners; apparatus for electrophoresis; chromatography columns and pumps; apparatus for microfabrication; apparatus for scintillation; imaging apparatus for radioactive and luminescent emissions; synthesis and purification integrated systems for use in radiology; apparatus for manufacturing oligonucleotides; apparatus for microarrays; microarray slides; laboratory glassware; laboratory vials and microvials; microtitre plates; and parts and fittings for the aforesaid goods; kit consisting primarily of pre-packed columns, chemicals, pre-made buffer concentrates, syringes and instructional manual for the purification of proteins for in vitro use; nucleic acid purification filters; laboratory equipment, mainly materials, liquids and consumables for scientific purposes that are disposable in nature and can not be repurposed after initial use, namely, syringe filters, chromatography columns, chromatography resin, microscope lens paper, vent filter, DNA columns for separation purposes, RNA columns for separation purposes, PCR reagents, gradient media; noise reduction capture mode in the image acquisition control downloadable and recorded software offered as a part of a charge coupled device (CCD) camera system that is used for capturing images of protein gels and western blots for analysis in the life science research field; analyzers for research and scientific laboratories for automatically measuring and investigating the interactions of biomolecules in terms of strength, speed and specificity, including defining parameters such as kinetic constants, concentrations, binding patterns and multi-

component complex formation; chromatography columns, namely, process scale columns for use with high resolution separation media in research and in the production of pharmaceuticals; computer software and hardware for controlling automated liquid handling systems, namely chromatography systems, filtration systems, bio reactors and oligonucleotide synthesizers; computer software for differential analysis in electrophoresis and other proteomics applications; computer software for graphing and charting data from chromatography systems for the purification of proteins for use by biotechnology scientists and researchers in the life science field; computer software for microscopy, imaging, and informatics sold exclusively through direct sales; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory equipment and data; computer software for use in image analysis; cross flow filtration and separation system comprising flow manifold, microporous membranes, product reservoir, pump, valves, gauges and piping for the separation and concentration of biological solutions in the biopharmaceutical and biotechnology fields; devices for enabling controlled loading of samples in chromatography columns, namely, valved glass tubes and injectors; disposable plastic bioreactors for cell culturing; downloadable computer software, namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; electrical and scientific apparatus - namely automated DNA optical scanning equipment; electrical and scientific apparatus, namely, microscopes and high accuracy electro-mechanical actuators; automated microscopy systems comprising microscopes and computer hardware and software for high content imaging of microtiter plates, microscope slides and biological samples; electromechanical hardware and software systems comprising computers, computer software, electromechanical positioners for micropositioning control, for use in the field of photonics, digital flow control, semiconductor test and inspection, and microscopy and optical scanners and scanning systems for lasers; computer software for microscopy, imaging, and informatics in the

field of clinical and diagnostic testing; electromechanical hardware and software systems comprising computers, computer software, electromechanical positioners for use in the inspecting and analysis of biological samples; electric actuators, namely, high precision electric computer controlled devices for adjusting laser frequency of tunable lasers; electromechanical valve actuators, namely, high precision electric computer controlled valves for use in high precision flow applications; precision positioning systems comprised of optical indexers, namely, an optical train with a camera comprised of an objective lens, a shutter and a filter wheel that enables image data to be digitized, microscopy stages, electronic control circuitry, motion control chassis, linear actuators, screw actuators, linear slider, electric motors, and tunable lasers for use in precision positioning in the fields of photonics, biomedical imaging, fluidics, mass flow valves, life sciences, and semiconductor manufacturing; precision positioning systems comprised of optical indexers, namely, an optical train with a camera comprised of an objective lens, a shutter and a filter wheel that enables image data to be digitized, microscopy stages, electronic control circuitry, motion control chassis, linear actuators, screw actuators, linear slider, electric motors, and tunable lasers for use in precision positioning in the field of clinical diagnostics; electrical and scientific apparatus, namely, optical imaging apparatus; electrical units used in electrophoresis formed of an electrode assembly, clamping frame and tank; laboratory apparatus and equipment for biological and life sciences research, namely, electrophoresis apparatus, mass spectrometry equipment namely a separation unit, a power supply/control unit, gel cassettes, cassette rack, circulation pump, glass plates, separator and filler sheets, cassette and buffer removal tools; laser imaging apparatus, namely an imagesetter for the production of photographic images in life sciences; filters and microporous membranes, holders, housings and supports therefor, none being made of metal, all being laboratory apparatus; units for filtration and separation purposes, and parts thereof; all for diagnostic, scientific or laboratory use; filters and separators for scientific and laboratory use sold with or without supports for scientific and laboratory

use; filters and separators (laboratory apparatus); holders, housings and supports, all for use with the aforesaid filters or separators; filtering units; parts and fitting for all the aforesaid goods, all for scientific and laboratory use; filters for rapid laboratory concentration and/or diafiltration of critical biological solutions; filters for use in laboratory equipment in the biopharmaceutical industry; computer software for controlling chromatography processes and other liquid handling modules; freezing apparatus for scientific research and laboratory purposes, namely, laboratory controlled rate freezers for cryogenic preservation; hybridization transfer membranes for non-medical scientific and research use; kit consisting primarily of chromatography laboratory equipment, namely, prepacked chromatography columns, chemicals, premade buffer concentrates, disposable reusable dispenser syringes for laboratory use for purification of proteins for in vitro use; kits consisting primarily of prepacked chromatography columns and disposable reusable dispenser syringes for laboratory use for protein purification purposes; apparatus and instruments for protein purification purposes, namely, prepacked chromatography columns; laboratory equipment, namely disposable plastic syringe filters; laboratory equipment, namely filters, syringe filters, disposable filter units and disposable syringe filters; laboratory and research equipment consisting of a packed column of chemical solids that function to facilitate the separation of mixtures of organic or biological materials based upon their differing molecular weights or structures; laboratory and sample preparation products, namely, filters, filter-barrels, vials, caps and vial stands; laboratory apparatus and instruments, namely, pre-packed columns for use in chemical synthesis; laboratory apparatus and instruments, namely, pre-packed columns for use in separation and purification; laboratory apparatus, namely handheld devices containing a card for the processing of buccal cells; laboratory apparatus, namely, a syringeless filter; laboratory apparatus, namely, membrane filter cartridges for the separation of biomolecules in biopharmaceutical production; laboratory columns for use in chemical synthesis; laboratory equipment and accessories used in electrophoretic processes; laboratory equipment, namely, disposable

column and buffers for small volume purification of monoclonal antibodies; laboratory filtration systems, consisting of filter cartridge, manifold, pump, back pressure valve, pressure gauges and holding tanks, for use in separation of biological components and membrane separation; laboratory instrument used in the electrophoresis field, namely, an isoelectric focusing instrument; liquid chromatography apparatus and chromatography systems comprised of monitors, motor valves, series pumps, fraction collectors, autosampler, a working platform, pre-programmed method templates and analysis software for use with liquid chromatography apparatus and chromatography systems; scientific and laboratory apparatus and chromatography systems for use in purification, consisting of filters, columns, mixing chambers, holders, pumps, cables, tubing kits; and the parts thereof; liquid chromatography analyzers; liquid chromatography apparatus of scientific use; membrane filter cartridges for the separation of biomolecules in biopharmaceutical production (laboratory apparatus); microtiter plates having chemical chromatographic resin for small scale purification of tagged recombinant proteins; multi-purpose fluorescent sample readers and scanners for analysis of gels, blot arrays and microplates; nucleic acid and protein transfer and immobilization media, for laboratory use, namely supported or reinforced nitrocellulose microporous filters; laboratory equipment - namely, peristaltic pumps, fraction collectors, column monitors, isoelectric focusing units, electrophoresis units, cell culture units and laboratory centrifuges; software and hardware for analyzing data and automating processes related to biomanufacturing equipment; fermenters; separating funnels (laboratory glassware); soxhlet extraction thimbles made from organic or inorganic fibre and filter for laboratory use; membrane filters for laboratory use; filter supports for single use as laboratory apparatus.

Class 10:

Medical machines, namely, medical apparatus specially adapted for freezing and thawing cell therapy samples for medical purposes; medical instruments with integrated computer software used to analyze, harvest, culture, process, expand and purify cells; parts and accessories for use with such medical

instruments namely, pre-filled plastic cassettes, trays, cell culture bags, tubing and filters all for use therewith all for medical or clinical use; apparatus and equipment for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; disposable containers for the collection and preservation and transport of blood; apparatus for the temperature-controlled mixing of additives with biological samples such as blood and cellular material; kits comprising disposable bags for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; bags, pouches and boxes for collecting and preserving biological samples such as blood and cellular material; devices, namely tubing, valves, clips, pipe clamps, caps, brooches, clamps and accessories being part of or forming accessories for medical apparatus for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; any of these devices being part of or forming accessories for medical apparatus for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; apparatus for warming, cooling, cryoprotectant solution addition and mixing biological material such as cells, umbilical cord blood, bone marrow, peripheral blood, blood constituent, or any other blood-like material in order to cryoprepare or thaw biological products; medical apparatus accessories, namely, disposable sets of interconnected medical containers and interconnectable medical containers for use in collecting, treating, analyzing and preserving biological samples such as blood and cellular material; medical apparatus accessories, namely, tubing, taps, clamps, stoppers and plugs, for interconnecting of and/or for fitting onto the aforementioned disposable sets of interconnectable medical containers and pouches for collecting and preserving biological samples such as blood and cellular material; freezing apparatus for medical purposes, namely, medical apparatus for controlled rate freezing cell therapy samples; medical apparatus, namely handheld devices containing a foam swab for obtaining buccal cells; thawing apparatus for medical purposes; filter membranes, pharmaceutical grade aqueous filters, sterile vent filters, filters for use in blood and plasma separation, inline gas or

air filters used in respiratory filtration, filter capsules, molecular sieves, IV filters, encapsulated filter devices, pre-filters, multi layer filters, disposable filtration capsules, microporous membranes, hydrophilic membranes, hydrophobic membranes, hydrophobic filters, glass microfibre filters, filter cartridges, pleated filter cartridges, radiation sterilizable filtering materials, microaggregate transfusion filters, filter housings; tubing sets for insufflation; ribbed or non-ribbed tubing; drain assemblies (tubing); connectors for filters and tubing, luer locks, barbs, sealing rings, clamps; clinical equipment, namely disposable plastic syringe filters; filters for use in apparatus for blood plasma separation; clinical equipment, namely filters, syringe filters, disposable filter units and disposable syringe filters; all the aforesaid for medical, dental, veterinary purposes.

Class 11:

Filters, filter holders, filter valves, filter support screens, filter media and filter membranes for use in separating solid particles from liquid or gas, for commercial and industrial use; liquid chromatography apparatus for industrial use; apparatus for use in separation and purification for industrial purposes; columns for use in industrial chromatography procedures; cooling installations and machines; cooling installations for deep freezing; cooling installations for refrigerating; cooling installations for freezing; chromatography columns (for industrial purpose); media for chromatography columns for industrial purposes; parts of the aforesaid goods in this class; membrane filters for industrial use; biomolecule purification filtration apparatus for industrial use; filters for technical purposes, namely surface filters, depth filters, strainers, including membrane filters and hyperfiltration membranes in layers, fabrics and porous masses, such as sheets, strips, rods, filters, round socket filters, pleated filters and folding paper, high polymer materials, organic fibers, inorganic, synthetic and/or natural material sintered and/or metallic materials separation apparatus, namely apparatus for filtering for military purposes (e.g. equipment for the preparation of emergency water for basic equipment) and for technical purposes; apparatus for reverse osmosis; electrically operated combined cooling circulator and

thermostatic bath for use in heating and cooling liquids; apparatus for lighting, heating, steam generating, refrigerating, drying, ventilating, water supply and sanitary purposes; electrochemical gas generators and separators.

Class 16:

Phase separating paper; chromatography paper, polyethylene-backed absorbent paper, and filter paper; lens cleaning tissue paper; bags and liners of plastic for use in holding biological material and related reagents; creped wood pulp paper filter that is acid and alkali resistant for laboratory and industrial purposes; filter paper; glass microfiber filter papers; polyethylene-backed absorbent paper for use as a protective cover for laboratory work surfaces, as an absorbent liner for animal cages, as a liner for humidity chambers; marketing, scientific and instructional material; instruction manuals; printed matter relating to purification in life sciences.

Class 37:

Repair/maintenance and installation services; servicing of scientific apparatus and instruments; advisory services relating to the aforesaid; building, constructing and installing bioprocessing and biomanufacturing facilities for the life sciences industry; repair, installation, modification or maintenance of scientific apparatus and instruments for use in the life science field.

Class 41:

Training relating to the use, calibration, re-calibration and servicing of scientific apparatus and instruments; training and education services in relation to scientific apparatus, instruments and associated software used in the life science field; customer training and educational courses in the fields of chemicals, pharmaceuticals, biotechnologicals, biochemical, life science and bioprocess equipment.

Class 42:

Software as a service (SaaS) services featuring software for remote monitoring, managing, controlling, and securing of clinical, medical and laboratory equipment and data; laboratory and scientific research services in the field of cryochain technology, namely, cryogenics and cryopreservation technology; design and development services for the creation of bioprocessing and biomanufacturing facilities for the life sciences industry; consultation in the

chemical, pharmaceutical, biotechnological and biochemical fields; manufacturing execution system (MES) for the pharma and biotechnology industries, delivered as software as a service; software as a service featuring software for managing pharmaceutical and biopharmaceutical manufacturing processes; medical diagnostic, scientific research, image analysis and scientific laboratory services in the fields of biology, oncology, neurology, infectious disease, immunology and cell culture; scientific laboratory services; laboratory services, namely, stabilization of assays and reagents; software as a service (SaaS) services featuring software for customization and optimization of bioprocessing and biomanufacturing platforms for the production of biopharmaceuticals; providing an online portal featuring information on bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; scientific consulting services in the life sciences field; consulting services in relation to use of bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; customization of bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; software as a service (SaaS) services featuring software for remote monitoring, managing, controlling and securing of clinical, medical and laboratory equipment and data; software as a service (SaaS) services featuring software for remote monitoring, managing, controlling and securing of clinical, medical and laboratory equipment and data; providing temporary use of non-downloadable software namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; providing software installation, maintenance and repair in the fields of life science and bioprocess equipment; scientific research; technical support services, namely, troubleshooting of computer hardware and software problems; consultancy and advisory services for all of the aforementioned in the fields of life science and bioprocess equipment; contract research and process development services for bioprocess development and manufacturing in the field of biotechnology and

pharmaceuticals; platform as a service featuring computer software platforms for use in optimization of life sciences and biomanufacturing processes; software as a service services featuring software for use in optimization of life sciences and biomanufacturing processes; cloud computing featuring software for use in optimization of life sciences and biomanufacturing processes.

Class 44:

Services for collecting, treating, analyzing and preserving biological samples such as blood and cellular material, namely, collection and preservation of human blood and other cellular material for medical purposes including medical testing and for preservation of the collected blood or other cellular materials in view of later testing, analysis or use; medical or paramedical services for the collection, processing, analysis and preservation of biological samples such as blood and cellular products; blood bank services; consultancy in the field of blood transfusion technology; clinical services in connection with treatment based on blood components, and the saving and recovery of surgical blood; medical services in association with cryochain technology.

Specification:
- Class 1:
Chemical products, preparations and substances for use in science and industry; papers (chemically treated or containing chemicals); test papers; sensitized papers; indicator papers; silica (chemically treated); cellulose powders; chemically treated cellulose; ion-exchange materials (chemical preparation); buffer solutions; all for filtration, separation, analysis and testing in laboratories, industry, environmental and medical testing and research; biochemicals, chemicals and chemical products for laboratory, scientific and medical research, biological processing and the production of pharmaceuticals, namely, buffers for cell cultures and chromatography, cell growth media and sera, proteins and amino acids, media components, namely, amino acids, sera, chemical and biochemical additives, nutritional media for maintenance and growth of cells in culture, namely, classical, sera-free, chemically-defined and stem-cell media, growth media, reagents, buffers for cell cultures and chromatography, and distilled water; deionized water for laboratory, scientific and medical research; biological reagents to maintain embryonic stem cells and/or embryos in in vitro culture for in vitro scientific and medical research use; cell culture reagents for scientific research, medical research, and the production of

pharmaceuticals; purified water for scientific research, medical research, and the production of pharmaceuticals, namely, water for injection; eukaryotic cell nutrition media and sera (not for medical purpose); cell culture media for scientific, laboratory and research use; chemical nucleation preparations for scientific use; chemical preparations for industrial and scientific purposes; chemical preparations for use in chromatography; chemical products and preparations for life science purposes; chemical products for in vitro use in analytical tests and in analytical processes; chemical products for in vitro use in biochemical separation; chemical products for separation of molecules for industrial and scientific use; chemical products for use in centrifugal processes in biological and biochemical research and clinical investigations into cells, viruses and sub-cellular particles; silicon coated silica colloids; chemical products for use in biological and biochemical research; chemical products for in vitro use in research and in biochemistry; chemical products for use in gel filtration and in the separation of biomolecules; chemical substances for in vitro laboratory use; chemical products and substances, all for in vitro research and biotechnological purposes; none of the aforementioned goods for use in agriculture, horticulture and forestry; chemical products for use with medical science; chemical products for laboratory use for in vitro analysis and/or testing; chemical products, namely reagents, density gradient media, cell growth media, biochemicals, enzymes and proteins for scientific, laboratory in vitro research, analysis and/or testing, biochemical research use; chemical products, namely, silica based density centrifugation media, to be used in biochemical and clinical research; chemical reagents and substances for analyses (other than for medical or veterinary purposes); chemical reagents, chemicals, biochemicals, proteins and cells for scientific, laboratory in vitro analysis and/or testing and medical research use; chemical products, namely, density centrifugation media, to be used in biochemical and clinical research; chemical solutions and preparations consisting of pre-mixed reactants and reagents for scientific and research use in connection with amplification, analysis or labelling of nucleic acids; chemicals and chemical products

