

香港特別行政區政府知識產權署商標註冊處

Trade Marks Registry, Intellectual Property Department

The Government of the Hong Kong Special Administrative Region

### **接納註冊 (全文本)**

商標註冊處處長已根據《商標條例》(第 559 章)第 42 條, 接納下列商標的註冊申請。現根據《商標條例》第 43 條及《商標規則》(第 559 章附屬法例)第 15 條, 公布申請的詳情。

根據《商標條例》第 44 條及《商標規則》第 16 條, 任何人擬就下列商標的註冊提出反對, 須在本公告公布日期起計的三個月內, 採用表格第 T6 號提交反對通知。(例如, 若果公布日期為 2003 年 4 月 4 日, 則該三個月的 後一日為 2003 年 7 月 3 日。)反對通知須載有反對理由的陳述及《商標規則》第 16(2)條所提述的事宜。反對人須在提交反對通知的同時, 將該通知的副本送交有關申請人。

有關商標註冊處處長根據商標條例(第 43 章)第 13 條/商標條例(第 559 章)附表 5 第 10 條所接納的註冊申請, 請到 <http://www.gld.gov.hk/cgi-bin/gld/egazette/index.cgi?lang=c&agree=0> 檢視電子憲報。

### **ACCEPTANCE FOR REGISTRATION (FULL VERSION)**

The Registrar of Trade Marks has accepted the following trade marks for registration under section 42 of the Trade Marks Ordinance (Cap. 559). Under section 43 of the Trade Marks Ordinance and rule 15 of the Trade Marks Rules (Cap. 559 sub. leg.), the particulars of the applications are published.

Under section 44 of the Trade Marks Ordinance and rule 16 of the Trade Marks Rules, any person who wishes to oppose the registration of any of these marks shall, within the 3-month period beginning on the date of this publication, file a notice of opposition on Form T6. (For example, if the publication date is 4 April 2003, the last day of the 3-month period is 3 July 2003.) The notice of opposition shall include a statement of the grounds of opposition and the matters referred to in rule 16(2). The opponent shall, at the same time as he files the notice of opposition, send a copy of it to the applicant of the application in question.

For applications for registration accepted by the Registrar of Trade Marks under section 13 of the Trade Marks Ordinance (Cap. 43)/section 10 of Schedule 5 to the Trade Marks Ordinance (Cap. 559), please view e-gazette at <http://www.gld.gov.hk/cgi-bin/gld/egazette/index.cgi?lang=c&agree=0>.

[511] 貨品 / 服務說明 :  
Specification: Class 9:  
Computer software, which involves systems for the analysis of biometric data; Computer software for biometric systems; Biometric identification computer systems; Software, which involves number of algorithms designed to identify abnormal areas in the image of identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and sources, as well as images and videos of users; Computer systems conducting customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other related procedures; Computer software for anti-money laundering transaction monitoring and customer screening, virtual currency transaction screening, liveness test, customer identification, including video identification, documents verification, and

other related procedures; Computer platforms, which involves a number of algorithms designed to identify abnormal areas in the image of identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and sources, as well as images and videos of users; Computer platforms for customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other related procedures; Application software, which involves systems for the analysis of biometric data; Application programming interface, which involves systems for the analysis of biometric data; Application software for anti-money laundering transaction monitoring and customer screening, virtual currency transaction screening, liveness test, customer identification, including video identification, documents verification, and other related procedures; Application programming interface for anti-money laundering transaction monitoring and customer screening, virtual currency transaction screening, liveness test, customer identification, including video identification, documents verification, and other related procedures; Mobile device application software for collecting data from identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and sources, as well as images and videos of users; Computer application software for transmitting and inputting data into a computer, mobile device, or website user interface; Mobile device application software for transmitting and inputting data into a computer, mobile device, or website user interface; Computer for the customer identification.

Class 35:

Maintenance of data in automated databases containing data related to customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test and other connected data; Computerised management of databases containing other connected data; Business information on collecting data from identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and

sources, as well as images and videos of users; Business information on customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test; Business information processing and analysis of other connected data; Updating and maintenance of data in computer databases collected from identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and sources, as well as images and videos of users; Updating and maintenance of data on customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test; Management, update, and maintenance of other connected data in computer databases; Information search (data search) in computer files, in particular in files containing identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents, as well as images and videos of users; Information search (data search) in computer files related to customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test; Business Information screening in computer files containing other connected information; Providing business information related to customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test via a web site; Preparation of business data reports and providing business information via a web site on other connected data; Providing business research and electronic data processing services related to customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other connected matters via compilation of information into computer databases; Compilation of information and statistics on other connected data; Systematization of data collected from identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and

sources, as well as images and videos of users; Systematization of information on customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test; Systemization of information into computer databases containing other connected data.

Class 36:

Financial risk management services via computer network for the purpose of allowing acceptance or rejection of electronic funds and virtual currency transactions; Financial risk management services via computer network based on customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test; Financial risk management services ensuring secure authorization and secure processing for transactions; Services of collecting financial data from identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and sources, as well as images and videos of users for online banking; Services for online banking related to customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test; Collecting financial data from identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and sources, as well as images and videos of users, in the field of debit card payments processing; Collecting financial data from identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and sources, as well as images and videos of users, in the field of credit card payments processing; Collecting financial data from identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and sources, as well as images and videos of users, in the field of electronic funds transfers; Services for electronic funds transfer providing secure authorization and secure processing transferring funds to and from others.