for purification purposes; premade buffer concentrates for purification of proteins; chemicals and chemical reagents and preparations for scientific purposes, namely for use in the amplification, analysis or labelling of nucleic acids; enzymes; chemicals and chemical reagents for protein and proteome analysis; biochemical and biological preparations for use in industry, science and research; radioactive elements, isotopes, preparations and reagents for industrial, research and scientific purposes; gases and gas mixtures for industrial, research and scientific purposes; chemical kits comprising a lysis buffer and an enzyme for use in the generation of DNA for sequencing or cloning, and restriction analysis from plaques, bacterial colonies or bacterial cultures; chemical reagents and preparations, all for use in assays and all for the identification, determination or for the qualitative or quantitative analyses of substances or of fluids; chemical substances for use in performing analyses; preparations for diagnosis for scientific or research purposes; dyes for scientific or research purposes; fluorescent dyes for labelling nucleotides and proteins; fluorescent labels for nucleotides and proteins (fluorescent chemicals); chemicals, chemical reagents and preparations for use in the purification or selective recovery of particular components from a mixture; chemicals, chemical reagents and preparations for use in the purification or selective recovery of oligonucleotides, proteins, PCR or DNA products from a mixture using spin-column chromatography; sorbents, elution solvents and buffer solutions; chemicals, chemical reagents, radioactive elements and preparations for use in fluorometric assays and radioactive assays; fluorescent reagents; scintillants (photographic chemicals); films and photosensitive materials, papers and plates; films for use in autoradiography, fluorography or light detection techniques; sensitised films and chemical preparations and reagents for use therewith; film emulsions, developers, fixers and sensitisers; fixing baths; radioactive and non-radioactive preparations for scientific or research purposes; chemical reagents, preparations and gels for use in electrophoresis; protein preparations; protein molecular weight markers (in the nature of protein) for use in measuring molecule sizes and concentrations for in vitro scientific and

research use; non-radioactive chemical reagents and preparations for use in the labeling and detection of immobilized nucleic acids and proteins; chemicals for chromatography media; chemical products for use in separation and purification; chemicals that facilitate the separation of mixtures of organic or biological materials; chromatography chemicals; chemicals for scientific use, namely beads as microcarriers; chemicals for use in industry and science, namely high molecular substances for use as molecular sieve and ion exchange substances; chemicals used in industry, science and photography, as well as in agriculture, horticulture and forestry; in particular scientific, medical, biological, laboratory and forensic chemicals, in the form of substances, fluids, solutions, applied to media or not and media and matrices, for collection, transport, archiving, and analysis of collected samples and specimens; chemicals used in industry, science and photography, as well as in agriculture, horticulture and forestry; unprocessed artificial resins, unprocessed plastics in the form of powder, liquids or pulp; manures; fire extinguishing compositions; tempering and soldering preparations; chemical substances for preserving foodstuffs; tanning substances; adhesives used in industry; kits and reagents for analysis or diagnosis used for scientific purposes, namely kits consisting of a packed column of chemical solids that function to facilitate the separation of mixtures of organic or biological materials based on their differing molecular weights or structures for use in the purification of Glutathione S-transferase-tagged recombinant proteins; prepared microtitre plates containing chromatographic substances; chemicals, namely agarose for use in the purification of proteins for in vitro use; chemicals, namely, polymers for use in the purification of DNA from small molecules by gel filtration and for the fractionation of lipids, hormones, vitamins and other small biomolecules; chromatography chemicals and media; chromatography media for purification of monoclonal antibodies; high molecular chemical substances for research and industrial purposes, namely microcarriers for growth of primary mammalian cells, diploid cell strains from animals or humans and established cell lines; laboratory reagents, namely proteins for binding and detecting antibodies and

chromatography packings and chromatography columns for purifying biological molecules; laboratory reagents, namely, silica beads for scientific and research; nutrients for cultured animal cells and media for growing animal cells in a cell culture for scientific and laboratory use; polymers being chemical compounds for industrial use in the purification of chemical substances; process chromatography media for large scale purification of monoclonal antibodies; reagent kits for DNA and RNA sequencing for use in genomic research; reagents for use with quantitative cell pharmacology profiling instrument systems for scientific and research use; sample preparations of nucleic acids using silica-based membranes; scientific, biological, laboratory and forensic chemicals, in the form of substances, fluids and solutions; all for the collection, transportation, storage and analysis of samples and specimens; serum for use as a supplement with cell culture media used to grow cells in scientific and laboratory research; resins designed and used in biopharmaceutical manufacturing; process chromatography membranes (chemical products) used in biopharmaceutical manufacturing; genomic and diagnostic chemical and biological products designed and used for extraction, isolation, cloning or amplification of nucleic acids (DNA, RNA, mRNA) in molecular biology research for analytical or preparative purposes; assays for research purposes; nucleic acid and protein transfer media, particularly for laboratory and clinical use; laboratory and forensic media, namely, supporting composite material in the form of, tissue culture media for collection, transport, archiving, and analysis of collected samples and specimens.

Class 5:

Sterilizing preparations; filtering preparations, materials and media for pharmaceutical, medical and sanitary purposes; air purifying preparations; filter capsules for pharmaceutical and medical purposes; diagnostic preparations for medical purposes, diagnostic test kits for medical purposes; filters for the treatment, separation, or decontamination of gas, air or liquids for medical purposes; chemical reagents for medical purposes; bacterial and biological preparations and cultures for medical use; cellulose for pharmaceutical purposes; chemico-pharmaceutical preparations; chemical

nucleation preparations for medical use; chemical reagents and substances for analysis for medical and veterinary purposes, excluding clinical medical diagnostic products and services; diagnostic agents, products and preparations for clinical or medical purposes; diagnostic agents, products and preparations for use in the amplification, analysis or labelling of nucleic acids; pharmaceutical and veterinary preparations, medicines and substances; contrast media for medical imaging; diagnostic scanning agents for in vivo use; radio-pharmaceutical products; radioactive sources and standards for use in nuclear medicine; chemicals, in the form of substances, fluids or solutions, applied to media, or not and media for medical and diagnostic purposes, including chemicals, media and matrices for collection, transport, archiving, and analysis of collected samples and specimens; nutrients for cultured animal cells and media for growing animal cells in a cell culture for growing animal cells to produce biological materials for medical therapeutic or clinical diagnostic use; medical and pharmaceutical chemicals in the form of substances, fluids and solutions; all for the collection, transportation, storage and analysis of samples and specimens; cell culture media, reagents and buffers used ex-vivo for the further manufacturing of cell and gene therapies; nutrients for micro organisms, reagents for medical and veterinary purposes, serums; chemical nucleation preparations for medical use, namely for maintaining cell viability following freezing and thawing; chemically treated paper for collection, isolation, and storage of biological samples for diagnostic, clinical and medical use; diagnostic preparations, namely, polystyrene microspheres for clinical or medical laboratory use; nutrients for cultured animal cells and media for growing animal cells in a cell culture for growing animal cells to produce biological materials for medical therapeutic or clinical diagnostic use; cell culture products (for medical purpose); cell culture media and serum designed and used for the growth and expansion of cells (for medical purpose).

Class 7:

Heat sealing machines for sealing plastic tubes that are used in the laboratory, pharmaceutical, medical and biomedical fields; pharmaceutical processing industrial machine (bioreactor used for the production of

biological material for medical treatment or clinical diagnosis); pharmaceutical processing industrial machine (mixer used for the production of biological material for medical treatment or clinical diagnosis); pharmacy machines for separating and sorting pills and their components; Precision positioning equipment, namely, mechanical actuators, screw actuators, electrical motors; hydrodynamic cleaning apparatus for cleaning particulate matter from industrial substrates; filtration units; filter tubes and cartridges for machines; gas generators (machines); apparatus for chemical separation (machines); electrochemical gas compressors (machines); membranes for gas separation machines; filters for chemical processing machines; apparatus for use in chemical and mechanical purification and separation (machines); agitating machines (for chemical processing); mixing or blending machines (for chemical processing) and other chemical processing machines and apparatus; chemical processing machines and apparatus for use in handling large scale bioprocess chemicals, and parts and fittings for the aforesaid goods; computerized mixing system comprising of pump station, control panel, tubing, mixing implement of media for bioprocess; parts and fittings of the aforesaid goods; pipeworks for chemical processing machines and apparatus; machines and instruments for synthesizing deoxyribonucleic acid for preparations.

Class 9:

Chromatography columns; storage containers, mainly metal, glass or high polymer materials for use in laboratories; chromatographic and electrophoretic devices for science and technical goals, as well as accessories, including racks, stands, fittings, tanks pressure; laboratory equipment; laboratory filters, namely filters surface, depth filters, strainers, including membranes and filters of hyperfiltration membranes in layers, fabrics and porous masses, such as sheet, tapes, rolls, round filters, filter sleeve, pleated filters and folding of paper, high polymer materials, organic fibers, inorganic, synthetic and/or natural material sintered and/or metallic materials; separation apparatus, namely filtering apparatus for science; laboratory, pilot plant and production equipment, namely, bioreactors, electronic controllers for use with bioreactors and bag assemblies in the nature of fluid handling bags and bag manifold

systems comprising a plurality of bags connected together with associated tubing, connectors and fittings, filters, ports, liners, chambers, capsules, filter holders, sensors, mixing impellers, tank dispensers and pumps all specifically adapted for use with bioreactors, sold separately and in combination, for use in mixing animal cells suspended in cell culture media and for controlling the temperature, pH and other conditions of the suspension, for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory, pilot plant and production equipment, namely, mixers, electronic controllers for use with mixers and bag assemblies in the nature of fluid handling bags and bag manifold systems comprising a plurality of bags connected together with associated tubing, connectors and fittings, filters, ports, liners, chambers, capsules, filter holders, sensors, mixing impellers, tank dispensers and pumps for use with mixers, sold separately and in combination, for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory, biological pilot plant and biological production equipment for use in pharmaceutical and biological product laboratories and testing facilities, namely, plastic bags for use in holding biological material and related reagents for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory equipment, namely, liners of plastic for tanks used in holding biological material and related reagents; laboratory apparatus for freezing and thawing in clean room environments or in cryopreservation; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory assets and data; laboratory apparatus and instruments, namely, pre-packed columns for use in chromatography; cell processing laboratory apparatus and instruments with integrated computer software used to analyze, harvest, culture, process, expand and purify cells; parts and accessories for use with such laboratory apparatus and instruments, namely pre-filled plastic cassettes, trays, cell culture bags, tubing and filters; laboratory apparatus and instruments for use in science, research and industry; measuring apparatus and instruments; radiological apparatus and instruments for industrial purposes; computers and printers,

and software and programmes for use therewith; glassware for laboratory use; and parts and fittings for the aforesaid goods; chemistry apparatus and instruments; liquid chromatography apparatus for scientific use; apparatus for use in separation and purification for scientific use; laboratory and research equipment, consisting of empty and pre-packed columns of chemical solids for use in purification; apparatuses of molecular biology, namely filter membranes and membranes of transfer, in particular, immobilizing membranes to detect nucleic acids and proteins; chromatography apparatus for laboratory use; chromatography systems; apparatus and instruments for use in chromatography; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory assets and data; computer software for use in image analysis; imaging apparatus and instruments, namely a charge coupled device (CCD) camera for capturing images for analysis and use in the life science research field; computer software for use on laboratory systems in the life sciences industry; downloadable computer software, namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; freezing apparatus for scientific research and laboratory purposes; modular biologics manufacturing system (laboratory apparatus) used for growing, purifying, concentrating, isolating and packaging biological materials in chemical, biotechnological and pharmaceutical processes, consisting of a bioreactor used to grow cell cultures and fermentations, a mechanical mixing machine for agitating biological media, a filler machine used for packaging pharmaceutical products, a separation machine used for isolating, purifying and concentrating biological materials, and connecting computer hardware and software, substantially all within a plastic or metal enclosure; pre-packed columns for use in purification (laboratory apparatus); supported and unsupported nitrocellulose microporous membranes for the media transfer and immobilisation of nucleic acids and proteins; thawing apparatus for scientific research and laboratory purposes; laboratory equipment namely, chromatographic columns, gas, water

and other liquid or fluid filtering units, in the nature of tubes, cartridges, membrane filters and integral hardware therefor; extraction thimbles, and programmable electronically controlled hot plate/stirrers for laboratory use; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory equipment and data; laboratory apparatus and instruments for use in science, research and industry, namely, purification columns, electrophoresis apparatus not for medical purposes and western blotting systems comprised of computer hardware, software and scanners all used for qualitative and quantitative analysis of proteins; computers, printers, and software and programs all for use with running experiments on purification, electrophoresis and western blotting apparatus, namely, computers, printers, software and programs for screening, analyzing and evaluating proteins, and structural parts and fittings for the aforesaid apparatus; scientific apparatus and instruments used for radiology for the purpose of measuring, monitoring and surveying; computers, printers and software programs used for the purpose of life science research and for nuclear cardiology and medical imaging, for use by laboratories, pharmacies, doctors, hospitals, and medical service providers; radiology apparatus and instruments for the reading and interpretation of autoradiographs and films, namely automated film readers and scanners; apparatus for electrophoresis; chromatography columns and pumps; apparatus for microfabrication; apparatus for scintillation; imaging apparatus for radioactive and luminescent emissions; synthesis and purification integrated systems for use in radiology; apparatus for manufacturing oligonucleotides; apparatus for microarrays; microarray slides; laboratory glassware; laboratory vials and microvials; microtitre plates; and parts and fittings for the aforesaid goods; kit consisting primarily of pre-packed columns, chemicals, pre-made buffer concentrates, syringes and instructional manual for the purification of proteins for in vitro use; nucleic acid purification filters; laboratory equipment, mainly materials, liquids and consumables for scientific purposes that are disposable in nature and can not be repurposed after initial use, namely, syringe filters, chromatography columns, chromatography resin, microscope lens paper,

vent filter, DNA columns for separation purposes, RNA columns for separation purposes, PCR reagents, gradient media; noise reduction capture mode in the image acquisition control downloadable and recorded software offered as a part of a charge coupled device (CCD) camera system that is used for capturing images of protein gels and western blots for analysis in the life science research field; analyzers for research and scientific laboratories for automatically measuring and investigating the interactions of biomolecules in terms of strength, speed and specificity, including defining parameters such as kinetic constants, concentrations, binding patterns and multi-component complex formation; chromatography columns, namely, process scale columns for use with high resolution separation media in research and in the production of pharmaceuticals; computer software and hardware for controlling automated liquid handling systems, namely chromatography systems, filtration systems, bio reactors and oligonucleotide synthesizers; computer software for differential analysis in electrophoresis and other proteomics applications; computer software for graphing and charting data from chromatography systems for the purification of proteins for use by biotechnology scientists and researchers in the life science field; computer software for microscopy, imaging, and informatics sold exclusively through direct sales; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory equipment and data; computer software for use in image analysis; cross flow filtration and separation system comprising flow manifold, microporous membranes, product reservoir, pump, valves, gauges and piping for the separation and concentration of biological solutions in the biopharmaceutical and biotechnology fields; devices for enabling controlled loading of samples in chromatography columns, namely, valved glass tubes and injectors; disposable plastic bioreactors for cell culturing; downloadable computer software, namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; electrical and scientific apparatus - namely automated DNA optical scanning equipment; electrical and

scientific apparatus, namely, microscopes and high accuracy electro-mechanical actuators; automated microscopy systems comprising microscopes and computer hardware and software for high content imaging of microtiter plates, microscope slides and biological samples; electromechanical hardware and software systems comprising computers, computer software, electromechanical positioners for micropositioning control, for use in the field of photonics, digital flow control, semiconductor test and inspection, and microscopy and optical scanners and scanning systems for lasers; computer software for microscopy, imaging, and informatics in the field of clinical and diagnostic testing; electromechanical hardware and software systems comprising computers, computer software, electromechanical positioners for use in the inspecting and analysis of biological samples; electric actuators, namely, high precision electric computer controlled devices for adjusting laser frequency of tunable lasers; electromechanical valve actuators, namely, high precision electric computer controlled valves for use in high precision flow applications; precision positioning systems comprised of optical indexers, namely, an optical train with a camera comprised of an objective lens, a shutter and a filter wheel that enables image data to be digitized, microscopy stages, electronic control circuitry, motion control chassis, linear actuators, screw actuators, linear slider, electric motors, and tunable lasers for use in precision positioning in the fields of photonics, biomedical imaging, fluidics, mass flow valves, life sciences, and semiconductor manufacturing; precision positioning systems comprised of optical indexers, namely, an optical train with a camera comprised of an objective lens, a shutter and a filter wheel that enables image data to be digitized, microscopy stages, electronic control circuitry, motion control chassis, linear actuators, screw actuators, linear slider, electric motors, and tunable lasers for use in precision positioning in the field of clinical diagnostics; electrical and scientific apparatus, namely, optical imaging apparatus; electrical units used in electrophoresis formed of an electrode assembly, clamping frame and tank; laboratory apparatus and equipment for biological and life sciences research, namely, electrophoresis apparatus, mass spectrometry

equipment namely a separation unit, a power supply/control unit, gel cassettes, cassette rack, circulation pump, glass plates, separator and filler sheets, cassette and buffer removal tools; laser imaging apparatus, namely an imagesetter for the production of photographic images in life sciences; filters and microporous membranes, holders, housings and supports therefor, none being made of metal, all being laboratory apparatus; units for filtration and separation purposes, and parts thereof; all for diagnostic, scientific or laboratory use; filters and separators for scientific and laboratory use sold with or without supports for scientific and laboratory use; filters and separators (laboratory apparatus); holders, housings and supports, all for use with the aforesaid filters or separators; filtering units; parts and fitting for all the aforesaid goods, all for scientific and laboratory use; filters for rapid laboratory concentration and/or diafiltration of critical biological solutions; filters for use in laboratory equipment in the biopharmaceutical industry; computer software for controlling chromatography processes and other liquid handling modules; freezing apparatus for scientific research and laboratory purposes, namely, laboratory controlled rate freezers for cryogenic preservation; hybridization transfer membranes for non-medical scientific and research use; kit consisting primarily of chromatography laboratory equipment, namely, prepacked chromatography columns, chemicals, premade buffer concentrates, disposable reusable dispenser syringes for laboratory use for purification of proteins for in vitro use; kits consisting primarily of prepacked chromatography columns and disposable reusable dispenser syringes for laboratory use for protein purification purposes; apparatus and instruments for protein purification purposes, namely, prepacked chromatography columns; laboratory equipment, namely disposable plastic syringe filters; laboratory equipment, namely filters, syringe filters, disposable filter units and disposable syringe filters; laboratory and research equipment consisting of a packed column of chemical solids that function to facilitate the separation of mixtures of organic or biological materials based upon their differing molecular weights or structures; laboratory and sample preparation products, namely, filters, filter-barrels, vials, caps and vial stands;

laboratory apparatus and instruments, namely, pre-packed columns for use in chemical synthesis; laboratory apparatus and instruments, namely, pre-packed columns for use in separation and purification; laboratory apparatus, namely handheld devices containing a card for the processing of buccal cells; laboratory apparatus, namely, a syringeless filter; laboratory apparatus, namely, membrane filter cartridges for the separation of biomolecules in biopharmaceutical production; laboratory columns for use in chemical synthesis; laboratory equipment and accessories used in electrophoretic processes; laboratory equipment, namely, disposable column and buffers for small volume purification of monoclonal antibodies; laboratory filtration systems, consisting of filter cartridge, manifold, pump, back pressure valve, pressure gauges and holding tanks, for use in separation of biological components and membrane separation; laboratory instrument used in the electrophoresis field, namely, an isoelectric focusing instrument; liquid chromatography apparatus and chromatography systems comprised of monitors, motor valves, series pumps, fraction collectors, autosampler, a working platform, pre-programmed method templates and analysis software for use with liquid chromatography apparatus and chromatography systems; scientific and laboratory apparatus and chromatography systems for use in purification, consisting of filters, columns, mixing chambers, holders, pumps, cables, tubing kits; and the parts thereof; liquid chromatography analyzers; liquid chromatography apparatus of scientific use; membrane filter cartridges for the separation of biomolecules in biopharmaceutical production (laboratory apparatus); microtiter plates having chemical chromatographic resin for small scale purification of tagged recombinant proteins; multi-purpose fluorescent sample readers and scanners for analysis of gels, blot arrays and microplates; nucleic acid and protein transfer and immobilization media, for laboratory use, namely supported or reinforced nitrocellulose microporous filters; laboratory equipment - namely, peristaltic pumps, fraction collectors, column monitors, isoelectric focusing units, electrophoresis units, cell culture units and laboratory centrifuges; software and hardware for analyzing data and automating processes related to

biomanufacturing equipment; fermenters; separating funnels (laboratory glassware); soxhlet extraction thimbles made from organic or inorganic fibre and filter for laboratory use; membrane filters for laboratory use; filter supports for single use as laboratory apparatus.

Class 10:

Medical machines, namely, medical apparatus specially adapted for freezing and thawing cell therapy samples for medical purposes; medical instruments with integrated computer software used to analyze, harvest, culture, process, expand and purify cells; parts and accessories for use with such medical instruments namely, pre-filled plastic cassettes, trays, cell culture bags, tubing and filters all for use therewith all for medical or clinical use; apparatus and equipment for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; disposable containers for the collection and preservation and transport of blood; apparatus for the temperature-controlled mixing of additives with biological samples such as blood and cellular material; kits comprising disposable bags for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; bags, pouches and boxes for collecting and preserving biological samples such as blood and cellular material; devices, namely tubing, valves, clips, pipe clamps, caps, brooches, clamps and accessories being part of or forming accessories for medical apparatus for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; any of these devices being part of or forming accessories for medical apparatus for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; apparatus for warming, cooling, cryoprotectant solution addition and mixing biological material such as cells, umbilical cord blood, bone marrow, peripheral blood, blood constituent, or any other blood-like material in order to cryoprepare or thaw biological products; medical apparatus accessories, namely, disposable sets of interconnected medical containers and interconnectable medical containers for use in collecting, treating, analyzing and preserving biological samples such as blood and cellular material; medical apparatus accessories,

namely, tubing, taps, clamps, stoppers and plugs, for interconnecting of and/or for fitting onto the aforementioned disposable sets of interconnectable medical containers and pouches for collecting and preserving biological samples such as blood and cellular material; freezing apparatus for medical purposes, namely, medical apparatus for controlled rate freezing cell therapy samples; medical apparatus, namely handheld devices containing a foam swab for obtaining buccal cells; thawing apparatus for medical purposes; filter membranes, pharmaceutical grade aqueous filters, sterile vent filters, filters for use in blood and plasma separation, inline gas or air filters used in respiratory filtration, filter capsules, molecular sieves, IV filters, encapsulated filter devices, pre-filters, multi layer filters, disposable filtration capsules, microporous membranes, hydrophilic membranes, hydrophobic membranes, hydrophobic filters, glass microfibre filters, filter cartridges, pleated filter cartridges, radiation sterilizable filtering materials, microaggregate transfusion filters, filter housings; tubing sets for insufflation; ribbed or non-ribbed tubing; drain assemblies (tubing); connectors for filters and tubing, luer locks, barbs, sealing rings, clamps; clinical equipment, namely disposable plastic syringe filters; filters for use in apparatus for blood plasma separation; clinical equipment, namely filters, syringe filters, disposable filter units and disposable syringe filters; all the aforesaid for medical, dental, veterinary purposes.

Class 11:

Filters, filter holders, filter valves, filter support screens, filter media and filter membranes for use in separating solid particles from liquid or gas, for commercial and industrial use; liquid chromatography apparatus for industrial use; apparatus for use in separation and purification for industrial purposes; columns for use in industrial chromatography procedures; cooling installations and machines; cooling installations for deep freezing; cooling installations for refrigerating; cooling installations for freezing; chromatography columns (for industrial purpose); media for chromatography columns for industrial purposes; parts of the aforesaid goods in this class; membrane filters for industrial use; biomolecule purification filtration apparatus for industrial use; filters for technical

purposes, namely surface filters, depth filters, strainers, including membrane filters and hyperfiltration membranes in layers, fabrics and porous masses, such as sheets, strips, rods, filters, round socket filters, pleated filters and folding paper, high polymer materials, organic fibers, inorganic, synthetic and/or natural material sintered and/or metallic materials separation apparatus, namely apparatus for filtering for military purposes (e.g. equipment for the preparation of emergency water for basic equipment) and for technical purposes; apparatus for reverse osmosis; electrically operated combined cooling circulator and thermostatic bath for use in heating and cooling liquids; apparatus for lighting, heating, steam generating, refrigerating, drying, ventilating, water supply and sanitary purposes; electrochemical gas generators and separators.

Class 16:

Phase separating paper; chromatography paper, polyethelene-backed absorbent paper, and filter paper; lens cleaning tissue paper; bags and liners of plastic for use in holding biological material and related reagents; creped wood pulp paper filter that is acid and alkali resistant for laboratory and industrial purposes; filter paper; glass microfiber filter papers; polyethylene-backed absorbent paper for use as a protective cover for laboratory work surfaces, as an absorbent liner for animal cages, as a liner for humidity chambers; marketing, scientific and instructional material; instruction manuals; printed matter relating to purification in life sciences.

Class 37:

Repair/maintenance and installation services; servicing of scientific apparatus and instruments; advisory services relating to the aforesaid; building, constructing and installing bioprocessing and biomanufacturing facilities for the life sciences industry; repair, installation, modification or maintenance of scientific apparatus and instruments for use in the life science field.

Class 41:

Training relating to the use, calibration, re-calibration and servicing of scientific apparatus and instruments; training and education services in relation to scientific apparatus, instruments and associated software used in the life science field; customer training and educational courses in the fields

of chemicals, pharmaceuticals, biotechnologicals, biochemical, life science and bioprocess equipment.

Class 42:

Software as a service (SaaS) services featuring software for remote monitoring, managing, controlling, and securing of clinical, medical and laboratory equipment and data; laboratory and scientific research services in the field of cryochain technology, namely, cryogenics and cryopreservation technology; design and development services for the creation of bioprocessing and biomanufacturing facilities for the life sciences industry; consultation in the chemical, pharmaceutical, biotechnological and biochemical fields; manufacturing execution system (MES) for the pharma and biotechnology industries, delivered as software as a service; software as a service featuring software for managing pharmaceutical and biopharmaceutical manufacturing processes; medical diagnostic, scientific research, image analysis and scientific laboratory services in the fields of biology, oncology, neurology, infectious disease, immunology and cell culture; scientific laboratory services; laboratory services, namely, stabilization of assays and reagents; software as a service (SaaS) services featuring software for customization and optimization of bioprocessing and biomanufacturing platforms for the production of biopharmaceuticals; providing an online portal featuring information on bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; scientific consulting services in the life sciences field; consulting services in relation to use of bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; customization of bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; software as a service (SaaS) services featuring software for remote monitoring, managing, controlling and securing of clinical, medical and laboratory equipment and data; software as a service (SaaS) services featuring software for remote monitoring, managing, controlling and securing of clinical, medical and laboratory equipment and data; providing temporary use of non-downloadable software namely software for optimization, obtaining performance data, maintenance, remote diagnostics and

troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; providing software installation, maintenance and repair in the fields of life science and bioprocess equipment; scientific research; technical support services, namely, troubleshooting of computer hardware and software problems; consultancy and advisory services for all of the aforementioned in the fields of life science and bioprocess equipment; contract research and process development services for bioprocess development and manufacturing in the field of biotechnology and pharmaceuticals; platform as a service featuring computer software platforms for use in optimization of life sciences and biomanufacturing processes; software as a service services featuring software for use in optimization of life sciences and biomanufacturing processes; cloud computing featuring software for use in optimization of life sciences and biomanufacturing processes.

Class 44:

Services for collecting, treating, analyzing and preserving biological samples such as blood and cellular material, namely, collection and preservation of human blood and other cellular material for medical purposes including medical testing and for preservation of the collected blood or other cellular materials in view of later testing, analysis or use; medical or paramedical services for the collection, processing, analysis and preservation of biological samples such as blood and cellular products; blood bank services; consultancy in the field of blood transfusion technology; clinical services in connection with treatment based on blood components, and the saving and recovery of surgical blood; medical services in association with cryochain technology.

[511] 貨品 / 服務說明 : Class 1:
Specification: Chemical products, preparations and substances
for use in science and industry; papers
(chemically treated or containing chemicals);
test papers; sensitized papers; indicator
papers; silica (chemically treated); cellulose
powders; chemically treated cellulose; ion-
exchange materials (chemical preparation);

buffer solutions; all for filtration, separation, analysis and testing in laboratories, industry, environmental and medical testing and research; biochemicals, chemicals and chemical products for laboratory, scientific and medical research, biological processing and the production of pharmaceuticals, namely, buffers for cell cultures and chromatography, cell growth media and sera, proteins and amino acids, media components, namely, amino acids, sera, chemical and biochemical additives, nutritional media for maintenance and growth of cells in culture, namely, classical, sera-free, chemically-defined and stem-cell media, growth media, reagents, buffers for cell cultures and chromatography, and distilled water; deionized water for laboratory, scientific and medical research; biological reagents to maintain embryonic stem cells and/or embryos in in vitro culture for in vitro scientific and medical research use; cell culture reagents for scientific research, medical research, and the production of pharmaceuticals; purified water for scientific research, medical research, and the production of pharmaceuticals, namely, water for injection; eukaryotic cell nutrition media and sera (not for medical purpose); cell culture media for scientific, laboratory and research use; chemical nucleation preparations for scientific use; chemical preparations for industrial and scientific purposes; chemical preparations for use in chromatography; chemical products and preparations for life science purposes; chemical products for in vitro use in analytical tests and in analytical processes; chemical products for in vitro use in biochemical separation; chemical products for separation of molecules for industrial and scientific use; chemical products for use in centrifugal processes in biological and biochemical research and clinical investigations into cells, viruses and sub-cellular particles; silicon coated silica colloids; chemical products for use in biological and biochemical research; chemical products for in vitro use in research and in biochemistry; chemical products for use in gel filtration and in the separation of biomolecules; chemical substances for in vitro laboratory use; chemical products and substances, all for in vitro research and biotechnological purposes; none of the aforementioned goods for use in agriculture, horticulture and forestry; chemical products

for use with medical science; chemical products for laboratory use for in vitro analysis and/or testing; chemical products, namely reagents, density gradient media, cell growth media, biochemicals, enzymes and proteins for scientific, laboratory in vitro research, analysis and/or testing, biochemical research use; chemical products, namely, silica based density centrifugation media, to be used in biochemical and clinical research; chemical reagents and substances for analyses (other than for medical or veterinary purposes); chemical reagents, chemicals, biochemicals, proteins and cells for scientific, laboratory in vitro analysis and/or testing and medical research use; chemical products, namely, density centrifugation media, to be used in biochemical and clinical research; chemical solutions and preparations consisting of pre-mixed reactants and reagents for scientific and research use in connection with amplification, analysis or labelling of nucleic acids; chemicals and chemical products for purification purposes; premade buffer concentrates for purification of proteins; chemicals and chemical reagents and preparations for scientific purposes, namely for use in the amplification, analysis or labelling of nucleic acids; enzymes; chemicals and chemical reagents for protein and proteome analysis; biochemical and biological preparations for use in industry, science and research; radioactive elements, isotopes, preparations and reagents for industrial, research and scientific purposes; gases and gas mixtures for industrial, research and scientific purposes; chemical kits comprising a lysis buffer and an enzyme for use in the generation of DNA for sequencing or cloning, and restriction analysis from plaques, bacterial colonies or bacterial cultures; chemical reagents and preparations, all for use in assays and all for the identification, determination or for the qualitative or quantitative analyses of substances or of fluids; chemical substances for use in performing analyses; preparations for diagnosis for scientific or research purposes; dyes for scientific or research purposes; fluorescent dyes for labelling nucleotides and proteins; fluorescent labels for nucleotides and proteins (fluorescent chemicals); chemicals, chemical reagents and preparations for use in the purification or selective recovery of particular components from a

mixture; chemicals, chemical reagents and preparations for use in the purification or selective recovery of oligonucleotides, proteins, PCR or DNA products from a mixture using spin-column chromatography; sorbents, elution solvents and buffer solutions; chemicals, chemical reagents, radioactive elements and preparations for use in fluorometric assays and radioactive assays; fluorescent reagents; scintillants (photographic chemicals); films and photosensitive materials, papers and plates; films for use in autoradiography, fluorography or light detection techniques; sensitised films and chemical preparations and reagents for use therewith; film emulsions, developers, fixers and sensitisers; fixing baths; radioactive and non-radioactive preparations for scientific or research purposes; chemical reagents, preparations and gels for use in electrophoresis; protein preparations; protein molecular weight markers (in the nature of protein) for use in measuring molecule sizes and concentrations for in vitro scientific and research use; non-radioactive chemical reagents and preparations for use in the labeling and detection of immobilized nucleic acids and proteins; chemicals for chromatography media; chemical products for use in separation and purification; chemicals that facilitate the separation of mixtures of organic or biological materials; chromatography chemicals; chemicals for scientific use, namely beads as microcarriers; chemicals for use in industry and science, namely high molecular substances for use as molecular sieve and ion exchange substances; chemicals used in industry, science and photography, as well as in agriculture, horticulture and forestry; in particular scientific, medical, biological, laboratory and forensic chemicals, in the form of substances, fluids, solutions, applied to media or not and media and matrices, for collection, transport, archiving, and analysis of collected samples and specimens; chemicals used in industry, science and photography, as well as in agriculture, horticulture and forestry; unprocessed artificial resins, unprocessed plastics in the form of powder, liquids or pulp; manures; fire extinguishing compositions; tempering and soldering preparations; chemical substances for preserving foodstuffs; tanning substances; adhesives used in industry; kits and reagents for analysis or diagnosis used for scientific

purposes, namely kits consisting of a packed column of chemical solids that function to facilitate the separation of mixtures of organic or biological materials based on their differing molecular weights or structures for use in the purification of Glutathione S-transferase-tagged recombinant proteins; prepared microtitre plates containing chromatographic substances; chemicals, namely agarose for use in the purification of proteins for in vitro use; chemicals, namely, polymers for use in the purification of DNA from small molecules by gel filtration and for the fractionation of lipids, hormones, vitamins and other small biomolecules; chromatography chemicals and media; chromatography media for purification of monoclonal antibodies; high molecular chemical substances for research and industrial purposes, namely microcarriers for growth of primary mammalian cells, diploid cell strains from animals or humans and established cell lines; laboratory reagents, namely proteins for binding and detecting antibodies and chromatography packings and chromatography columns for purifying biological molecules; laboratory reagents, namely, silica beads for scientific and research; nutrients for cultured animal cells and media for growing animal cells in a cell culture for scientific and laboratory use; polymers being chemical compounds for industrial use in the purification of chemical substances; process chromatography media for large scale purification of monoclonal antibodies; reagent kits for DNA and RNA sequencing for use in genomic research; reagents for use with quantitative cell pharmacology profiling instrument systems for scientific and research use; sample preparations of nucleic acids using silica-based membranes; scientific, biological, laboratory and forensic chemicals, in the form of substances, fluids and solutions; all for the collection, transportation, storage and analysis of samples and specimens; serum for use as a supplement with cell culture media used to grow cells in scientific and laboratory research; resins designed and used in biopharmaceutical manufacturing; process chromatography membranes (chemical products) used in biopharmaceutical manufacturing; genomic and diagnostic chemical and biological products designed and used for extraction, isolation, cloning or amplification of nucleic acids (DNA, RNA, mRNA) in molecular biology

research for analytical or preparative purposes; assays for research purposes; nucleic acid and protein transfer media, particularly for laboratory and clinical use; laboratory and forensic media, namely, supporting composite material in the form of, tissue culture media for collection, transport, archiving, and analysis of collected samples and specimens.