Class 38:

Providing access to databases containing data

collected from identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and sources, as well as images and videos of users, and other connected data; Transmission of digital files containing data collected from identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents, as well as images and videos of users, and other connected data; Videoconferencing services for the purpose of customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other connected purposes.

Class 41:

Educational consultancy services in the field of customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other connected fields; Educational consultancy services in the field of computer software for customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other connected fields; Education services in the field of customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other connected fields; Arranging and conducting seminars on customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other connected matters.

Class 42:

Computer services in relation to customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test and other connected services; Computer services in relation to users' identification documents verification and comparison with their facial biometrics; Services of software development, which involves systems for the analysis of biometric data; Services of software

development, which involves number of algorithms designed to identify abnormal areas in the image of identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and sources, as well as images and videos of users; Technical research related to customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other connected matters; Software services allowing to carry out customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other related procedures; Conversion services of data or documents from physical to electronic media; Design of computer systems conducting customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other related procedures; Design of biometric identification computer systems; Development of computer platforms for customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other related procedures; Development of computer platforms, which involves a number of algorithms designed to identify abnormal areas in the image of identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and sources, as well as images and videos of users; Design of computer software, application software and application programming interface for anti-money laundering transaction monitoring and customer screening, virtual currency transaction screening, liveness test, customer identification, including video identification, documents verification, and other related procedures; Design of computer software, application software and application programming interface, which involves systems for the analysis of biometric data; Design of computer software, application software and application programming interface, which involves a number of algorithms designed to identify abnormal areas in the image of identity document, payment card, bank

statement, tax bill, utility bill, voter roll, corporate documents, or other documents and sources, as well as images and videos of users; Design of computer and mobile device application software for collecting data from identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and sources, as well as images and videos of users; Design of computer and mobile device application software for transmitting and inputting data into a computer, mobile device, or website user interface; Design of computer software for biometric systems; Design of computer for the customer identification; Services of encryption data, collected from identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and sources, as well as images and videos of users; Services of encryption data in the process of customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other related procedures; Electronic storage of data collected from identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and sources, as well as images and videos of users, and other connected data in computer databases; Electronic storage of data for customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other related procedures; Installation of computer software for the purpose of customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other connected purposes.

Class 45:

Legal research related to customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other connected matters; Legal research based on data collected from identity document, payment card, bank statement, tax bill, utility bill, voter roll, corporate documents, or other documents and sources, as well as

images and videos of users; Preparation of legal documents related to customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other connected matters; Legal watching services in the field of customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test, and other connected matters; Fraud detection services for electronic funds and virtual currency transactions via computer network; Fraud detection services based on customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test; Customer identification and verification services for online banking; Customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test in the field of debit card payments processing; Services of ensuring secure authorization and secure processing for debit card payments; Customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test in the field of credit card payments processing; Services of ensuring secure authorization and secure processing of credit card payments; Customer identification, documents verification, anti-money laundering transaction monitoring and customer screening, virtual currency address and transaction screening, liveness test in the field of electronic funds transfers.

[511] 貨品 / 服務說明 :  
Specification: Class 9:  
Recorded and downloadable media; downloadable publications and materials; downloadable educational, instructional, training, teaching, testing and assessment publications and materials; downloadable books, magazines, colouring books, dictionaries, workbooks, textbooks, activity books, story books, puzzle books, guides, manuals and thesauri; podcasts; vodcasts; software; educational, instructional, training, teaching, testing and assessment software; games software; software for use as an application programming interface (API); software applications for handheld electronic devices.  
Class 16:  
Printed matter; printed publications and materials; educational, instructional, training, teaching, testing and assessment publications and materials; books; magazines; colouring books; dictionaries; workbooks; textbooks; activity books; story books; puzzle books; guides; manuals; thesauri; stickers; sticker books; sticker albums; cards; educational learning cards; flash cards; posters; figurines made from paper and cardboard.  
Class 25:  
Clothing, footwear, headwear; tee-shirts; underwear; socks; tops; jackets; gloves; scarves; coats; shoes; trainers; flip-flops; hats; caps; ear muffs.  
Class 28:  
Games, toys and playthings; video game apparatus; gymnastic and sporting articles; educational games, toys and playthings; board games; card games; puzzles; toy figurines.  
Class 41:  
Educational, instructional and training services; online educational, instructional and training services; entertainment; cultural activities; online entertainment services; television entertainment services; tuition and tutoring; provision of tuition and tutoring services via the Internet; distance learning

services; online games; provision of educational, instructional and training information, material and content; provision of entertainment information, material and content; provision of cultural information, material and content; provision of online dictionaries; provision of online thesauri; provision of online collocation generators; educational and training testing and assessment services; arranging, conducting and organisation of educational, entertainment and cultural events, seminars, workshops, talks, lectures, courses and programmes; advisory, information, consultancy and research services in the fields of education, instruction, training, entertainment and culture.

Class 42:

Software as a service [SaaS]; software as a service [SaaS] for collaboration, administration, education, instruction, training, teaching, testing and assessment.