Class 5:

Sterilizing preparations; filtering preparations, materials and media for pharmaceutical, medical and sanitary purposes; air purifying preparations; filter capsules for pharmaceutical and medical purposes; diagnostic preparations for medical purposes, diagnostic test kits for medical purposes; filters for the treatment, separation, or decontamination of gas, air or liquids for medical purposes; chemical reagents for medical purposes; bacterial and biological preparations and cultures for medical use; cellulose for pharmaceutical purposes; chemico-pharmaceutical preparations; chemical nucleation preparations for medical use; chemical reagents and substances for analysis for medical and veterinary purposes, excluding clinical medical diagnostic products and services; diagnostic agents, products and preparations for clinical or medical purposes; diagnostic agents, products and preparations for use in the amplification, analysis or labelling of nucleic acids; pharmaceutical and veterinary preparations, medicines and substances; contrast media for medical imaging; diagnostic scanning agents for in vivo use; radio-pharmaceutical products; radioactive sources and standards for use in nuclear medicine; chemicals, in the form of substances, fluids or solutions, applied to media, or not and media for medical and diagnostic purposes, including chemicals, media and matrices for collection, transport, archiving, and analysis of collected samples and specimens; nutrients for cultured animal cells and media for growing animal cells in a cell culture for growing animal cells to produce biological materials for medical therapeutic or clinical diagnostic use; medical and pharmaceutical chemicals in the form of substances, fluids and solutions; all for the collection, transportation, storage and analysis of samples and specimens; cell culture media, reagents and buffers used ex-vivo for the further manufacturing of cell and gene therapies; nutrients for micro organisms,

reagents for medical and veterinary purposes, serums; chemical nucleation preparations for medical use, namely for maintaining cell viability following freezing and thawing; chemically treated paper for collection, isolation, and storage of biological samples for diagnostic, clinical and medical use; diagnostic preparations, namely, polystyrene microspheres for clinical or medical laboratory use; nutrients for cultured animal cells and media for growing animal cells in a cell culture for growing animal cells to produce biological materials for medical therapeutic or clinical diagnostic use; cell culture products (for medical purpose); cell culture media and serum designed and used for the growth and expansion of cells (for medical purpose).

Class 7:

Heat sealing machines for sealing plastic tubes that are used in the laboratory, pharmaceutical, medical and biomedical fields; pharmaceutical processing industrial machine (bioreactor used for the production of biological material for medical treatment or clinical diagnosis); pharmaceutical processing industrial machine (mixer used for the production of biological material for medical treatment or clinical diagnosis); pharmacy machines for separating and sorting pills and their components; Precision positioning equipment, namely, mechanical actuators, screw actuators, electrical motors; hydrodynamic cleaning apparatus for cleaning particulate matter from industrial substrates; filtration units; filter tubes and cartridges for machines; gas generators (machines); apparatus for chemical separation (machines); electrochemical gas compressors (machines); membranes for gas separation machines; filters for chemical processing machines; apparatus for use in chemical and mechanical purification and separation (machines); agitating machines (for chemical processing); mixing or blending machines (for chemical processing) and other chemical processing machines and apparatus; chemical processing machines and apparatus for use in handling large scale bioprocess chemicals, and parts and fittings for the aforesaid goods; computerized mixing system comprising of pump station, control panel, tubing, mixing implement of media for bioprocess; parts and fittings of the aforesaid goods; pipeworks for chemical processing machines and apparatus; machines and instruments for synthesizing

deoxyribonucleic acid for preparations.

Class 9:

Chromatography columns; storage containers, mainly metal, glass or high polymer materials for use in laboratories; chromatographic and electrophoretic devices for science and technical goals, as well as accessories, including racks, stands, fittings, tanks pressure; laboratory equipment; laboratory filters, namely filters surface, depth filters, strainers, including membranes and filters of hyperfiltration membranes in layers, fabrics and porous masses, such as sheet, tapes, rolls, round filters, filter sleeve, pleated filters and folding of paper, high polymer materials, organic fibers, inorganic, synthetic and/or natural material sintered and/or metallic materials; separation apparatus, namely filtering apparatus for science; laboratory, pilot plant and production equipment, namely, bioreactors, electronic controllers for use with bioreactors and bag assemblies in the nature of fluid handling bags and bag manifold systems comprising a plurality of bags connected together with associated tubing, connectors and fittings, filters, ports, liners, chambers, capsules, filter holders, sensors, mixing impellers, tank dispensers and pumps all specifically adapted for use with bioreactors, sold separately and in combination, for use in mixing animal cells suspended in cell culture media and for controlling the temperature, pH and other conditions of the suspension, for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory, pilot plant and production equipment, namely, mixers, electronic controllers for use with mixers and bag assemblies in the nature of fluid handling bags and bag manifold systems comprising a plurality of bags connected together with associated tubing, connectors and fittings, filters, ports, liners, chambers, capsules, filter holders, sensors, mixing impellers, tank dispensers and pumps for use with mixers, sold separately and in combination, for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory, biological pilot plant and biological production equipment for use in pharmaceutical and biological product laboratories and testing facilities, namely, plastic bags for use in holding biological material and related reagents for the purpose

of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory equipment, namely, liners of plastic for tanks used in holding biological material and related reagents; laboratory apparatus for freezing and thawing in clean room environments or in cryopreservation; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory assets and data; laboratory apparatus and instruments, namely, pre-packed columns for use in chromatography; cell processing laboratory apparatus and instruments with integrated computer software used to analyze, harvest, culture, process, expand and purify cells; parts and accessories for use with such laboratory apparatus and instruments, namely pre-filled plastic cassettes, trays, cell culture bags, tubing and filters; laboratory apparatus and instruments for use in science, research and industry; measuring apparatus and instruments; radiological apparatus and instruments for industrial purposes; computers and printers, and software and programmes for use therewith; glassware for laboratory use; and parts and fittings for the aforesaid goods; chemistry apparatus and instruments; liquid chromatography apparatus for scientific use; apparatus for use in separation and purification for scientific use; laboratory and research equipment, consisting of empty and pre-packed columns of chemical solids for use in purification; apparatuses of molecular biology, namely filter membranes and membranes of transfer, in particular, immobilizing membranes to detect nucleic acids and proteins; chromatography apparatus for laboratory use; chromatography systems; apparatus and instruments for use in chromatography; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory assets and data; computer software for use in image analysis; imaging apparatus and instruments, namely a charge coupled device (CCD) camera for capturing images for analysis and use in the life science research field; computer software for use on laboratory systems in the life sciences industry; downloadable computer software, namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess

equipment; freezing apparatus for scientific research and laboratory purposes; modular biologics manufacturing system (laboratory apparatus) used for growing, purifying, concentrating, isolating and packaging biological materials in chemical, biotechnological and pharmaceutical processes, consisting of a bioreactor used to grow cell cultures and fermentations, a mechanical mixing machine for agitating biological media, a filler machine used for packaging pharmaceutical products, a separation machine used for isolating, purifying and concentrating biological materials, and connecting computer hardware and software, substantially all within a plastic or metal enclosure; pre-packed columns for use in purification (laboratory apparatus); supported and unsupported nitrocellulose microporous membranes for the media transfer and immobilisation of nucleic acids and proteins; thawing apparatus for scientific research and laboratory purposes; laboratory equipment namely, chromatographic columns, gas, water and other liquid or fluid filtering units, in the nature of tubes, cartridges, membrane filters and integral hardware therefor; extraction thimbles, and programmable electronically controlled hot plate/stirrers for laboratory use; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory equipment and data; laboratory apparatus and instruments for use in science, research and industry, namely, purification columns, electrophoresis apparatus not for medical purposes and western blotting systems comprised of computer hardware, software and scanners all used for qualitative and quantitative analysis of proteins; computers, printers, and software and programs all for use with running experiments on purification, electrophoresis and western blotting apparatus, namely, computers, printers, software and programs for screening, analyzing and evaluating proteins, and structural parts and fittings for the aforesaid apparatus; scientific apparatus and instruments used for radiology for the purpose of measuring, monitoring and surveying; computers, printers and software programs used for the purpose of life science research and for nuclear cardiology and medical imaging, for use by laboratories, pharmacies, doctors, hospitals, and medical service providers; radiology apparatus and instruments for the reading and

interpretation of autoradiographs and films, namely automated film readers and scanners; apparatus for electrophoresis; chromatography columns and pumps; apparatus for microfabrication; apparatus for scintillation; imaging apparatus for radioactive and luminescent emissions; synthesis and purification integrated systems for use in radiology; apparatus for manufacturing oligonucleotides; apparatus for microarrays; microarray slides; laboratory glassware; laboratory vials and microvials; microtitre plates; and parts and fittings for the aforesaid goods; kit consisting primarily of pre-packed columns, chemicals, pre-made buffer concentrates, syringes and instructional manual for the purification of proteins for in vitro use; nucleic acid purification filters; laboratory equipment, mainly materials, liquids and consumables for scientific purposes that are disposable in nature and can not be repurposed after initial use, namely, syringe filters, chromatography columns, chromatography resin, microscope lens paper, vent filter, DNA columns for separation purposes, RNA columns for separation purposes, PCR reagents, gradient media; noise reduction capture mode in the image acquisition control downloadable and recorded software offered as a part of a charge coupled device (CCD) camera system that is used for capturing images of protein gels and western blots for analysis in the life science research field; analyzers for research and scientific laboratories for automatically measuring and investigating the interactions of biomolecules in terms of strength, speed and specificity, including defining parameters such as kinetic constants, concentrations, binding patterns and multi-component complex formation; chromatography columns, namely, process scale columns for use with high resolution separation media in research and in the production of pharmaceuticals; computer software and hardware for controlling automated liquid handling systems, namely chromatography systems, filtration systems, bio reactors and oligonucleotide synthesizers; computer software for differential analysis in electrophoresis and other proteomics applications; computer software for graphing and charting data from chromatography systems for the purification of proteins for use by biotechnology scientists and researchers in the life science field; computer software for microscopy, imaging, and informatics sold

exclusively through direct sales; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory equipment and data; computer software for use in image analysis; cross flow filtration and separation system comprising flow manifold, microporous membranes, product reservoir, pump, valves, gauges and piping for the separation and concentration of biological solutions in the biopharmaceutical and biotechnology fields; devices for enabling controlled loading of samples in chromatography columns, namely, valved glass tubes and injectors; disposable plastic bioreactors for cell culturing; downloadable computer software, namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; electrical and scientific apparatus - namely automated DNA optical scanning equipment; electrical and scientific apparatus, namely, microscopes and high accuracy electro-mechanical actuators; automated microscopy systems comprising microscopes and computer hardware and software for high content imaging of microtiter plates, microscope slides and biological samples; electromechanical hardware and software systems comprising computers, computer software, electromechanical positioners for micropositioning control, for use in the field of photonics, digital flow control, semiconductor test and inspection, and microscopy and optical scanners and scanning systems for lasers; computer software for microscopy, imaging, and informatics in the field of clinical and diagnostic testing; electromechanical hardware and software systems comprising computers, computer software, electromechanical positioners for use in the inspecting and analysis of biological samples; electric actuators, namely, high precision electric computer controlled devices for adjusting laser frequency of tunable lasers; electromechanical valve actuators, namely, high precision electric computer controlled valves for use in high precision flow applications; precision positioning systems comprised of optical indexers, namely, an optical train with a camera comprised of an objective lens, a shutter and a filter wheel that enables image data to be digitized, microscopy stages,

electronic control circuitry, motion control chassis, linear actuators, screw actuators, linear slider, electric motors, and tunable lasers for use in precision positioning in the fields of photonics, biomedical imaging, fluidics, mass flow valves, life sciences, and semiconductor manufacturing; precision positioning systems comprised of optical indexers, namely, an optical train with a camera comprised of an objective lens, a shutter and a filter wheel that enables image data to be digitized, microscopy stages, electronic control circuitry, motion control chassis, linear actuators, screw actuators, linear slider, electric motors, and tunable lasers for use in precision positioning in the field of clinical diagnostics; electrical and scientific apparatus, namely, optical imaging apparatus; electrical units used in electrophoresis formed of an electrode assembly, clamping frame and tank; laboratory apparatus and equipment for biological and life sciences research, namely, electrophoresis apparatus, mass spectrometry equipment namely a separation unit, a power supply/control unit, gel cassettes, cassette rack, circulation pump, glass plates, separator and filler sheets, cassette and buffer removal tools; laser imaging apparatus, namely an imagesetter for the production of photographic images in life sciences; filters and microporous membranes, holders, housings and supports therefor, none being made of metal, all being laboratory apparatus; units for filtration and separation purposes, and parts thereof; all for diagnostic, scientific or laboratory use; filters and separators for scientific and laboratory use sold with or without supports for scientific and laboratory use; filters and separators (laboratory apparatus); holders, housings and supports, all for use with the aforesaid filters or separators; filtering units; parts and fitting for all the aforesaid goods, all for scientific and laboratory use; filters for rapid laboratory concentration and/or diafiltration of critical biological solutions; filters for use in laboratory equipment in the biopharmaceutical industry; computer software for controlling chromatography processes and other liquid handling modules; freezing apparatus for scientific research and laboratory purposes, namely, laboratory controlled rate freezers for cryogenic preservation; hybridization transfer membranes for non-medical scientific

and research use; kit consisting primarily of chromatography laboratory equipment, namely, prepacked chromatography columns, chemicals, premade buffer concentrates, disposable reusable dispenser syringes for laboratory use for purification of proteins for in vitro use; kits consisting primarily of prepacked chromatography columns and disposable reusable dispenser syringes for laboratory use for protein purification purposes; apparatus and instruments for protein purification purposes, namely, prepacked chromatography columns; laboratory equipment, namely disposable plastic syringe filters; laboratory equipment, namely filters, syringe filters, disposable filter units and disposable syringe filters; laboratory and research equipment consisting of a packed column of chemical solids that function to facilitate the separation of mixtures of organic or biological materials based upon their differing molecular weights or structures; laboratory and sample preparation products, namely, filters, filter-barrels, vials, caps and vial stands; laboratory apparatus and instruments, namely, pre-packed columns for use in chemical synthesis; laboratory apparatus and instruments, namely, pre-packed columns for use in separation and purification; laboratory apparatus, namely handheld devices containing a card for the processing of buccal cells; laboratory apparatus, namely, a syringeless filter; laboratory apparatus, namely, membrane filter cartridges for the separation of biomolecules in biopharmaceutical production; laboratory columns for use in chemical synthesis; laboratory equipment and accessories used in electrophoretic processes; laboratory equipment, namely, disposable column and buffers for small volume purification of monoclonal antibodies; laboratory filtration systems, consisting of filter cartridge, manifold, pump, back pressure valve, pressure gauges and holding tanks, for use in separation of biological components and membrane separation; laboratory instrument used in the electrophoresis field, namely, an isoelectric focusing instrument; liquid chromatography apparatus and chromatography systems comprised of monitors, motor valves, series pumps, fraction collectors, autosampler, a working platform, pre-programmed method templates and analysis software for use with liquid chromatography apparatus and chromatography systems; scientific and laboratory apparatus and

chromatography systems for use in purification, consisting of filters, columns, mixing chambers, holders, pumps, cables, tubing kits; and the parts thereof; liquid chromatography analyzers; liquid chromatography apparatus of scientific use; membrane filter cartridges for the separation of biomolecules in biopharmaceutical production (laboratory apparatus); microtiter plates having chemical chromatographic resin for small scale purification of tagged recombinant proteins; multi-purpose fluorescent sample readers and scanners for analysis of gels, blot arrays and microplates; nucleic acid and protein transfer and immobilization media, for laboratory use, namely supported or reinforced nitrocellulose microporous filters; laboratory equipment - namely, peristaltic pumps, fraction collectors, column monitors, isoelectric focusing units, electrophoresis units, cell culture units and laboratory centrifuges; software and hardware for analyzing data and automating processes related to biomanufacturing equipment; fermenters; separating funnels (laboratory glassware); soxhlet extraction thimbles made from organic or inorganic fibre and filter for laboratory use; membrane filters for laboratory use; filter supports for single use as laboratory apparatus.

Class 10:

Medical machines, namely, medical apparatus specially adapted for freezing and thawing cell therapy samples for medical purposes; medical instruments with integrated computer software used to analyze, harvest, culture, process, expand and purify cells; parts and accessories for use with such medical instruments namely, pre-filled plastic cassettes, trays, cell culture bags, tubing and filters all for use therewith all for medical or clinical use; apparatus and equipment for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; disposable containers for the collection and preservation and transport of blood; apparatus for the temperature-controlled mixing of additives with biological samples such as blood and cellular material; kits comprising disposable bags for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; bags, pouches and boxes for collecting and preserving biological samples

such as blood and cellular material; devices, namely tubing, valves, clips, pipe clamps, caps, brooches, clamps and accessories being part of or forming accessories for medical apparatus for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; any of these devices being part of or forming accessories for medical apparatus for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; apparatus for warming, cooling, cryoprotectant solution addition and mixing biological material such as cells, umbilical cord blood, bone marrow, peripheral blood, blood constituent, or any other blood-like material in order to cryoprepare or thaw biological products; medical apparatus accessories, namely, disposable sets of interconnected medical containers and interconnectable medical containers for use in collecting, treating, analyzing and preserving biological samples such as blood and cellular material; medical apparatus accessories, namely, tubing, taps, clamps, stoppers and plugs, for interconnecting of and/or for fitting onto the aforementioned disposable sets of interconnectable medical containers and pouches for collecting and preserving biological samples such as blood and cellular material; freezing apparatus for medical purposes, namely, medical apparatus for controlled rate freezing cell therapy samples; medical apparatus, namely handheld devices containing a foam swab for obtaining buccal cells; thawing apparatus for medical purposes; filter membranes, pharmaceutical grade aqueous filters, sterile vent filters, filters for use in blood and plasma separation, inline gas or air filters used in respiratory filtration, filter capsules, molecular sieves, IV filters, encapsulated filter devices, pre-filters, multi layer filters, disposable filtration capsules, microporous membranes, hydrophilic membranes, hydrophobic membranes, hydrophobic filters, glass microfibre filters, filter cartridges, pleated filter cartridges, radiation sterilizable filtering materials, microaggregate transfusion filters, filter housings; tubing sets for insufflation; ribbed or non-ribbed tubing; drain assemblies (tubing); connectors for filters and tubing, luer locks, barbs, sealing rings, clamps; clinical equipment, namely disposable plastic syringe filters; filters for use in apparatus for blood plasma separation; clinical

equipment, namely filters, syringe filters, disposable filter units and disposable syringe filters; all the aforesaid for medical, dental, veterinary purposes.

Class 11:

Filters, filter holders, filter valves, filter support screens, filter media and filter membranes for use in separating solid particles from liquid or gas, for commercial and industrial use; liquid chromatography apparatus for industrial use; apparatus for use in separation and purification for industrial purposes; columns for use in industrial chromatography procedures; cooling installations and machines; cooling installations for deep freezing; cooling installations for refrigerating; cooling installations for freezing; chromatography columns (for industrial purpose); media for chromatography columns for industrial purposes; parts of the aforesaid goods in this class; membrane filters for industrial use; biomolecule purification filtration apparatus for industrial use; filters for technical purposes, namely surface filters, depth filters, strainers, including membrane filters and hyperfiltration membranes in layers, fabrics and porous masses, such as sheets, strips, rods, filters, round socket filters, pleated filters and folding paper, high polymer materials, organic fibers, inorganic, synthetic and/or natural material sintered and/or metallic materials separation apparatus, namely apparatus for filtering for military purposes (e.g. equipment for the preparation of emergency water for basic equipment) and for technical purposes; apparatus for reverse osmosis; electrically operated combined cooling circulator and thermostatic bath for use in heating and cooling liquids; apparatus for lighting, heating, steam generating, refrigerating, drying, ventilating, water supply and sanitary purposes; electrochemical gas generators and separators.

Class 16:

Phase separating paper; chromatography paper, polyethelene-backed absorbent paper, and filter paper; lens cleaning tissue paper; bags and liners of plastic for use in holding biological material and related reagents; creped wood pulp paper filter that is acid and alkali resistant for laboratory and industrial purposes; filter paper; glass microfiber filter papers; polyethylene-backed absorbent paper for use as a protective cover for

laboratory work surfaces, as an absorbent liner for animal cages, as a liner for humidity chambers; marketing, scientific and instructional material; instruction manuals; printed matter relating to purification in life sciences.

Class 37:

Repair/maintenance and installation services; servicing of scientific apparatus and instruments; advisory services relating to the aforesaid; building, constructing and installing bioprocessing and biomanufacturing facilities for the life sciences industry; repair, installation, modification or maintenance of scientific apparatus and instruments for use in the life science field.

Class 41:

Training relating to the use, calibration, re-calibration and servicing of scientific apparatus and instruments; training and education services in relation to scientific apparatus, instruments and associated software used in the life science field; customer training and educational courses in the fields of chemicals, pharmaceuticals, biotechnologicals, biochemical, life science and bioprocess equipment.

Class 42:

Software as a service (SaaS) services featuring software for remote monitoring, managing, controlling, and securing of clinical, medical and laboratory equipment and data; laboratory and scientific research services in the field of cryochain technology, namely, cryogenics and cryopreservation technology; design and development services for the creation of bioprocessing and biomanufacturing facilities for the life sciences industry; consultation in the chemical, pharmaceutical, biotechnological and biochemical fields; manufacturing execution system (MES) for the pharma and biotechnology industries, delivered as software as a service; software as a service featuring software for managing pharmaceutical and biopharmaceutical manufacturing processes; medical diagnostic, scientific research, image analysis and scientific laboratory services in the fields of biology, oncology, neurology, infectious disease, immunology and cell culture; scientific laboratory services; laboratory services, namely, stabilization of assays and reagents; software as a service (SaaS) services featuring software for customization and optimization of bioprocessing and biomanufacturing platforms

for the production of biopharmaceuticals; providing an online portal featuring information on bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; scientific consulting services in the life sciences field; consulting services in relation to use of bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; customization of bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; software as a service (SaaS) services featuring software for remote monitoring, managing, controlling and securing of clinical, medical and laboratory equipment and data; software as a service (SaaS) services featuring software for remote monitoring, managing, controlling and securing of clinical, medical and laboratory equipment and data; providing temporary use of non-downloadable software namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; providing software installation, maintenance and repair in the fields of life science and bioprocess equipment; scientific research; technical support services, namely, troubleshooting of computer hardware and software problems; consultancy and advisory services for all of the aforementioned in the fields of life science and bioprocess equipment; contract research and process development services for bioprocess development and manufacturing in the field of biotechnology and pharmaceuticals; platform as a service featuring computer software platforms for use in optimization of life sciences and biomanufacturing processes; software as a service services featuring software for use in optimization of life sciences and biomanufacturing processes; cloud computing featuring software for use in optimization of life sciences and biomanufacturing processes.

Class 44:

Services for collecting, treating, analyzing and preserving biological samples such as blood and cellular material, namely, collection and preservation of human blood and other cellular material for medical purposes including medical testing and for preservation of the collected blood or other cellular

materials in view of later testing, analysis or use; medical or paramedical services for the collection, processing, analysis and preservation of biological samples such as blood and cellular products; blood bank services; consultancy in the field of blood transfusion technology; clinical services in connection with treatment based on blood components, and the saving and recovery of surgical blood; medical services in association with cryochain technology.

Class(es) No(s) .:
- [511] 貨品／服務說明 : Class 1:
Specification: Chemical products, preparations and substances
for use in science and industry; papers
(chemically treated or containing chemicals);
test papers; sensitized papers; indicator
papers; silica (chemically treated); cellulose
powders; chemically treated cellulose; ion-
exchange materials (chemical preparation);
buffer solutions; all for filtration,
separation, analysis and testing in
laboratories, industry, environmental and
medical testing and research; biochemicals,
chemicals and chemical products for
laboratory, scientific and medical research,
biological processing and the production of
pharmaceuticals, namely, buffers for cell
cultures and chromatography, cell growth media
and sera, proteins and amino acids, media
components, namely, amino acids, sera,
chemical and biochemical additives,
nutritional media for maintenance and growth
of cells in culture, namely, classical, sera-
free, chemically-defined and stem-cell media,
growth media, reagents, buffers for cell
cultures and chromatography, and distilled
water; deionized water for laboratory,
scientific and medical research; biological
reagents to maintain embryonic stem cells
and/or embryos in in-vitro culture for in-
vitro scientific and medical research use;
cell culture reagents for scientific research,
medical research, and the production of
pharmaceuticals; purified water for scientific
research, medical research, and the production
of pharmaceuticals, namely, water for
injection; eukaryotic cell nutrition media and
sera (not for medical purpose); cell culture
media for scientific, laboratory and research
use; chemical nucleation preparations for
scientific use; chemical preparations for
industrial and scientific purposes; chemical
preparations for use in chromatography;
chemical products and preparations for life
science purposes; chemical products for in-
vitro use in analytical tests and in
analytical processes; chemical products for

in-vitro use in biochemical separation; chemical products for separation of molecules for industrial and scientific use; chemical products for use in centrifugal processes in biological and biochemical research and clinical investigations into cells, viruses and sub-cellular particles; silicon coated silica colloids; chemical products for use in biological and biochemical research; chemical products for in vitro use in research and in biochemistry; chemical products for use in gel filtration and in the separation of biomolecules; chemical substances for in vitro laboratory use; chemical products and substances, all for in vitro research and biotechnological purposes; none of the aforementioned goods for use in agriculture, horticulture and forestry; chemical products for use with medical science; chemical products for laboratory use for in vitro analysis and/or testing; chemical products, namely reagents, density gradient media, cell growth media, biochemicals, enzymes and proteins for scientific, laboratory in-vitro research, analysis and/or testing, biochemical research use; chemical products, namely, silica based density centrifugation media, to be used in biochemical and clinical research; chemical reagents and substances for analyses (other than for medical or veterinary purposes); chemical reagents, chemicals, biochemicals, proteins and cells for scientific, laboratory in vitro analysis and/or testing and medical research use; chemical products, namely, density centrifugation media, to be used in biochemical and clinical research; chemical solutions and preparations consisting of pre-mixed reactants and reagents for scientific and research use in connection with amplification, analysis or labelling of nucleic acids; chemicals and chemical products for purification purposes; premade buffer concentrates for purification of proteins; chemicals and chemical reagents and preparations for scientific purposes, namely for use in the amplification, analysis or labelling of nucleic acids; enzymes; chemicals and chemical reagents for protein and proteome analysis; biochemical and biological preparations for use in industry, science and research; radioactive elements, isotopes, preparations and reagents for industrial, research and scientific purposes; gases and gas mixtures for industrial, research and scientific purposes; chemical kits comprising

a lysis buffer and an enzyme for use in the generation of DNA for sequencing or cloning, and restriction analysis from plaques, bacterial colonies or bacterial cultures; chemical reagents and preparations, all for use in assays and all for the identification, determination or for the qualitative or quantitative analyses of substances or of fluids; chemical substances for use in performing analyses; preparations for diagnosis for scientific or research purposes; dyes for scientific or research purposes; fluorescent dyes for labelling nucleotides and proteins; fluorescent labels for nucleotides and proteins (fluorescent chemicals); chemicals, chemical reagents and preparations for use in the purification or selective recovery of particular components from a mixture; chemicals, chemical reagents and preparations for use in the purification or selective recovery of oligonucleotides, proteins, PCR or DNA products from a mixture using spin-column chromatography; sorbents, elution solvents and buffer solutions; chemicals, chemical reagents, radioactive elements and preparations for use in fluorometric assays and radioactive assays; fluorescent reagents; scintillants (photographic chemicals); films and photosensitive materials, papers and plates; films for use in autoradiography, fluorography or light detection techniques; sensitised films and chemical preparations and reagents for use therewith; film emulsions, developers, fixers and sensitisers; fixing baths; radioactive and non-radioactive preparations for scientific or research purposes; chemical reagents, preparations and gels for use in electrophoresis; protein preparations; protein molecular weight markers (in the nature of protein) for use in measuring molecule sizes and concentrations for in vitro scientific and research use; non-radioactive chemical reagents and preparations for use in the labeling and detection of immobilized nucleic acids and proteins; chemicals for chromatography media; chemical products for use in separation and purification; chemicals that facilitate the separation of mixtures of organic or biological materials; chromatography chemicals; chemicals for scientific use, namely beads as microcarriers; chemicals for use in industry and science, namely high molecular substances for use as molecular sieve and ion exchange substances; chemicals used in industry, science and

photography, as well as in agriculture, horticulture and forestry; in particular scientific, medical, biological, laboratory and forensic chemicals, in the form of substances, fluids, solutions, applied to media or not and media and matrices, for collection, transport, archiving, and analysis of collected samples and specimens; chemicals used in industry, science and photography, as well as in agriculture, horticulture and forestry; unprocessed artificial resins, unprocessed plastics in the form of powder, liquids or pulp; manures; fire extinguishing compositions; tempering and soldering preparations; chemical substances for preserving foodstuffs; tanning substances; adhesives used in industry; kits and reagents for analysis or diagnosis used for scientific purposes, namely kits consisting of a packed column of chemical solids that function to facilitate the separation of mixtures of organic or biological materials based on their differing molecular weights or structures for use in the purification of Glutathione S-transferase-tagged recombinant proteins; prepared microtitre plates containing chromatographic substances; chemicals, namely agarose for use in the purification of proteins for in vitro use; chemicals, namely, polymers for use in the purification of DNA from small molecules by gel filtration and for the fractionation of lipids, hormones, vitamins and other small biomolecules; chromatography chemicals and media; chromatography media for purification of monoclonal antibodies; high molecular chemical substances for research and industrial purposes, namely microcarriers for growth of primary mammalian cells, diploid cell strains from animals or humans and established cell lines; laboratory reagents, namely proteins for binding and detecting antibodies and chromatography packings and chromatography columns for purifying biological molecules; laboratory reagents, namely, silica beads for scientific and research; nutrients for cultured animal cells and media for growing animal cells in a cell culture for scientific and laboratory use; polymers being chemical compounds for industrial use in the purification of chemical substances; process chromatography media for large scale purification of monoclonal antibodies; reagent kits for DNA and RNA sequencing for use in genomic research; reagents for use with quantitative cell pharmacology profiling

instrument systems for scientific and research use; sample preparations of nucleic acids using silica-based membranes; scientific, biological, laboratory and forensic chemicals, in the form of substances, fluids and solutions; all for the collection, transportation, storage and analysis of samples and specimens; Serum for use as a supplement with cell culture media used to grow cells in scientific and laboratory research; resins designed and used in biopharmaceutical manufacturing; process chromatography membranes (chemical products) used in biopharmaceutical manufacturing; genomic and diagnostic chemical and biological products designed and used for extraction, isolation, cloning or amplification of nucleic acids (DNA, RNA, mRNA) in molecular biology research for analytical or preparative purposes; assays for research purposes; nucleic acid and protein transfer media, particularly for laboratory and clinical use; laboratory and forensic media, namely, supporting composite material in the form of, tissue culture media for collection, transport, archiving, and analysis of collected samples and specimens.

Class 5:

Sterilizing preparations; filtering preparations, materials and media for pharmaceutical, medical and sanitary purposes; air purifying preparations; filter capsules for pharmaceutical and medical purposes; diagnostic preparations for medical purposes, diagnostic test kits for medical purposes; filters for the treatment, separation, or decontamination of gas, air or liquids for medical purposes; chemical reagents for medical purposes; bacterial and biological preparations and cultures for medical use; cellulose for pharmaceutical purposes; chemico-pharmaceutical preparations; Chemical nucleation preparations for medical use; Chemical reagents and substances for analysis for medical and veterinary purposes, excluding clinical medical diagnostic products and services; Diagnostic agents, products and preparations for clinical or medical purposes; diagnostic agents, products and preparations for use in the amplification, analysis or labelling of nucleic acids; Pharmaceutical and veterinary preparations, medicines and substances; contrast media for medical imaging; diagnostic scanning agents for in vivo use; radio-pharmaceutical products; radioactive sources and standards for use in

nuclear medicine; Chemicals, in the form of substances, fluids or solutions, applied to media, or not and media for medical and diagnostic purposes, including chemicals, media and matrices for collection, transport, archiving, and analysis of collected samples and specimens; Nutrients for cultured animal cells and media for growing animal cells in a cell culture for growing animal cells to produce biological materials for medical therapeutic or clinical diagnostic use; Medical and pharmaceutical chemicals in the form of substances, fluids and solutions; all for the collection, transportation, storage and analysis of samples and specimens; Cell culture media, reagents and buffers used ex-vivo for the further manufacturing of cell and gene therapies; Nutrients for micro organisms, reagents for medical and veterinary purposes, serums; Chemical nucleation preparations for medical use, namely for maintaining cell viability following freezing and thawing; Chemically treated paper for collection, isolation, and storage of biological samples for diagnostic, clinical and medical use; Diagnostic preparations, namely, polystyrene microspheres for clinical or medical laboratory use; Nutrients for cultured animal cells and media for growing animal cells in a cell culture for growing animal cells to produce biological materials for medical therapeutic or clinical diagnostic use; cell culture products (for medical purpose); cell culture media and serum designed and used for the growth and expansion of cells (for medical purpose).

Class 7:

Heat sealing machines for sealing plastic tubes that are used in the laboratory, pharmaceutical, medical and biomedical fields; Pharmaceutical processing industrial machine (bioreactor used for the production of biological material for medical treatment or clinical diagnosis); pharmaceutical processing industrial machine (mixer used for the production of biological material for medical treatment or clinical diagnosis); Pharmacy machines for separating and sorting pills and their components; Precision positioning equipment, namely, mechanical actuators, screw actuators, electrical motors; hydrodynamic cleaning apparatus for cleaning particulate matter from industrial substrates; Filtration units; filter tubes and cartridges for machines; gas generators (machines); apparatus for chemical separation (machines);

electrochemical gas compressors (machines); membranes for gas separation machines; filters for chemical processing machines; apparatus for use in chemical and mechanical purification and separation (machines); Agitating machines (for chemical processing); mixing or blending machines (for chemical processing) and other chemical processing machines and apparatus; Chemical processing machines and apparatus for use in handling large scale bioprocess chemicals, and parts and fittings for the aforesaid goods; Computerized mixing system comprising of pump station, control panel, tubing, mixing implement of media for bioprocess; parts and fittings of the aforesaid goods; pipeworks for chemical processing machines and apparatus; Machines and instruments for synthesizing deoxyribonucleic acid for preparations.