[511] 貨品 / 服務說明 : Class 9:

Specification:

Computer hardware; aircraft cockpit voice recorders and flight data recorders; flight parameter data recorders and transmitters; semiconductors; radio frequency switches; radar detectors; flight testers, namely, computer hardware and software for performing flight simulation; computer software for aircraft flight simulation; telephonic transmitter; telecommunication network hubs; telecommunication network connectors; telecommunication network receivers; telephonic network interface hardware; telephonic security control hardware; telephonic multimedia control hardware; telephonic switching, routing, and subscriber interface hardware for use in computer and communications networks and systems; computer software for use in command and control in the field of satellite communications; computer software for data mining in the field of strategic and tactical intelligence; computer telemetry software for use in data collection and transmission from satellites, aircraft, missiles, moving surface-based systems and remotely configured fixed site installations; computer software for use in data collection and transmission in medical x-ray machines, magnetic sensing machines, acoustic sensing

machines, chemical tracing machines; computer software for use in control and operation of real-time equipment; computer software for operating and controlling x-ray machines; computer software for operating and controlling magnetic sensing machines; computer software for operating and controlling medical imaging machines; computer software for operating and controlling acoustic sensing machines; computer software for operating and controlling chemical tracing machines; flight navigation controls; flight safety equipment, namely, voice recorders and telemetry systems for use on aircraft; computer software for operating and controlling aircraft maintenance systems on aircraft; computer software for operating and controlling telemetry scanners; intrusion detection systems; computer software for operating and controlling combat scoring systems and pictures, computer software for operating and controlling air traffic handling systems; computer software for operating and controlling monitors, still cameras and video cameras; computer software for operating and controlling radar systems; computer software for use in vehicle status and monitoring systems; computer software for system situational awareness and representation in a communication and data link control system; telecommunications channel amplifiers; frequency filters for use in telecommunications; computer hardware for electronic key information processing, namely, the processing of information related to electronic encryption and other security technologies; radio frequency limiters; harmonic generators; satellite transponders; transponder controllers; secure communications systems consisting of digital processors, modulators, antennas, transmitters, receivers, and encryption hardware and software for secure algorithm processing devices for use with airborne, satellite, ground and sea-based information collection, transmission and analysis; communications systems consisting of communication devices for high data rate microwave communications links and computer hardware; communications systems consisting of telephonic and high data rate microwave radio components, digital processors, computer hardware, software containing algorithms for use in processing secure communications and software for the secure broadcast and/or receipt of communications and information or data; on-board satellite equipment providing

subsystem capabilities, namely, electronic modules and circuit cards for digital solid-state recording of electronic data, video signal processing, communications signal processing and translation; microwave devices, equipment, products and components, namely, frequency transmitters, frequency converters, frequency synthesizers, frequency modulators, frequency filters, frequency power amplifiers, passive components, mechanical switches, wireless frequency monitors; radio navigation equipment comprised of recording transmission and receiving microwave equipment, namely, microprocessors, electronic displays, digital storage devices, radio transmitters and receivers, providing navigation, vehicle command and control, vehicle indications and warning, data and telemetry recording capabilities; surveillance equipment and devices, namely, ISR (Intelligence surveillance reconnaissance) subsystems which use computer hardware and software to provide a sampling of the electromagnetic spectrum in prescribed frequencies to extract information content available for analysis, for use in military and civilian aircraft; electronic sensors that provide in real time the ability to collect electronic data and information; electronic computer hardware and software that allow for the collection, monitoring, analysis, storage, and presentation of medical images; hardware that allows for the interfacing of analog or digital signals into the existing PSTN (Public Switch Telephone Network) or global Information network and create the ability to take those same signals into a mobile communications system; telephonic computer hardware that allows for creation of a wireless last mile, namely, wireless radio connections between a central source and destination with the telephony and data system having fixed site or mobile operational capability; communications terminals which consist of computer hardware that provides for the creation and connection of multimedia communication signals including analog, voice, data, and video and allow signals to be connected to other communications terminals or other network nodes; Radio and television transmission systems comprising transmitters, monitors, signal mixers, audio and video signal encoders and decoders and editing equipment, namely, signal processors; transmitters and receivers for satellite communications; computer operated network systems comprising computer

hardware and software for transmitting data between computers connected in a network and for managing the computers and the transmission of the data on said network; computer information systems comprising computers and software for processing data, word processing and displaying of data; avionics systems comprising digital maps, fiber-optic and wire data busses, memory devices, instrumentation for displaying, storing, processing, and retrieving weather, tactical, strategic and secure data, aircraft cockpit controls and data displays; phased array antennas; global positioning equipment comprising data processors and displays; Computer software and computer hardware for use in air traffic control communications systems for displaying, transporting, transmitting voice, data and images, controlling, switching, routing, and receiving air traffic information; computers and computer software for converting images into data, and for analyzing, displaying and printing the data in the field of two and three-dimensional image extraction, manipulation, display, and geographic registration; secure computer operated systems consisting of computer hardware and computer software, and encrypted databases, all used for ensuring and controlling the security and access of a computer network and the information contained therein namely, tracking air traffic and transmitting encrypted messages to pilots data base management, file transfer, and for connecting computers and data bases in a network and for air traffic circulation management; airline management system comprising computers and software for database management and for exchanging aircraft and aircraft operations information; Television signal analysis processors, namely, electronic display panels for displaying signals, signal evaluation terminals primarily comprised of customized signal analysis hardware with integrated displays and software analysis components running on industry standard computers and monitors for evaluating the quality of analog and digital signals, media analysis servers for verifying the quality of digital media content, signal interface modules, handheld signal analyzers, optical signal analyzers, circuit testers for monitoring broadcast signals, and video monitoring tools, namely, software based video monitoring tools, namely, computer software for monitoring and logging the loudness of