Class 9:

Chromatography columns; Storage containers, mainly metal, glass or high polymer materials for use in laboratories; chromatographic and electrophoretic devices for science and technical goals, as well as accessories, including racks, stands, fittings, tanks pressure; laboratory equipment; laboratory filters, namely filters surface, depth filters, strainers, including membranes and filters of hyperfiltration membranes in layers, fabrics and porous masses, such as sheet, tapes, rolls, round filters, filter sleeve, pleated filters and folding of paper, high polymer materials, organic fibers, inorganic, synthetic and/or natural material sintered and/or metallic materials; separation apparatus, namely filtering apparatus for science; laboratory, pilot plant and production equipment, namely, bioreactors, electronic controllers for use with bioreactors and bag assemblies in the nature of fluid handling bags and bag manifold systems comprising a plurality of bags connected together with associated tubing, connectors and fittings, filters, ports, liners, chambers, capsules, filter holders, sensors, mixing impellers, tank dispensers and pumps all specifically adapted for use with bioreactors, sold separately and in combination, for use in mixing animal cells suspended in cell culture media and for controlling the temperature, pH and other conditions of the suspension, for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory, pilot plant and production

equipment, namely, mixers, electronic controllers for use with mixers and bag assemblies in the nature of fluid handling bags and bag manifold systems comprising a plurality of bags connected together with associated tubing, connectors and fittings, filters, ports, liners, chambers, capsules, filter holders, sensors, mixing impellers, tank dispensers and pumps for use with mixers, sold separately and in combination, for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory, biological pilot plant and biological production equipment for use in pharmaceutical and biological product laboratories and testing facilities, namely, plastic bags for use in holding biological material and related reagents for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory equipment, namely, liners of plastic for tanks used in holding biological material and related reagents; laboratory apparatus for freezing and thawing in clean room environments or in cryopreservation; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory assets and data; laboratory apparatus and instruments, namely, pre-packed columns for use in chromatography; cell processing laboratory apparatus and instruments with integrated computer software used to analyze, harvest, culture, process, expand and purify cells; parts and accessories for use with such laboratory apparatus and instruments, namely pre-filled plastic cassettes, trays, cell culture bags, tubing and filters; laboratory apparatus and instruments for use in science, research and industry; measuring apparatus and instruments; radiological apparatus and instruments for industrial purposes; computers and printers, and software and programmes for use therewith; glassware for laboratory use; and parts and fittings for the aforesaid goods; chemistry apparatus and instruments; liquid chromatography apparatus for scientific use; apparatus for use in separation and purification for scientific use; laboratory and research equipment, consisting of empty and pre-packed columns of chemical solids for use in purification; apparatuses of molecular biology, namely filter membranes and membranes of transfer, in particular, immobilizing membranes to detect nucleic acids and proteins; chromatography apparatus for

laboratory use; chromatography systems; apparatus and instruments for use in chromatography; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory assets and data; computer software for use in image analysis; imaging apparatus and instruments, namely a charge coupled device (CCD) camera for capturing images for analysis and use in the life science research field; computer software for use on laboratory systems in the life sciences industry; downloadable computer software, namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; freezing apparatus for scientific research and laboratory purposes; modular biologics manufacturing system (laboratory apparatus) used for growing, purifying, concentrating, isolating and packaging biological materials in chemical, biotechnological and pharmaceutical processes, consisting of a bioreactor used to grow cell cultures and fermentations, a mechanical mixing machine for agitating biological media, a filler machine used for packaging pharmaceutical products, a separation machine used for isolating, purifying and concentrating biological materials, and connecting computer hardware and software, substantially all within a plastic or metal enclosure; pre-packed columns for use in purification (laboratory apparatus); supported and unsupported nitrocellulose microporous membranes for the media transfer and immobilisation of nucleic acids and proteins; thawing apparatus for scientific research and laboratory purposes; Laboratory equipment namely, chromatographic columns, gas, water and other liquid or fluid filtering units, in the nature of tubes, cartridges, membrane filters and integral hardware therefor; extraction thimbles, and programmable electronically controlled hot plate/stirrers for laboratory use; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory equipment and data; laboratory apparatus and instruments for use in science, research and industry, namely, purification columns, electrophoresis apparatus not for medical purposes and western blotting systems comprised of computer hardware, software and

scanners all used for qualitative and quantitative analysis of proteins; computers, printers, and software and programs all for use with running experiments on purification, electrophoresis and western blotting apparatus, namely, computers, printers, software and programs for screening, analyzing and evaluating proteins, and structural parts and fittings for the aforesaid apparatus; scientific apparatus and instruments used for radiology for the purpose of measuring, monitoring and surveying; computers, printers and software programs used for the purpose of life science research and for nuclear cardiology and medical imaging, for use by laboratories, pharmacies, doctors, hospitals, and medical service providers; radiology apparatus and instruments for the reading and interpretation of autoradiographs and films, namely automated film readers and scanners; apparatus for electrophoresis; chromatography columns and pumps; apparatus for microfabrication; apparatus for scintillation; imaging apparatus for radioactive and luminescent emissions; synthesis and purification integrated systems for use in radiology; apparatus for manufacturing oligonucleotides; apparatus for microarrays; microarray slides; laboratory glassware; laboratory vials and microvials; microtitre plates; and parts and fittings for the aforesaid goods; kit consisting primarily of pre-packed columns, chemicals, pre-made buffer concentrates, syringes and instructional manual for the purification of proteins for in vitro use; nucleic acid purification filters; laboratory equipment, mainly materials, liquids and consumables for scientific purposes that are disposable in nature and can not be repurposed after initial use, namely, syringe filters, chromatography columns, chromatography resin, microscope lens paper, vent filter, DNA columns for separation purposes, RNA columns for separation purposes, PCR reagents, gradient media; noise reduction capture mode in the image acquisition control downloadable and recorded software offered as a part of a charge coupled device (CCD) camera system that is used for capturing images of protein gels and western blots for analysis in the life science research field; analyzers for research and scientific laboratories for automatically measuring and investigating the interactions of biomolecules in terms of strength, speed and specificity, including defining parameters such as kinetic constants,

concentrations, binding patterns and multi-component complex formation; chromatography columns, namely, process scale columns for use with high resolution separation media in research and in the production of pharmaceuticals; computer software and hardware for controlling automated liquid handling systems, namely chromatography systems, filtration systems, bio reactors and oligonucleotide synthesizers; computer software for differential analysis in electrophoresis and other proteomics applications; computer software for graphing and charting data from chromatography systems for the purification of proteins for use by biotechnology scientists and researchers in the life science field; computer software for microscopy, imaging, and informatics sold exclusively through direct sales; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory equipment and data; computer software for use in image analysis; cross flow filtration and separation system comprising flow manifold, microporous membranes, product reservoir, pump, valves, gauges and piping for the separation and concentration of biological solutions in the biopharmaceutical and biotechnology fields; devices for enabling controlled loading of samples in chromatography columns, namely, valved glass tubes and injectors,; disposable plastic bioreactors for cell culturing; downloadable computer software, namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; electrical and scientific apparatus - namely automated DNA optical scanning equipment; electrical and scientific apparatus, namely, microscopes and high accuracy electro-mechanical actuators; automated microscopy systems comprising microscopes and computer hardware and software for high content imaging of microtiter plates, microscope slides and biological samples; electromechanical hardware and software systems comprising computers, computer software, electromechanical positioners for micropositioning control, for use in the field of photonics, digital flow control, semiconductor test and inspection, and microscopy and optical scanners and scanning systems for lasers; computer software for

microscopy, imaging, and informatics in the field of clinical and diagnostic testing; electromechanical hardware and software systems comprising computers, computer software, electromechanical positioners for use in the inspecting and analysis of biological samples; electric actuators, namely, high precision electric computer controlled devices for adjusting laser frequency of tunable lasers; electromechanical valve actuators, namely, high precision electric computer controlled valves for use in high precision flow applications; precision positioning systems comprised of optical indexers, namely, an optical train with a camera comprised of an objective lens, a shutter and a filter wheel that enables image data to be digitized, microscopy stages, electronic control circuitry, motion control chassis, linear actuators, screw actuators, linear slider, electric motors, and tunable lasers for use in precision positioning in the fields of photonics, biomedical imaging, fluidics, mass flow valves, life sciences, and semiconductor manufacturing; Precision positioning systems comprised of optical indexers, namely, an optical train with a camera comprised of an objective lens, a shutter and a filter wheel that enables image data to be digitized, microscopy stages, electronic control circuitry, motion control chassis, linear actuators, screw actuators, linear slider, electric motors, and tunable lasers for use in precision positioning in the field of clinical diagnostics; electrical and scientific apparatus, namely, optical imaging apparatus; electrical units used in electrophoresis formed of an electrode assembly, clamping frame and tank; laboratory apparatus and equipment for biological and life sciences research, namely, electrophoresis apparatus, mass spectrometry equipment namely a separation unit, a power supply/control unit, gel cassettes, cassette rack, circulation pump, glass plates, separator and filler sheets, cassette and buffer removal tools; laser imaging apparatus, namely an imagesetter for the production of photographic images in life sciences; filters and microporous membranes, holders, housings and supports therefor, none being made of metal, all being laboratory apparatus; units for filtration and separation purposes, and parts thereof; all for diagnostic, scientific or laboratory use; filters and separators for scientific and laboratory use sold with or

without supports for scientific and laboratory use; filters and separators (laboratory apparatus); holders, housings and supports, all for use with the aforesaid filters or separators; filtering units; parts and fitting for all the aforesaid goods, all for scientific and laboratory use; filters for rapid laboratory concentration and/or diafiltration of critical biological solutions; filters for use in laboratory equipment in the biopharmaceutical industry; computer software for controlling chromatography processes and other liquid handling modules; freezing apparatus for scientific research and laboratory purposes, namely, laboratory controlled rate freezers for cryogenic preservation; hybridization transfer membranes for non-medical scientific and research use; kit consisting primarily of chromatography laboratory equipment, namely, prepacked chromatography columns, chemicals, premade buffer concentrates, disposable reusable dispenser syringes for laboratory use for purification of proteins for in vitro use; kits consisting primarily of prepacked chromatography columns and disposable reusable dispenser syringes for laboratory use for protein purification purposes; apparatus and instruments for protein purification purposes, namely, prepacked chromatography columns; laboratory equipment, namely disposable plastic syringe filters; laboratory equipment, namely filters, syringe filters, disposable filter units and disposable syringe filters; laboratory and research equipment consisting of a packed column of chemical solids that function to facilitate the separation of mixtures of organic or biological materials based upon their differing molecular weights or structures; laboratory and sample preparation products, namely, filters, filter-barrels, vials, caps and vial stands; laboratory apparatus and instruments, namely, pre-packed columns for use in chemical synthesis; laboratory apparatus and instruments, namely, pre-packed columns for use in separation and purification; laboratory apparatus, namely handheld devices containing a card for the processing of buccal cells; laboratory apparatus, namely, a syringeless filter; laboratory apparatus, namely, membrane filter cartridges for the separation of biomolecules in biopharmaceutical production; laboratory columns for use in chemical synthesis; laboratory equipment and accessories used in electrophoretic processes;

laboratory equipment, namely, disposable column and buffers for small volume purification of monoclonal antibodies; laboratory filtration systems, consisting of filter cartridge, manifold, pump, back pressure valve, pressure gauges and holding tanks, for use in separation of biological components and membrane separation; laboratory instrument used in the electrophoresis field, namely, an isoelectric focusing instrument; liquid chromatography apparatus and chromatography systems comprised of monitors, motor valves, series pumps, fraction collectors, autosampler, a working platform, pre-programmed method templates and analysis software for use with liquid chromatography apparatus and chromatography systems; scientific and laboratory apparatus and chromatography systems for use in purification, consisting of filters, columns, mixing chambers, holders, pumps, cables, tubing kits; and the parts thereof; liquid chromatography analyzers; liquid chromatography apparatus of scientific use; membrane filter cartridges for the separation of biomolecules in biopharmaceutical production (laboratory apparatus); microtiter plates having chemical chromatographic resin for small scale purification of tagged recombinant proteins; multi-purpose fluorescent sample readers and scanners for analysis of gels, blot arrays and microplates; nucleic acid and protein transfer and immobilization media, for laboratory use, namely supported or reinforced nitrocellulose microporous filters; laboratory equipment - namely, peristaltic pumps, fraction collectors, column monitors, isoelectric focusing units, electrophoresis units, cell culture units and laboratory centrifuges; software and hardware for analyzing data and automating processes related to biomanufacturing equipment; fermenters; soxhlet extraction thimbles made from organic or inorganic fibre and filter for laboratory use; separating funnels (laboratory glassware); membrane filters for laboratory use; filter supports for single use as laboratory apparatus.

Class 10:

Medical machines, namely, medical apparatus specially adapted for freezing and thawing cell therapy samples for medical purposes; medical instruments with integrated computer software used to analyze, harvest, culture, process, expand and purify cells; parts and

accessories for use with such medical instruments namely, pre-filled plastic cassettes, trays, cell culture bags, tubing and filters all for use therewith all for medical or clinical use; apparatus and equipment for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; disposable containers for the collection and preservation and transport of blood; apparatus for the temperature-controlled mixing of additives with biological samples such as blood and cellular material; kits comprising disposable bags for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; bags, pouches and boxes for collecting and preserving biological samples such as blood and cellular material; devices, namely tubing, valves, clips, pipe clamps, caps, brooches, clamps and accessories being part of or forming accessories for medical apparatus for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; any of these devices being part of or forming accessories for medical apparatus for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; apparatus for warming, cooling, cryoprotectant solution addition and mixing biological material such as cells, umbilical cord blood, bone marrow, peripheral blood, blood constituent, or any other blood-like material in order to cryoprepare or thaw biological products; medical apparatus accessories, namely, disposable sets of interconnected medical containers and interconnectable medical containers for use in collecting, treating, analyzing and preserving biological samples such as blood and cellular material; medical apparatus accessories, namely, tubing, taps, clamps, stoppers and plugs, for interconnecting of and/or for fitting onto the aforementioned disposable sets of interconnectable medical containers and pouches for collecting and preserving biological samples such as blood and cellular material; freezing apparatus for medical purposes, namely, medical apparatus for controlled rate freezing cell therapy samples; medical apparatus, namely handheld devices containing a foam swab for obtaining buccal cells; thawing apparatus for medical purposes; filter membranes, pharmaceutical grade aqueous filters, sterile vent filters, filters for use

in blood and plasma separation, inline gas or air filters used in respiratory filtration, filter capsules, molecular sieves, IV filters, encapsulated filter devices, pre-filters, multi layer filters, disposable filtration capsules, microporous membranes, hydrophilic membranes, hydrophobic membranes, hydrophobic filters, glass microfibre filters, filter cartridges, pleated filter cartridges, radiation sterilizable filtering materials, microaggregate transfusion filters, filter housings; tubing sets for insufflation; ribbed or non-ribbed tubing; drain assemblies (tubing); connectors for filters and tubing, luer locks, barbs, sealing rings, clamps; filters for use in apparatus for blood plasma separation; clinical equipment, namely disposable plastic syringe filters; clinical equipment, namely filters, syringe filters, disposable filter units and disposable syringe filters; all the aforesaid for medical, dental, veterinary purposes.

Class 11:

Filters, filter holders, filter valves, filter support screens, filter media and filter membranes for use in separating solid particles from liquid or gas, for commercial and industrial use; liquid chromatography apparatus for industrial use; apparatus for use in separation and purification for industrial purposes; columns for use in industrial chromatography procedures; cooling installations and machines; cooling installations for deep freezing; cooling installations for refrigerating; cooling installations for freezing; chromatography columns (for industrial purpose); media for chromatography columns for industrial purposes; parts of the aforesaid goods in this class; membrane filters for industrial use; Biomolecule purification filtration apparatus for industrial use; Filters for technical purposes, namely surface filters, depth filters, strainers, including membrane filters and hyperfiltration membranes in layers, fabrics and porous masses, such as sheets, strips, rods, filters, round socket filters, pleated filters and folding paper, high polymer materials, organic fibers, inorganic, synthetic and / or natural material sintered and / or metallic materials separation apparatus, namely apparatus for filtering for military purposes (e.g. equipment for the preparation of emergency water for basic equipment) and for technical purposes; apparatus for reverse osmosis; electrically

operated combined cooling circulator and thermostatic bath for use in heating and cooling liquids; apparatus for lighting, heating, steam generating, refrigerating, drying, ventilating, water supply and sanitary purposes; electrochemical gas generators and separators.

Class 16:

Phase separating paper; chromatography paper, polyethylene-backed absorbent paper, and filter paper; lens cleaning tissue paper; Bags and liners of plastic for use in holding biological material and related reagents; Creped wood pulp paper filter that is acid and alkali resistant for laboratory and industrial purposes; Filter paper; Glass microfiber filter papers; Polyethylene-backed absorbent paper for use as a protective cover for laboratory work surfaces, as an absorbent liner for animal cages, as a liner for humidity chambers; Marketing, scientific and instructional material; Instruction manuals; printed matter relating to purification in life sciences.

Class 37:

Repair/maintenance and installation services; servicing of scientific apparatus and instruments; advisory services relating to the aforesaid; building, constructing and installing bioprocessing and biomanufacturing facilities for the life sciences industry; repair, installation, modification or maintenance of scientific apparatus and instruments for use in the life science field.

Class 41:

Training relating to the use, calibration, re-calibration and servicing of scientific apparatus and instruments; training and education services in relation to scientific apparatus, instruments and associated software used in the life science field; customer training and educational courses in the fields of chemicals, pharmaceuticals, biotechnologicals, biochemical, life science and bioprocess equipment.

Class 42:

Software as a service (SaaS) services featuring software for remote monitoring, managing, controlling, and securing of clinical, medical and laboratory equipment and data; laboratory and scientific research services in the field of cryochain technology, namely, cryogenics and cryopreservation technology; design and development services for the creation of bioprocessing and biomanufacturing facilities for the life

sciences industry; consultation in the chemical, pharmaceutical, biotechnological and biochemical fields; manufacturing execution system (MES) for the pharma and biotechnology industries, delivered as software as a service; software as a service featuring software for managing pharmaceutical and biopharmaceutical manufacturing processes; medical diagnostic, scientific research, image analysis and scientific laboratory services in the fields of biology, oncology, neurology, infectious disease, immunology and cell culture; scientific laboratory services; laboratory services, namely, stabilization of assays and reagents; software as a service (SaaS) services featuring software for customization and optimization of bioprocessing and biomanufacturing platforms for the production of biopharmaceuticals; providing an online portal featuring information on bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; scientific consulting services in the life sciences field; consulting services in relation to use of bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; customization of bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; software as a service (SaaS) services featuring software for remote monitoring, managing, controlling and securing of clinical, medical and laboratory equipment and data; software as a service (SaaS) services featuring software for remote monitoring, managing, controlling and securing of clinical, medical and laboratory equipment and data; providing temporary use of non-downloadable software namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; providing software installation, maintenance and repair in the fields of life science and bioprocess equipment; scientific research; technical support services, namely, troubleshooting of computer hardware and software problems; consultancy and advisory services for all of the aforementioned in the fields of life science and bioprocess equipment; contract research and process development services for bioprocess development and manufacturing in

the field of biotechnology and pharmaceuticals; platform as a service featuring computer software platforms for use in optimization of life sciences and biomanufacturing processes; software as a service services featuring software for use in optimization of life sciences and biomanufacturing processes; cloud computing featuring software for use in optimization of life sciences and biomanufacturing processes.
Class 44:

Services for collecting, treating, analyzing and preserving biological samples such as blood and cellular material, namely, collection and preservation of human blood and other cellular material for medical purposes including medical testing and for preservation of the collected blood or other cellular materials in view of later testing, analysis or use; medical or paramedical services for the collection, processing, analysis and preservation of biological samples such as blood and cellular products; blood bank services; consultancy in the field of blood transfusion technology; clinical services in connection with treatment based on blood components, and the saving and recovery of surgical blood; medical services in association with cryochain technology.

Specification:

Class 1:

Chemical products, preparations and substances for use in science and industry; papers (chemically treated or containing chemicals); test papers; sensitized papers; indicator papers; silica (chemically treated); cellulose powders; chemically treated cellulose; ion-exchange materials (chemical preparation); buffer solutions; all for filtration, separation, analysis and testing in laboratories, industry, environmental and medical testing and research; biochemicals, chemicals and chemical products for laboratory, scientific and medical research, biological processing and the production of pharmaceuticals, namely, buffers for cell cultures and chromatography, cell growth media and sera, proteins and amino acids, media components, namely, amino acids, sera, chemical and biochemical additives, nutritional media for maintenance and growth of cells in culture, namely, classical, sera-free, chemically-defined and stem-cell media, growth media, reagents, buffers for cell cultures and chromatography, and distilled water; deionized water for laboratory, scientific and medical research; biological reagents to maintain embryonic stem cells and/or embryos in in-vitro culture for in-vitro scientific and medical research use; cell culture reagents for scientific research, medical research, and the production of pharmaceuticals; purified water for scientific research, medical research, and the production of pharmaceuticals, namely, water for injection; eukaryotic cell nutrition media and sera (not for medical purpose); cell culture media for scientific, laboratory and research use; chemical nucleation preparations for scientific use; chemical preparations for industrial and scientific purposes; chemical preparations for use in chromatography; chemical products and preparations for life science purposes; chemical products for in-vitro use in analytical tests and in analytical processes; chemical products for in-vitro use in biochemical separation; chemical products for separation of molecules for industrial and scientific use; chemical products for use in centrifugal processes in biological and biochemical research and clinical investigations into cells, viruses and sub-cellular particles; silicon coated silica colloids; chemical products for use in biological and biochemical research; chemical products for in vitro use in research and in

biochemistry; chemical products for use in gel filtration and in the separation of biomolecules; chemical substances for in vitro laboratory use; chemical products and substances, all for in vitro research and biotechnological purposes; none of the aforementioned goods for use in agriculture, horticulture and forestry; chemical products for use with medical science; chemical products for laboratory use for in vitro analysis and/or testing; chemical products, namely reagents, density gradient media, cell growth media, biochemicals, enzymes and proteins for scientific, laboratory in-vitro research, analysis and/or testing, biochemical research use; chemical products, namely, silica based density centrifugation media, to be used in biochemical and clinical research; chemical reagents and substances for analyses (other than for medical or veterinary purposes); chemical reagents, chemicals, biochemicals, proteins and cells for scientific, laboratory in vitro analysis and/or testing and medical research use; chemical products, namely, density centrifugation media, to be used in biochemical and clinical research; chemical solutions and preparations consisting of pre-mixed reactants and reagents for scientific and research use in connection with amplification, analysis or labelling of nucleic acids; chemicals and chemical products for purification purposes; premade buffer concentrates for purification of proteins; chemicals and chemical reagents and preparations for scientific purposes, namely for use in the amplification, analysis or labelling of nucleic acids; enzymes; chemicals and chemical reagents for protein and proteome analysis; biochemical and biological preparations for use in industry, science and research; radioactive elements, isotopes, preparations and reagents for industrial, research and scientific purposes; gases and gas mixtures for industrial, research and scientific purposes; chemical kits comprising a lysis buffer and an enzyme for use in the generation of DNA for sequencing or cloning, and restriction analysis from plaques, bacterial colonies or bacterial cultures; chemical reagents and preparations, all for use in assays and all for the identification, determination or for the qualitative or quantitative analyses of substances or of fluids; chemical substances for use in performing analyses; preparations for

diagnosis for scientific or research purposes; dyes for scientific or research purposes; fluorescent dyes for labelling nucleotides and proteins; fluorescent labels for nucleotides and proteins (fluorescent chemicals); chemicals, chemical reagents and preparations for use in the purification or selective recovery of particular components from a mixture; chemicals, chemical reagents and preparations for use in the purification or selective recovery of oligonucleotides, proteins, PCR or DNA products from a mixture using spin-column chromatography; sorbents, elution solvents and buffer solutions; chemicals, chemical reagents, radioactive elements and preparations for use in fluorometric assays and radioactive assays; fluorescent reagents; scintillants (photographic chemicals); films and photosensitive materials, papers and plates; films for use in autoradiography, fluorography or light detection techniques; sensitised films and chemical preparations and reagents for use therewith; film emulsions, developers, fixers and sensitisers; fixing baths; radioactive and non-radioactive preparations for scientific or research purposes; chemical reagents, preparations and gels for use in electrophoresis; protein preparations; protein molecular weight markers (in the nature of protein) for use in measuring molecule sizes and concentrations for in vitro scientific and research use; non-radioactive chemical reagents and preparations for use in the labeling and detection of immobilized nucleic acids and proteins; chemicals for chromatography media; chemical products for use in separation and purification; chemicals that facilitate the separation of mixtures of organic or biological materials; chromatography chemicals; chemicals for scientific use, namely beads as microcarriers; chemicals for use in industry and science, namely high molecular substances for use as molecular sieve and ion exchange substances; chemicals used in industry, science and photography, as well as in agriculture, horticulture and forestry; in particular scientific, medical, biological, laboratory and forensic chemicals, in the form of substances, fluids, solutions, applied to media or not and media and matrices, for collection, transport, archiving, and analysis of collected samples and specimens; chemicals used in industry, science and photography, as well as in agriculture, horticulture and

forestry; unprocessed artificial resins, unprocessed plastics in the form of powder, liquids or pulp; manures; fire extinguishing compositions; tempering and soldering preparations; chemical substances for preserving foodstuffs; tanning substances; adhesives used in industry; kits and reagents for analysis or diagnosis used for scientific purposes, namely kits consisting of a packed column of chemical solids that function to facilitate the separation of mixtures of organic or biological materials based on their differing molecular weights or structures for use in the purification of Glutathione S-transferase-tagged recombinant proteins; prepared microtitre plates containing chromatographic substances; chemicals, namely agarose for use in the purification of proteins for in vitro use; chemicals, namely, polymers for use in the purification of DNA from small molecules by gel filtration and for the fractionation of lipids, hormones, vitamins and other small biomolecules; chromatography chemicals and media; chromatography media for purification of monoclonal antibodies; high molecular chemical substances for research and industrial purposes, namely microcarriers for growth of primary mammalian cells, diploid cell strains from animals or humans and established cell lines; laboratory reagents, namely proteins for binding and detecting antibodies and chromatography packings and chromatography columns for purifying biological molecules; laboratory reagents, namely, silica beads for scientific and research; nutrients for cultured animal cells and media for growing animal cells in a cell culture for scientific and laboratory use; polymers being chemical compounds for industrial use in the purification of chemical substances; process chromatography media for large scale purification of monoclonal antibodies; reagent kits for DNA and RNA sequencing for use in genomic research; reagents for use with quantitative cell pharmacology profiling instrument systems for scientific and research use; sample preparations of nucleic acids using silica-based membranes; scientific, biological, laboratory and forensic chemicals, in the form of substances, fluids and solutions; all for the collection, transportation, storage and analysis of samples and specimens; Serum for use as a supplement with cell culture media used to grow cells in scientific and laboratory

research; resins designed and used in biopharmaceutical manufacturing; process chromatography membranes (chemical products) used in biopharmaceutical manufacturing; genomic and diagnostic chemical and biological products designed and used for extraction, isolation, cloning or amplification of nucleic acids (DNA, RNA, mRNA) in molecular biology research for analytical or preparative purposes; assays for research purposes; nucleic acid and protein transfer media, particularly for laboratory and clinical use; laboratory and forensic media, namely, supporting composite material in the form of, tissue culture media for collection, transport, archiving, and analysis of collected samples and specimens.

Class 5:

Sterilizing preparations; filtering preparations, materials and media for pharmaceutical, medical and sanitary purposes; air purifying preparations; filter capsules for pharmaceutical and medical purposes; diagnostic preparations for medical purposes, diagnostic test kits for medical purposes; filters for the treatment, separation, or decontamination of gas, air or liquids for medical purposes; chemical reagents for medical purposes; bacterial and biological preparations and cultures for medical use; cellulose for pharmaceutical purposes; chemico-pharmaceutical preparations; Chemical nucleation preparations for medical use; Chemical reagents and substances for analysis for medical and veterinary purposes, excluding clinical medical diagnostic products and services; Diagnostic agents, products and preparations for clinical or medical purposes; diagnostic agents, products and preparations for use in the amplification, analysis or labelling of nucleic acids; Pharmaceutical and veterinary preparations, medicines and substances; contrast media for medical imaging; diagnostic scanning agents for in vivo use; radio-pharmaceutical products; radioactive sources and standards for use in nuclear medicine; Chemicals, in the form of substances, fluids or solutions, applied to media, or not and media for medical and diagnostic purposes, including chemicals, media and matrices for collection, transport, archiving, and analysis of collected samples and specimens; Nutrients for cultured animal cells and media for growing animal cells in a cell culture for growing animal cells to produce biological materials for medical

therapeutic or clinical diagnostic use; Medical and pharmaceutical chemicals in the form of substances, fluids and solutions; all for the collection, transportation, storage and analysis of samples and specimens; Cell culture media, reagents and buffers used ex-vivo for the further manufacturing of cell and gene therapies; Nutrients for micro organisms, reagents for medical and veterinary purposes, serums; Chemical nucleation preparations for medical use, namely for maintaining cell viability following freezing and thawing; Chemically treated paper for collection, isolation, and storage of biological samples for diagnostic, clinical and medical use; Diagnostic preparations, namely, polystyrene microspheres for clinical or medical laboratory use; Nutrients for cultured animal cells and media for growing animal cells in a cell culture for growing animal cells to produce biological materials for medical therapeutic or clinical diagnostic use; cell culture products (for medical purpose); cell culture media and serum designed and used for the growth and expansion of cells (for medical purpose).

Class 7:

Heat sealing machines for sealing plastic tubes that are used in the laboratory, pharmaceutical, medical and biomedical fields; Pharmaceutical processing industrial machine (bioreactor used for the production of biological material for medical treatment or clinical diagnosis); pharmaceutical processing industrial machine (mixer used for the production of biological material for medical treatment or clinical diagnosis); Pharmacy machines for separating and sorting pills and their components; Precision positioning equipment, namely, mechanical actuators, screw actuators, electrical motors; hydrodynamic cleaning apparatus for cleaning particulate matter from industrial substrates; Filtration units; filter tubes and cartridges for machines; gas generators (machines); apparatus for chemical separation (machines); electrochemical gas compressors (machines); membranes for gas separation machines; filters for chemical processing machines; apparatus for use in chemical and mechanical purification and separation (machines); Agitating machines (for chemical processing); mixing or blending machines (for chemical processing) and other chemical processing machines and apparatus; Chemical processing machines and apparatus for use in handling

large scale bioprocess chemicals, and parts and fittings for the aforesaid goods; Computerized mixing system comprising of pump station, control panel, tubing, mixing implement of media for bioprocess; parts and fittings of the aforesaid goods; pipeworks for chemical processing machines and apparatus; Machines and instruments for synthesizing deoxyribonucleic acid for preparations.

Class 9:

Chromatography columns; Storage containers, mainly metal, glass or high polymer materials for use in laboratories; chromatographic and electrophoretic devices for science and technical goals, as well as accessories, including racks, stands, fittings, tanks pressure; laboratory equipment; laboratory filters, namely filters surface, depth filters, strainers, including membranes and filters of hyperfiltration membranes in layers, fabrics and porous masses, such as sheet, tapes, rolls, round filters, filter sleeve, pleated filters and folding of paper, high polymer materials, organic fibers, inorganic, synthetic and/or natural material sintered and/or metallic materials; separation apparatus, namely filtering apparatus for science; laboratory, pilot plant and production equipment, namely, bioreactors, electronic controllers for use with bioreactors and bag assemblies in the nature of fluid handling bags and bag manifold systems comprising a plurality of bags connected together with associated tubing, connectors and fittings, filters, ports, liners, chambers, capsules, filter holders, sensors, mixing impellers, tank dispensers and pumps all specifically adapted for use with bioreactors, sold separately and in combination, for use in mixing animal cells suspended in cell culture media and for controlling the temperature, pH and other conditions of the suspension, for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory, pilot plant and production equipment, namely, mixers, electronic controllers for use with mixers and bag assemblies in the nature of fluid handling bags and bag manifold systems comprising a plurality of bags connected together with associated tubing, connectors and fittings, filters, ports, liners, chambers, capsules, filter holders, sensors, mixing impellers, tank dispensers and pumps for use with mixers, sold separately and in combination, for the

purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory, biological pilot plant and biological production equipment for use in pharmaceutical and biological product laboratories and testing facilities, namely, plastic bags for use in holding biological material and related reagents for the purpose of producing biological materials for medical therapeutic or clinical diagnostic use; laboratory equipment, namely, liners of plastic for tanks used in holding biological material and related reagents; laboratory apparatus for freezing and thawing in clean room environments or in cryopreservation; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory assets and data; laboratory apparatus and instruments, namely, pre-packed columns for use in chromatography; cell processing laboratory apparatus and instruments with integrated computer software used to analyze, harvest, culture, process, expand and purify cells; parts and accessories for use with such laboratory apparatus and instruments, namely pre-filled plastic cassettes, trays, cell culture bags, tubing and filters; laboratory apparatus and instruments for use in science, research and industry; measuring apparatus and instruments; radiological apparatus and instruments for industrial purposes; computers and printers, and software and programmes for use therewith; glassware for laboratory use; and parts and fittings for the aforesaid goods; chemistry apparatus and instruments; liquid chromatography apparatus for scientific use; apparatus for use in separation and purification for scientific use; laboratory and research equipment, consisting of empty and pre-packed columns of chemical solids for use in purification; apparatuses of molecular biology, namely filter membranes and membranes of transfer, in particular, immobilizing membranes to detect nucleic acids and proteins; chromatography apparatus for laboratory use; chromatography systems; apparatus and instruments for use in chromatography; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory assets and data; computer software for use in image analysis; imaging apparatus and instruments, namely a charge coupled device (CCD) camera for capturing images for analysis and use in the life science research field; computer

software for use on laboratory systems in the life sciences industry; downloadable computer software, namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; freezing apparatus for scientific research and laboratory purposes; modular biologics manufacturing system (laboratory apparatus) used for growing, purifying, concentrating, isolating and packaging biological materials in chemical, biotechnological and pharmaceutical processes, consisting of a bioreactor used to grow cell cultures and fermentations, a mechanical mixing machine for agitating biological media, a filler machine used for packaging pharmaceutical products, a separation machine used for isolating, purifying and concentrating biological materials, and connecting computer hardware and software, substantially all within a plastic or metal enclosure; pre-packed columns for use in purification (laboratory apparatus); supported and unsupported nitrocellulose microporous membranes for the media transfer and immobilisation of nucleic acids and proteins; thawing apparatus for scientific research and laboratory purposes; Laboratory equipment namely, chromatographic columns, gas, water and other liquid or fluid filtering units, in the nature of tubes, cartridges, membrane filters and integral hardware therefor; extraction thimbles, and programmable electronically controlled hot plate/stirrers for laboratory use; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory equipment and data; laboratory apparatus and instruments for use in science, research and industry, namely, purification columns, electrophoresis apparatus not for medical purposes and western blotting systems comprised of computer hardware, software and scanners all used for qualitative and quantitative analysis of proteins; computers, printers, and software and programs all for use with running experiments on purification, electrophoresis and western blotting apparatus, namely, computers, printers, software and programs for screening, analyzing and evaluating proteins, and structural parts and fittings for the aforesaid apparatus; scientific apparatus and instruments used for

radiology for the purpose of measuring, monitoring and surveying; computers, printers and software programs used for the purpose of life science research and for nuclear cardiology and medical imaging, for use by laboratories, pharmacies, doctors, hospitals, and medical service providers; radiology apparatus and instruments for the reading and interpretation of autoradiographs and films, namely automated film readers and scanners; apparatus for electrophoresis; chromatography columns and pumps; apparatus for microfabrication; apparatus for scintillation; imaging apparatus for radioactive and luminescent emissions; synthesis and purification integrated systems for use in radiology; apparatus for manufacturing oligonucleotides; apparatus for microarrays; microarray slides; laboratory glassware; laboratory vials and microvials; microtitre plates; and parts and fittings for the aforesaid goods; kit consisting primarily of pre-packed columns, chemicals, pre-made buffer concentrates, syringes and instructional manual for the purification of proteins for in vitro use; nucleic acid purification filters; laboratory equipment, mainly materials, liquids and consumables for scientific purposes that are disposable in nature and can not be repurposed after initial use, namely, syringe filters, chromatography columns, chromatography resin, microscope lens paper, vent filter, DNA columns for separation purposes, RNA columns for separation purposes, PCR reagents, gradient media; noise reduction capture mode in the image acquisition control downloadable and recorded software offered as a part of a charge coupled device (CCD) camera system that is used for capturing images of protein gels and western blots for analysis in the life science research field; analyzers for research and scientific laboratories for automatically measuring and investigating the interactions of biomolecules in terms of strength, speed and specificity, including defining parameters such as kinetic constants, concentrations, binding patterns and multi-component complex formation; chromatography columns, namely, process scale columns for use with high resolution separation media in research and in the production of pharmaceuticals; computer software and hardware for controlling automated liquid handling systems, namely chromatography systems, filtration systems, bio reactors and oligonucleotide synthesizers; computer

software for differential analysis in electrophoresis and other proteomics applications; computer software for graphing and charting data from chromatography systems for the purification of proteins for use by biotechnology scientists and researchers in the life science field; computer software for microscopy, imaging, and informatics sold exclusively through direct sales; computer software for remotely monitoring, managing, controlling and securing clinical, medical and laboratory equipment and data; computer software for use in image analysis; cross flow filtration and separation system comprising flow manifold, microporous membranes, product reservoir, pump, valves, gauges and piping for the separation and concentration of biological solutions in the biopharmaceutical and biotechnology fields; devices for enabling controlled loading of samples in chromatography columns, namely, valved glass tubes and injectors,; disposable plastic bioreactors for cell culturing; downloadable computer software, namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; electrical and scientific apparatus - namely automated DNA optical scanning equipment; electrical and scientific apparatus, namely, microscopes and high accuracy electro-mechanical actuators; automated microscopy systems comprising microscopes and computer hardware and software for high content imaging of microtiter plates, microscope slides and biological samples; electromechanical hardware and software systems comprising computers, computer software, electromechanical positioners for micropositioning control, for use in the field of photonics, digital flow control, semiconductor test and inspection, and microscopy and optical scanners and scanning systems for lasers; computer software for microscopy, imaging, and informatics in the field of clinical and diagnostic testing; electromechanical hardware and software systems comprising computers, computer software, electromechanical positioners for use in the inspecting and analysis of biological samples; electric actuators, namely, high precision electric computer controlled devices for adjusting laser frequency of tunable lasers; electromechanical