media content; timing reference generators, namely, time reference signal generators for broadcast system timing signal and test signal generation; hardware and computer software for television production, post production and broadcast, namely, demodulators, digital signage, namely, dynamic electronic displays and networking computer servers and computer software for managing and controlling dynamic electronic displays, distribution amplifiers, audio/video editors, namely, computer workstations equipped with computer software for editing audio and video program material, computer hardware and computer software sold as a unit for generating characters and graphics, computer software for generating visual effects, computer hardware and computer software sold as a unit for generating and inserting on-air branding, emergency alert modules, namely, computerized electronic modules and associated computer software for implementing the broadcasting of public emergency alert messages, fiber optic signal transports, electronic master control switchers for audio and video signals, audio and video signal compressors and audio and video signal decompressors, multiplexers and de-multiplexers, multiviewers, broadcast computer network monitoring and control application software, electronic network control panels, audio, video and data receivers and decoders, electronic routing switchers for audio and video signals, video servers, NTP (Network Time Protocol) timing modules comprised primarily of computer hardware and computer software for carrying out NTP timing, signal timing clocks, signal transport modules, audio/video sync and timing managers primarily comprised of high precision clock generation circuitry for synchronization of audio with video, computer software for creating and displaying timecode markers, up/down signal frequency converters, signal format cross converters, all for use in the media and entertainment industry; broadcast operations software for advertising, sales, traffic and billing, automation, digital asset management, programming and rights management, namely, computer software for managing, monitoring and automating the buying, selling, scheduling, research, inventory management, production tracking and accounting processes for advertising, and general content for the media and entertainment industry; computer software for controlling and monitoring switching systems for television and radio

signals; computer software for managing, monitoring and automating the creation, movement, location, archiving, retrieval and use of digital media assets; business process management and messaging software, for managing and controlling human and automated workflows and multisystem communications for use in the media and entertainment industry; network management centers primarily comprised of mobile and portable radios and also containing electrical base station controllers, electrical communication controllers and electrical network controllers; mobile two-way communications radios; and non-mobile two-way communications radios; portable two-way communications radios; radio network gateways comprising computers, computer switches and associated computer software for voice and data communications; Internet protocol-based networks comprising computer hardware and computer software for interoperable communications; telecommunications equipment, namely, trunked radio communication systems for public service and industrial applications comprised of portable communications radios, electrical base station controllers, electrical communication controllers and circuit switches; control equipment for two-way mobile and two-way fixed radios, namely, base station equipment for fixed and mobile networking and communications, cell sites primarily comprised of electronic hardware, computer software, antennae, and base stations, control stations primarily comprised of, radio hardware and associated computer software, desktop control stations primarily comprised of radios, radio hardware and associated computer software, dispatch and console hardware, namely, dispatch consoles and software for carrying out emergency and nonemergency communications and carrying out command and control of public safety personnel and assets, site management computer hardware and software for managing communications radios and base stations, and network monitoring computer hardware and software for monitoring communications radios and base stations; radio data communications systems primarily comprised of mobile communications radios and also containing non-mobile communications radios, portable communications radios, base station controllers, communication controllers, and network controllers; communications radio network gateways comprised primarily of computers,

computer switches and associated computer software for providing a gateway between networks; space deployable microwave signal and ultra-high frequency (UHF) signal reflectors apparatus for satellite communications; computers and computer software for processing geographic elevation data representing the elevations of locations on the earth to generate, display and print three-dimensional geographically registered representations of those locations; computers and computer software for managing, cataloging and retrieving geospatial imagery, imagery derived products and other intelligence products through the synchronization of data catalogs across disparate storage locations; computers and computer software for managing, processing, exploiting and disseminating motion imagery intelligence; computers and computer software for managing, processing, exploiting and disseminating flight planning presentations to general aviation pilots and air traffic controllers; networking communications radios; shipboard communication terminals primarily comprised of antennae, positioners, modems, up converters, down converters, amplifiers and user interfaces; ground communication terminals primarily comprised of antennae, positioners, modems, up converters, down converters, amplifiers and user interfaces; computer information systems comprised mainly of computers and computer software for processing data, word processing and displaying of data in the fields of census information systems, healthcare information systems, intelligent electrical power distribution systems, weather reporting and forecasting systems and environmental reporting and forecasting systems; avionics equipment, namely, video signal compressor and decompressors, electrical power supplies, mounting racks specially adapted for mounting and interconnecting electronic data processing apparatus, airborne signal processors for network interoperability and for targeting of weapons, secure network switches, computer software in the nature of networking protocols for facilitating the exchange of electronic messages and data, radio frequency (RF) data links for weapons, UHF (Ultra High Frequency) /VHF (Very high frequency) wireless data links, beam former electronics primarily consisting of power amplifiers and also containing low noise amplifiers, phase shifters, time delay units, data transmit and receive switches, frequency up-converters,

frequency down-converters, array controllers and array power supplies and control equipment, antenna control units, attitude and heading reference units (measuring apparatus), data transmit/receive control units, antenna position controllers and frequency band select switches; air traffic control communications systems consisting of computer hardware and computer software for displaying, transmitting, controlling, switching, routing, and receiving weather data; two-way radios for communication of voice, data, images and video for use by military and other government agencies; two-way communications radios, namely, voice and data communications radios operable across multiple frequency bands for enabling public safety officials and first responders such as law enforcement agencies, paramedics, firefighters and military personnel to communicate interoperably with one another even though their respective pre-existing communications infrastructures might otherwise be mutually incompatible; trunked radio communication systems for public service and industrial applications, namely, cellular base stations and mobile radio base stations for two-way mobile and fixed communications radios; loudspeakers for mobile two-way communications radios; loudspeakers for non-mobile two-way communications radios; battery chargers for two-way communications radios; Internet protocol-based communication networks comprised primarily of computer hardware and computer software for implementing interoperable communications; cryptographic modules namely, electronic modules with embedded firmware for data encryption; encryption engines; radio frequency wireless communications adapters, namely, network interface cards; software for operating radio frequency wireless network interface cards; communications software for connecting radio frequency wireless network interface cards to a local area communications network; radio network gateways comprised primarily of computers, computer switches and computer software in the field of voice and data communications; computer software for use in the field of air traffic control, namely, for the supervision, maintenance, administration, troubleshooting and configuration of computer software for monitoring the performance of air traffic control systems, mapping definition, uploading software updates and releases, access control, user definition, recovery and diagnostic reporting.

## Class 35:

Business management advice and consultation in the field of telecommunications logistics; Business consultation and assistance in the operation of telecommunication systems and networks for others; Business consultation and assistance in the field of the operation and administration of telecommunication networks and communication links for others.

## Class 37:

Technical consultation in the field of building construction of fixed site earth-based facilities; Technical consultation and assistance in the field of construction, repair and maintenance of submarines and ships; Technical consultation concerning the installation, repair and maintenance of mobile and fixed site earth-based facilities, satellites and related computer information systems; IT and communication infrastructure upgrade services, namely, updating of computer hardware for IT and communication systems; Telecommunications system maintenance services, namely, maintenance of radio, television and digital communications equipment for others.

## Class 38:

Technical consultation in the field of satellite communications and communications by related communication information systems, namely, communications via satellite transmission, microwave products and telemetry and instrumentation; Consultation and technical assistance in the fields of secure communications and telemetry.

## Class 42:

Technical consultation and assistance in the field of avionics; Information technology consultation in the fields of submarines and ships, mobile and fixed site earth-based facilities, satellites and related information systems, namely, information security, communications, microwave products and telemetry and instrumentation; Designing computer systems for software integration, maintenance and user-information services, operation support systems for software integration, maintenance and planning support services and provisioning, and provisioning control support services for satellite control networks, real-time defense communications systems, and real time defense intelligence collection systems; Designing computer systems for engineering support for satellite launches, deployed communication systems and deployed intelligence collection systems;

Consultation and technical assistance in the fields of customization of computer hardware and software products; Consultation and assistance with computer program management services, computer site management services, and deployment and management of wireless communications networks of others and communications link management services; Technical support services, namely, troubleshooting in the nature of diagnosing and testing computer hardware and software problems; computer services relating to providing an interactive web site that enables users to enter, access, monitor and generate designed strategic and tactical signal intelligence information reports; IT and communication infrastructure migration services; technical design and deployment of telecommunication networks and computer networks for others; technical support services for migration of datacenter, server and database applications; data migration services; IT software applications management, namely, management of software applications and maintenance of computer software relating to computer security and prevention of computer risks; computer hardware and software consulting services; technical consulting in the field of telecommunications technology; technical consulting in the field of information technology (IT); updating and maintenance of computer software, information technology (IT) integration services; technical support, namely, monitoring of computer networks by remote access; remote computer network technical monitoring and software maintenance services; remote management of the information technology (IT) systems of others; planning, design and management of information technology (IT) systems; computer hardware and software design; computer network design for others; information assurance services (computer security services) for designing, deploying and operating secure communications systems and information networks, for safeguarding the confidentiality, integrity and availability of information systems and critical business data of others; design of radio, television and digital communications equipment for others; design and integration of telephone systems, communications systems, and information display systems; Consultation and technical assistance in the fields of information security and intelligence security services for secure and non-secure voice, data, and

video communications, user authorization,  
recognition and message encryption.

computer hardware and software for performing  
flight simulation; computer software for  
aircraft flight simulation; telephonic  
transmitter; telecommunication network hubs;  
telecommunication network connectors;  
telecommunication network receivers;  
telephonic network interface hardware;  
telephonic security control hardware;  
telephonic multimedia control hardware;  
telephonic switching, routing, and subscriber  
interface hardware for use in computer and  
communications networks and systems; computer  
software for use in command and control in the  
field of satellite communications; computer  
software for data mining in the field of  
strategic and tactical intelligence; computer  
telemetry software for use in data collection  
and transmission from satellites, aircraft,  
missiles, moving surface-based systems and  
remotely configured fixed site installations;  
computer software for use in data collection  
and transmission in medical x-ray machines,  
magnetic sensing machines, acoustic sensing  
machines, chemical tracing machines; computer  
software for use in control and operation of  
real-time equipment; computer software for  
operating and controlling x-ray machines;  
computer software for operating and  
controlling magnetic sensing machines;  
computer software for operating and  
controlling medical imaging machines; computer  
software for operating and controlling  
acoustic sensing machines; computer software  
for operating and controlling chemical tracing  
machines; flight navigation controls; flight  
safety equipment, namely, voice recorders and  
telemetry systems for use on aircraft;  
computer software for operating and  
controlling aircraft maintenance systems on  
aircraft; computer software for operating and  
controlling telemetry scanners; intrusion