valve actuators, namely, high precision electric computer controlled valves for use in high precision flow applications; precision positioning systems comprised of optical indexers, namely, an optical train with a camera comprised of an objective lens, a shutter and a filter wheel that enables image data to be digitized, microscopy stages, electronic control circuitry, motion control chassis, linear actuators, screw actuators, linear slider, electric motors, and tunable lasers for use in precision positioning in the fields of photonics, biomedical imaging, fluidics, mass flow valves, life sciences, and semiconductor manufacturing; Precision positioning systems comprised of optical indexers, namely, an optical train with a camera comprised of an objective lens, a shutter and a filter wheel that enables image data to be digitized, microscopy stages, electronic control circuitry, motion control chassis, linear actuators, screw actuators, linear slider, electric motors, and tunable lasers for use in precision positioning in the field of clinical diagnostics; electrical and scientific apparatus, namely, optical imaging apparatus; electrical units used in electrophoresis formed of an electrode assembly, clamping frame and tank; laboratory apparatus and equipment for biological and life sciences research, namely, electrophoresis apparatus, mass spectrometry equipment namely a separation unit, a power supply/control unit, gel cassettes, cassette rack, circulation pump, glass plates, separator and filler sheets, cassette and buffer removal tools; laser imaging apparatus, namely an imagesetter for the production of photographic images in life sciences; filters and microporous membranes, holders, housings and supports therefor, none being made of metal, all being laboratory apparatus; units for filtration and separation purposes, and parts thereof; all for diagnostic, scientific or laboratory use; filters and separators for scientific and laboratory use sold with or without supports for scientific and laboratory use; filters and separators (laboratory apparatus); holders, housings and supports, all for use with the aforesaid filters or separators; filtering units; parts and fitting for all the aforesaid goods, all for scientific and laboratory use; filters for rapid laboratory concentration and/or diafiltration of critical biological solutions; filters for use in laboratory

equipment in the biopharmaceutical industry; computer software for controlling chromatography processes and other liquid handling modules; freezing apparatus for scientific research and laboratory purposes, namely, laboratory controlled rate freezers for cryogenic preservation; hybridization transfer membranes for non-medical scientific and research use; kit consisting primarily of chromatography laboratory equipment, namely, prepacked chromatography columns, chemicals, premade buffer concentrates, disposable reusable dispenser syringes for laboratory use for purification of proteins for in vitro use; kits consisting primarily of prepacked chromatography columns and disposable reusable dispenser syringes for laboratory use for protein purification purposes; apparatus and instruments for protein purification purposes, namely, prepacked chromatography columns; laboratory equipment, namely disposable plastic syringe filters; laboratory equipment, namely filters, syringe filters, disposable filter units and disposable syringe filters; laboratory and research equipment consisting of a packed column of chemical solids that function to facilitate the separation of mixtures of organic or biological materials based upon their differing molecular weights or structures; laboratory and sample preparation products, namely, filters, filter-barrels, vials, caps and vial stands; laboratory apparatus and instruments, namely, pre-packed columns for use in chemical synthesis; laboratory apparatus and instruments, namely, pre-packed columns for use in separation and purification; laboratory apparatus, namely handheld devices containing a card for the processing of buccal cells; laboratory apparatus, namely, a syringeless filter; laboratory apparatus, namely, membrane filter cartridges for the separation of biomolecules in biopharmaceutical production; laboratory columns for use in chemical synthesis; laboratory equipment and accessories used in electrophoretic processes; laboratory equipment, namely, disposable column and buffers for small volume purification of monoclonal antibodies; laboratory filtration systems, consisting of filter cartridge, manifold, pump, back pressure valve, pressure gauges and holding tanks, for use in separation of biological components and membrane separation; laboratory instrument used in the electrophoresis field, namely, an isoelectric focusing instrument;

liquid chromatography apparatus and chromatography systems comprised of monitors, motor valves, series pumps, fraction collectors, autosampler, a working platform, pre-programmed method templates and analysis software for use with liquid chromatography apparatus and chromatography systems; scientific and laboratory apparatus and chromatography systems for use in purification, consisting of filters, columns, mixing chambers, holders, pumps, cables, tubing kits; and the parts thereof; liquid chromatography analyzers; liquid chromatography apparatus of scientific use; membrane filter cartridges for the separation of biomolecules in biopharmaceutical production (laboratory apparatus); microtiter plates having chemical chromatographic resin for small scale purification of tagged recombinant proteins; multi-purpose fluorescent sample readers and scanners for analysis of gels, blot arrays and microplates; nucleic acid and protein transfer and immobilization media, for laboratory use, namely supported or reinforced nitrocellulose microporous filters; laboratory equipment - namely, peristaltic pumps, fraction collectors, column monitors, isoelectric focusing units, electrophoresis units, cell culture units and laboratory centrifuges; software and hardware for analyzing data and automating processes related to biomanufacturing equipment; fermenters; soxhlet extraction thimbles made from organic or inorganic fibre and filter for laboratory use; separating funnels (laboratory glassware); membrane filters for laboratory use; filter supports for single use as laboratory apparatus.

Class 10:

Medical machines, namely, medical apparatus specially adapted for freezing and thawing cell therapy samples for medical purposes; medical instruments with integrated computer software used to analyze, harvest, culture, process, expand and purify cells; parts and accessories for use with such medical instruments namely, pre-filled plastic cassettes, trays, cell culture bags, tubing and filters all for use therewith all for medical or clinical use; apparatus and equipment for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; disposable containers for the collection and preservation and transport of blood; apparatus

for the temperature-controlled mixing of additives with biological samples such as blood and cellular material; kits comprising disposable bags for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; bags, pouches and boxes for collecting and preserving biological samples such as blood and cellular material; devices, namely tubing, valves, clips, pipe clamps, caps, brooches, clamps and accessories being part of or forming accessories for medical apparatus for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; any of these devices being part of or forming accessories for medical apparatus for the collection, processing, analysis and preservation of biological samples such as blood and cellular material; apparatus for warming, cooling, cryoprotectant solution addition and mixing biological material such as cells, umbilical cord blood, bone marrow, peripheral blood, blood constituent, or any other blood-like material in order to cryoprepare or thaw biological products; medical apparatus accessories, namely, disposable sets of interconnected medical containers and interconnectable medical containers for use in collecting, treating, analyzing and preserving biological samples such as blood and cellular material; medical apparatus accessories, namely, tubing, taps, clamps, stoppers and plugs, for interconnecting of and/or for fitting onto the aforementioned disposable sets of interconnectable medical containers and pouches for collecting and preserving biological samples such as blood and cellular material; freezing apparatus for medical purposes, namely, medical apparatus for controlled rate freezing cell therapy samples; medical apparatus, namely handheld devices containing a foam swab for obtaining buccal cells; thawing apparatus for medical purposes; filter membranes, pharmaceutical grade aqueous filters, sterile vent filters, filters for use in blood and plasma separation, inline gas or air filters used in respiratory filtration, filter capsules, molecular sieves, IV filters, encapsulated filter devices, pre-filters, multi layer filters, disposable filtration capsules, microporous membranes, hydrophilic membranes, hydrophobic membranes, hydrophobic filters, glass microfibre filters, filter cartridges, pleated filter cartridges, radiation sterilizable filtering materials,

microaggregate transfusion filters, filter housings; tubing sets for insufflation; ribbed or non-ribbed tubing; drain assemblies (tubing); connectors for filters and tubing, luer locks, barbs, sealing rings, clamps; filters for use in apparatus for blood plasma separation; clinical equipment, namely disposable plastic syringe filters; clinical equipment, namely filters, syringe filters, disposable filter units and disposable syringe filters; all the aforesaid for medical, dental, veterinary purposes.

Class 11:

Filters, filter holders, filter valves, filter support screens, filter media and filter membranes for use in separating solid particles from liquid or gas, for commercial and industrial use; liquid chromatography apparatus for industrial use; apparatus for use in separation and purification for industrial purposes; columns for use in industrial chromatography procedures; cooling installations and machines; cooling installations for deep freezing; cooling installations for refrigerating; cooling installations for freezing; chromatography columns (for industrial purpose); media for chromatography columns for industrial purposes; parts of the aforesaid goods in this class; membrane filters for industrial use; Biomolecule purification filtration apparatus for industrial use; Filters for technical purposes, namely surface filters, depth filters, strainers, including membrane filters and hyperfiltration membranes in layers, fabrics and porous masses, such as sheets, strips, rods, filters, round socket filters, pleated filters and folding paper, high polymer materials, organic fibers, inorganic, synthetic and / or natural material sintered and / or metallic materials separation apparatus, namely apparatus for filtering for military purposes (e.g. equipment for the preparation of emergency water for basic equipment) and for technical purposes; apparatus for reverse osmosis; electrically operated combined cooling circulator and thermostatic bath for use in heating and cooling liquids; apparatus for lighting, heating, steam generating, refrigerating, drying, ventilating, water supply and sanitary purposes; electrochemical gas generators and separators.

Class 16:

Phase separating paper; chromatography paper, polyethelene-backed absorbent paper, and

filter paper; lens cleaning tissue paper; Bags and liners of plastic for use in holding biological material and related reagents; Creped wood pulp paper filter that is acid and alkali resistant for laboratory and industrial purposes; Filter paper; Glass microfibre filter papers; Polyethylene-backed absorbent paper for use as a protective cover for laboratory work surfaces, as an absorbent liner for animal cages, as a liner for humidity chambers; Marketing, scientific and instructional material; Instruction manuals; printed matter relating to purification in life sciences.

Class 37:

Repair/maintenance and installation services; Servicing of scientific apparatus and instruments; advisory services relating to the aforesaid; Building, constructing and installing bioprocessing and biomanufacturing facilities for the life sciences industry; Repair, installation, modification or maintenance of scientific apparatus and instruments for use in the life science field.

Class 41:

Training relating to the use, calibration, re-calibration and servicing of scientific apparatus and instruments; Training and education services in relation to scientific apparatus, instruments and associated software used in the life science field; Customer training and educational courses in the fields of chemicals, pharmaceuticals, biotechnologicals, biochemical, life science and bioprocess equipment.

Class 42:

Software as a service (SaaS) services featuring software for remote monitoring, managing, controlling, and securing of clinical, medical and laboratory equipment and data; laboratory and scientific research services in the field of cryochain technology, namely, cryogenics and cryopreservation technology; design and development services for the creation of bioprocessing and biomanufacturing facilities for the life sciences industry; consultation in the chemical, pharmaceutical, biotechnological and biochemical fields; manufacturing execution system (MES) for the pharma and biotechnology industries, delivered as software as a service; software as a service featuring software for managing pharmaceutical and biopharmaceutical manufacturing processes; medical diagnostic, scientific research, image analysis and scientific laboratory services in

the fields of biology, oncology, neurology, infectious disease, immunology and cell culture; scientific laboratory services; laboratory services, namely, stabilization of assays and reagents; software as a service (SaaS) services featuring software for customization and optimization of bioprocessing and biomanufacturing platforms for the production of biopharmaceuticals; providing an online portal featuring information on bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; scientific consulting services in the life sciences field; consulting services in relation to use of bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; customization of bioprocessing and biomanufacturing software platforms for the production of biopharmaceuticals; software as a service (SaaS) services featuring software for remote monitoring, managing, controlling and securing of clinical, medical and laboratory equipment and data; software as a service (SaaS) services featuring software for remote monitoring, managing, controlling and securing of clinical, medical and laboratory equipment and data; providing temporary use of non-downloadable software namely software for optimization, obtaining performance data, maintenance, remote diagnostics and troubleshooting, connectivity, calibration qualification, trade-ins, information about spare parts and kits, all for life science and bioprocess equipment; providing software installation, maintenance and repair in the fields of life science and bioprocess equipment; scientific research; technical support services, namely, troubleshooting of computer hardware and software problems; consultancy and advisory services for all of the aforementioned in the fields of life science and bioprocess equipment; contract research and process development services for bioprocess development and manufacturing in the field of biotechnology and pharmaceuticals; platform as a service featuring computer software platforms for use in optimization of life sciences and biomanufacturing processes; Software as a service services featuring software for use in optimization of life sciences and biomanufacturing processes; Cloud computing featuring software for use in optimization of life sciences and biomanufacturing processes.

Class 44:

Services for collecting, treating, analyzing and preserving biological samples such as blood and cellular material, namely, collection and preservation of human blood and other cellular material for medical purposes including medical testing and for preservation of the collected blood or other cellular materials in view of later testing, analysis or use; medical or paramedical services for the collection, processing, analysis and preservation of biological samples such as blood and cellular products; blood bank services; consultancy in the field of blood transfusion technology; clinical services in connection with treatment based on blood components, and the saving and recovery of surgical blood; Medical services in association with cryochain technology.

- [511] 貨品 / 服務說明 : Class 1:
Specification: Unprocessed artificial and synthetic resins;
Unprocessed artificial and synthetic resins
for use in three dimensional (3D) printers or
in Digital Light Processing (DLP) three
dimensional (3D) printers; Antimicrobial
agents for use in manufacture; Chemicals
having antimicrobial properties [other than
medical or veterinary]; Unprocessed plastics
for industrial use; Unprocessed artificial and
synthetic resins for use in the manufacture of
plastic molding compounds; Unprocessed
plastics in the nature of filtering materials
in three dimensional (3D) printing;
Dispersions of plastics for use in the
manufacture of three dimensional (3D)
printing.
Class 17:
Synthetic and artificial resins (semi-
processed); Continuous extruded profiles made
of synthetic plastics and resins particularly
for application in three dimensional (3D)

printers; Polymer materials (semi-processed plastic and resin) used for three dimensional (3D) printing; Semiprocessed poly lactic acid (PLA) filaments used for three dimensional (3D) printing; Semi-processed acrylonitrile butadiene styrene (ABS) filaments used for three dimensional (3D) printing; Polymer materials (semi-processed plastic and resin) used for Digital Light Processing (DLP) three dimensional (3D) printing; Threads of plastic materials, not for textile use; Semi-processed plastic materials.

Class 40:

Treatment of materials; Printing of materials with a three dimensional (3D) printer and a three dimensional (3D) printing technology (printing house services); Printing of materials with a Digital Light Processing (DLP) three dimensional (3D) printer and a Digital Light Processing (DLP) three dimensional (3D) printing technology (printing house services); Treatment of artificial and synthetic resins, plastics, ceramics, metal, glass, silicon and silicates, living cells, cellulose, pharmaceutical compounds; Treatment of materials for custom manufacturing for others of models, parts and components for industrial, commercial or personal use, including but not limited to technical parts, medical, dental and veterinary devices, anatomical implants, artificial limbs, orthopedic articles, consumer products, household goods, office products, jewellery, art objects, ornaments, toys, games, hobby models; Rental of three dimensional (3D) printers; Rental of equipment for the treatment and transformation of materials and for custom manufacturing; Providing advice, consultancy and information relating to three dimensional (3D) printing and material treatment, including via electronic networks such as the Internet.

[511] 貨品 / 服務說明:

Specification:

Class 1:

Industrial chemicals and chemical preparations for scientific purposes; chemical additives for use in the manufacture of cosmetics, dietary supplements, medicine, non-medical nutritional supplements, energy bars, and dietary supplements; photochemical being biologically active chemicals for use in the manufacture of dietary supplements, medicine, energy bars and cosmetics; chemical reagents other than for medical or veterinary purposes.

Class 3:

Cosmetics; creams.

Class 5:

Nutritional and dietary supplements; pharmaceutical preparations for the treatment of pathology of aging; dietetic food adapted for medical use; dietetic food adapted for veterinary use; chemical preparations being medicinal preparations for the treatment of pathology of aging; medicinal herbs for medical purposes; herbal tea for medical purposes; nutritional supplements for medical purposes; dietary supplements for medical purposes; dietary supplements, and nutritional supplement energy bars; chemical reagents for veterinary purposes; Nutritional and dietary supplements; pharmaceutical preparations for the treatment of skin disorders and skin conditions, kidney disease, heart disease, urology disorders, circulatory disorders, memory loss, fatigue, eye strain, eye disease, hearing loss, hair loss, sexual dysfunction; health foods adapted for medical use namely, food bars; dietetic foods adapted for veterinary use; chemical preparations being medical preparations for the treatment of skin disorders and skin conditions, kidney disease, heart disease, urology disorders, circulatory disorders, memory loss, fatigue, eye strain, eye disease, hearing loss, hair loss, sexual dysfunction; dietary supplements for medical use; food supplements; chemical reagents for veterinary uses; vitamin preparations; trace element preparations for human consumption, namely, nutritional supplements; dietetic beverages for medical use; topical gel for medical treatment of skin disorders and skin conditions, hair loss; chemical preparations for medical or pharmaceutical use; medicinal infusions; medicinal herbs; herbal teas for

medicinal purposes; sugar for medical use; mineral nutritional supplements; mineral food supplements; vitamin and mineral supplements; vitamin supplements; food supplements for nonmedical use based on ingredients of animal origin; food supplements for non-medical use based on fruits; food supplements for nonmedical use based on vegetables; food supplements for non-medical use based on dairy products; food supplements for non-medical use based on eggs; food supplements for non-medical use based on seafood; food supplements for nonmedical use based on oils; food supplements for non-medical use based on ingredients of plant origin and plants and plant extracts; food supplements for non-medical use based on ingredients of plant origin.

Class 29:

Dietetic foods for non-medical use based on ingredients of animal origin, namely, meat; dietetic foods for non-medical use based on fruits, namely preserved fruits; dietetic foods for non-medical use based on vegetables, namely, preserved vegetables; dietetic foods for non-medical use based on dairy products, namely, dairy-based spreads; dietetic foods for non-medical use based on eggs, namely, marinated eggs; dietetic foods for non-medical use based on seafood, namely, dried seafood; dietetic foods for non-medical use based on oils, namely, edible oils.

Class 30:

Dietetic foods for non-medical use based on ingredients of plant origin and plants and plant extracts, namely, grain-based chips; dietetic foods for non-medical use based on ingredients of plant origin, namely, grain-based food bars; cereal based energy bars.

Class 32:

Beverage namely, waters, soft drinks, fruit drinks, fruit juices, energy drinks, sports drinks.