detection systems; computer software for operating and controlling combat scoring systems and pictures, computer software for operating and controlling air traffic handling systems; computer software for operating and controlling monitors, still cameras and video cameras; computer software for operating and controlling radar systems; computer software for use in vehicle status and monitoring systems; computer software for system situational awareness and representation in a communication and data link control system; telecommunications channel amplifiers; frequency filters for use in telecommunications; computer hardware for electronic key information processing, namely, the processing of information related to electronic encryption and other security technologies; radio frequency limiters; harmonic generators; satellite transponders; transponder controllers; secure communications systems consisting of digital processors, modulators, antennas, transmitters, receivers, and encryption hardware and software for secure algorithm processing devices for use with airborne, satellite, ground and sea-based information collection, transmission and analysis; communications systems consisting of communication devices for high data rate microwave communications links and computer hardware; communications systems consisting of telephonic and high data rate microwave radio components, digital processors, computer hardware, software containing algorithms for use in processing secure communications and software for the secure broadcast and/or receipt of communications and information or data; on-board satellite equipment providing subsystem capabilities, namely, electronic modules and circuit cards for digital solid-state recording of electronic data, video signal processing, communications signal processing and translation; microwave devices, equipment, products and components, namely, frequency transmitters, frequency converters, frequency synthesizers, frequency modulators, frequency filters, frequency power amplifiers, passive components, mechanical switches, wireless frequency monitors; radio navigation equipment comprised of recording transmission and receiving microwave equipment, namely, microprocessors, electronic displays, digital storage devices, radio transmitters and receivers, providing navigation, vehicle command and control, vehicle indications and warning, data and telemetry recording

capabilities; surveillance equipment and devices, namely, ISR (Intelligence Surveillance Reconnaissance) subsystems which use computer hardware and software to provide a sampling of the electromagnetic spectrum in prescribed frequencies to extract information content available for analysis, for use in military and civilian aircraft; electronic sensors that provide in real time the ability to collect electronic data and information; electronic computer hardware and software that allow for the collection, monitoring, analysis, storage, and presentation of medical images; hardware that allows for the interfacing of analog or digital signals into the existing PSTN (Public Switch Telephone Network) or global Information network and create the ability to take those same signals into a mobile communications system; telephonic computer hardware that allows for creation of a wireless last mile, namely, wireless radio connections between a central source and destination with the telephony and data system having fixed site or mobile operational capability; communications terminals which consist of computer hardware that provides for the creation and connection of multimedia communication signals including analog, voice, data, and video and allow signals to be connected to other communications terminals or other network nodes; Radio and television transmission systems comprising transmitters, monitors, signal mixers, audio and video signal encoders and decoders and editing equipment, namely, signal processors; transmitters and receivers for satellite communications; computer operated network systems comprising computer hardware and software for transmitting data between computers connected in a network and for managing the computers and the transmission of the data on said network; computer information systems comprising computers and software for processing data, word processing and displaying of data; avionics systems comprising digital maps, fiber-optic and wire data busses, memory devices, instrumentation for displaying, storing, processing, and retrieving weather, tactical, strategic and secure data, aircraft cockpit controls and data displays; phased array antennas; global positioning equipment comprising data processors and displays; Computer software and computer hardware for use in air traffic control communications systems for displaying, transporting,

transmitting voice, data and images, controlling, switching, routing, and receiving air traffic information; computers and computer software for converting images into data, and for analyzing, displaying and printing the data in the field of two and three-dimensional image extraction, manipulation, display, and geographic registration; secure computer operated systems consisting of computer hardware and computer software, and encrypted databases, all used for ensuring and controlling the security and access of a computer network and the information contained therein namely, tracking air traffic and transmitting encrypted messages to pilots data base management, file transfer, and for connecting computers and data bases in a network and for air traffic circulation management; airline management system comprising computers and software for database management and for exchanging aircraft and aircraft operations information; Television signal analysis processors, namely, electronic display panels for displaying signals, signal evaluation terminals primarily comprised of customized signal analysis hardware with integrated displays and software analysis components running on industry standard computers and monitors for evaluating the quality of analog and digital signals, media analysis servers for verifying the quality of digital media content, signal interface modules, handheld signal analyzers, optical signal analyzers, circuit testers for monitoring broadcast signals, and video monitoring tools, namely, software based video monitoring tools, namely, computer software for monitoring and logging the loudness of media content; timing reference generators, namely, time reference signal generators for broadcast system timing signal and test signal generation; hardware and computer software for television production, post production and broadcast, namely, demodulators, digital signage, namely, dynamic electronic displays and networking computer servers and computer software for managing and controlling dynamic electronic displays, distribution amplifiers, audio/video editors, namely, computer workstations equipped with computer software for editing audio and video program material, computer hardware and computer software sold as a unit for generating characters and graphics, computer software for generating visual effects, computer hardware and computer software sold as a unit for generating and

inserting on-air branding, emergency alert modules, namely, computerized electronic modules and associated computer software for implementing the broadcasting of public emergency alert messages, fiber optic signal transports, electronic master control switchers for audio and video signals, audio and video signal compressors and audio and video signal decompressors, multiplexers and de-multiplexers, multiviewers, broadcast computer network monitoring and control application software, electronic network control panels, audio, video and data receivers and decoders, electronic routing switchers for audio and video signals, video servers, NTP (Network Time Protocol) timing modules comprised primarily of computer hardware and computer software for carrying out NTP timing, signal timing clocks, signal transport modules, audio/video sync and timing managers primarily comprised of high precision clock generation circuitry for synchronization of audio with video, computer software for creating and displaying timecode markers, up/down signal frequency converters, signal format cross converters, all for use in the media and entertainment industry; broadcast operations software for advertising, sales, traffic and billing, automation, digital asset management, programming and rights management, namely, computer software for managing, monitoring and automating the buying, selling, scheduling, research, inventory management, production tracking and accounting processes for advertising, and general content for the media and entertainment industry; computer software for controlling and monitoring switching systems for television and radio signals; computer software for managing, monitoring and automating the creation, movement, location, archiving, retrieval and use of digital media assets; business process management and messaging software, for managing and controlling human and automated workflows and multisystem communications for use in the media and entertainment industry; network management centers primarily comprised of mobile and portable radios and also containing electrical base station controllers, electrical communication controllers and electrical network controllers; mobile and nonmobile two-way communications radios; portable two-way communications radios; radio network gateways comprising computers, computer switches and associated computer software for voice and

data communications; Internet protocol-based networks comprising computer hardware and computer software for interoperable communications; telecommunications equipment, namely, trunked radio communication systems for public service and industrial applications comprised of portable communications radios, electrical base station controllers, electrical communication controllers and circuit switches; control equipment for two-way mobile and two-way fixed radios, namely, base station equipment for fixed and mobile networking and communications, cell sites primarily comprised of electronic hardware, computer software, antennae, and base stations, control stations primarily comprised of, radio hardware and associated computer software, desktop control stations primarily comprised of radios, radio hardware and associated computer software, dispatch and console hardware, namely, dispatch consoles and software for carrying out emergency and nonemergency communications and carrying out command and control of public safety personnel and assets, site management computer hardware and software for managing communications radios and base stations, and network monitoring computer hardware and software for monitoring communications radios and base stations; radio data communications systems primarily comprised of mobile communications radios and also containing non-mobile communications radios, portable communications radios, base station controllers, communication controllers, and network controllers; communications radio network gateways comprised primarily of computers, computer switches and associated computer software for providing a gateway between networks; space deployable microwave signal and ultra-high frequency (UHF) signal reflectors apparatus for satellite communications; computers and computer software for processing geographic elevation data representing the elevations of locations on the earth to generate, display and print three-dimensional geographically registered representations of those locations; computers and computer software for managing, cataloging and retrieving geospatial imagery, imagery derived products and other intelligence products, through the synchronization of data catalogs across disparate storage locations; computers and computer software for managing, processing, exploiting and disseminating motion imagery intelligence; computers and

computer software for managing, processing, exploiting and disseminating flight planning presentations to general aviation pilots and air traffic controllers; networking communications radios; shipboard communication terminals primarily comprised of antennae, positioners, modems, up converters, down converters, amplifiers and user interfaces; ground communication terminals primarily comprised of antennae, positioners, modems, up converters, down converters, amplifiers and user interfaces; computer information systems comprised mainly of computers and computer software for processing data, word processing and displaying of data in the fields of census information systems, healthcare information systems, intelligent electrical power distribution systems, weather reporting and forecasting systems and environmental reporting and forecasting systems; avionics equipment, namely, video signal compressor and decompressors, electrical power supplies, mounting racks specially adapted for mounting and interconnecting electronic data processing apparatus, airborne signal processors for network interoperability and for targeting of weapons, secure network switches, computer software in the nature of networking protocols for facilitating the exchange of electronic messages and data, radio frequency (RF) data links for weapons, UHF (Ultra High Frequency) /VHF (Very high frequency) wireless data links, beam former electronics primarily consisting of power amplifiers and also containing low noise amplifiers, phase shifters, time delay units, data transmit and receive switches, frequency up-converters, frequency down-converters, array controllers and array power supplies and control equipment, antenna control units, attitude and heading reference units (measuring apparatus), data transmit/receive control units, antenna position controllers and frequency band select switches; air traffic control communications systems consisting of computer hardware and computer software for displaying, transmitting, controlling, switching, routing, and receiving weather data; two-way radios for communication of voice, data, images and video for use by military and other government agencies; two-way communications radios, namely, voice and data communications radios operable across multiple frequency bands for enabling public safety officials and first responders such as law enforcement agencies, paramedics, firefighters and military

personnel to communicate interoperably with one another even though their respective pre-existing communications infrastructures might otherwise be mutually incompatible; trunked radio communication systems for public service and industrial applications, namely, cellular base stations and mobile radio base stations for two-way mobile and fixed communications radios; loudspeakers for mobile two-way communications radios; loudspeakers for non-mobile two-way communications radios; battery chargers for two-way communications radios; Internet protocol-based communication networks comprised primarily of computer hardware and computer software for implementing interoperable communications; cryptographic modules namely, electronic modules with embedded firmware for data encryption; encryption engines; radio frequency wireless communications adapters, namely, network interface cards; software for operating radio frequency wireless network interface cards; communications software for connecting radio frequency wireless network interface cards to a local area communications network; radio network gateways comprised primarily of computers, computer switches and computer software in the field of voice and data communications; computer software for use in the field of air traffic control, namely, for the supervision, maintenance, administration, troubleshooting and configuration of computer software for monitoring the performance of air traffic control systems, mapping definition, uploading software updates and releases, access control, user definition, recovery and diagnostic reporting.

Class 35:

Business management advice and consultation in the field of telecommunications logistics; Business consultation and assistance in the operation of telecommunication systems and networks for others; Business consultation and assistance in the field of the operation and administration of telecommunication networks and communication links for others.

Class 37:

Technical consultation in the field of building construction of fixed site earth-based facilities; Technical consultation and assistance in the field of construction, repair and maintenance of submarines and ships; Technical consultation concerning the installation, repair and maintenance of mobile and fixed site earth-based facilities, satellites and related computer information

systems; IT and communication infrastructure upgrade services, namely, updating of computer hardware for IT and communication systems; Telecommunications system maintenance services, namely, maintenance of radio, television and digital communications equipment for others.

Class 38:

Technical consultation in the field of satellite communications and communications by related communication information systems, namely, communications via satellite transmission, microwave products and telemetry and instrumentation; Consultation and technical assistance in the fields of secure communications and telemetry.

Class 42:

Technical consultation and assistance in the field of avionics; Information technology consultation in the fields of submarines and ships, mobile and fixed site earth-based facilities, satellites and related information systems, namely, information security, communications, microwave products and telemetry and instrumentation; Designing computer systems for software integration, maintenance and user-information services, operation support systems for software integration, maintenance and planning support services and provisioning, and provisioning control support services for satellite control networks, real-time defense communications systems, and real time defense intelligence collection systems; Designing computer systems for engineering support for satellite launches, deployed communication systems and deployed intelligence collection systems; Consultation and technical assistance in the fields of customization of computer hardware and software products; Consultation and assistance with computer program management services, computer site management services, and deployment and management of wireless communications networks of others and communications link management services; Technical support services, namely, troubleshooting in the nature of diagnosing and testing computer hardware and software problems; computer services relating to providing an interactive web site that enables users to enter, access, monitor and generate designed strategic and tactical signal intelligence information reports; IT and communication infrastructure migration services; technical design and deployment of telecommunication networks and computer

networks for others; technical support services for migration of datacenter, server and database applications; data migration services; IT software applications management, namely, management of software applications and maintenance of computer software relating to computer security and prevention of computer risks; computer hardware and software consulting services; technical consulting in the field of telecommunications technology; technical consulting in the field of information technology (IT); updating and maintenance of computer software, information technology (IT) integration services; technical support, namely, monitoring of computer networks by remote access; remote computer network technical monitoring and software maintenance services; remote management of the information technology (IT) systems of others; planning, design and management of information technology (IT) systems; computer hardware and software design; computer network design for others; information assurance services (computer security services) for designing, deploying and operating secure communications systems and information networks, for safeguarding the confidentiality, integrity and availability of information systems and critical business data of others; design of radio, television and digital communications equipment for others; design and integration of telephone systems, communications systems, and information display systems; Consultation and technical assistance in the fields of information security and intelligence security services for secure and non-secure voice, data, and video communications, user authorization, recognition and message encryption.

Specification: Class 9:  
Data processing apparatus; computer memory devices; computers; memory cards for video game machines; computer programmes [programs], recorded; computer operating programs, recorded; computer programs [downloadable software]; computer game software; computer software applications, downloadable; electronic cards and stored value cards; software applications (apps) for mobile or wireless devices and computer devices; electronic publications, downloadable; computer software and instruction manual therefor in electronic format; computer software relating to financial and insurance services; sound and video recording and reproducing apparatus and instruments; magnetic disks, tapes and cassettes all relating to all insurance and finance; video tapes, audio tapes, compact disks (read only); smart cards [integrated circuit cards]; authentication software for controlling access to and communications with computers and computer networks; pre-recorded audio tapes, CD-ROMS, discs and video tapes featuring information in the fields of hobbies, collectibles, auctions and products assessed

from global information networks and network systems, parts and fittings for all the aforesaid goods; recorded or downloadable computer software platforms, namely, software platforms for businesses to register, compile, edit, store, manage, retrieve and share business information, to create, post, publish, edit and share content and comments about businesses operations, to send and receive electronic messages and conduct audio and video teleconferences; computer network monitoring and control systems; communications and networking software; computer software and telecommunication apparatus to enable connection to databases and the global communication network; computer software and computer programs for digital certification; computer software and programs for mobile application acceleration; computer software and programs for collection and management of big data; application, database, web and file servers; computer software for hosting of digital content on the internet; computer software for network and information technology security; content distribution network (CDN) systems; computer hardware and software for use in data transformation, indexing, conversion, storage, retrieval, distribution and in record management; apparatus and instruments for monitoring of telecommunication network and data communication networks; computer software for use in resource planning; internet and web-based application software; apparatus and equipment for recording, processing, receiving, reproducing, transmitting, modifying, compressing, decompressing, broadcasting, merging and/or enhancing sound, video images, graphics and data; computer firmware; computer hardware and computer software for a wireless technology to provide communication between multiple computers and between computers and local and global computer networks; digital communication systems; network interface devices; network communication apparatus; voice messaging systems; on-line and off-line electronic payment apparatus; computer software and application software for use with mobile phones for providing travel information, including information about flights, hotels, travel attractions, insurance, to users; software for the uploading, posting, displaying, tagging, blogging, sharing or providing of electronic media or information over communications networks or the internet;

personal information management software;  
portable telecommunication instant messaging  
devices; game software and entertainment  
software for use with mobile devices;  
downloadable publications and software  
supplied on-line from a mobile  
telecommunication network or the internet;  
computer hardware and software for  
facilitating and processing electronic payment  
and for transferring funds to and from others;  
billing application software specifically  
designed to facilitate automated payment of  
multiple bills; bank credit, debit, cash,  
cheque and identification cards, all being  
encoded or magnetic; encoded cards used in  
relation to the electronic transfer of funds  
and other financial transactions; cash payment  
service computer terminals; sound recording  
strips; PDA (personal digital assistant);  
blockchain-based computer software and  
application software [downloadable]; cloud  
computing software; encryption software for  
use in the field of virtual currency and  
cryptocurrency; security tokens [encryption  
devices]; counterfeit bank notes and coin  
detecting machines; apparatus for processing  
card transactions and data relating thereof  
and for payment processing; card readers and  
authentication apparatus for encoded or  
magnetic data carriers; apparatus and  
instruments for conducting, switching,  
transforming, accumulating, regulating or  
controlling electricity; video tapes, audio  
tapes, compact discs, DVDs and other digital  
recording media; mechanisms for coin-operated  
apparatus; cash dispensers cards; cash  
dispensers and parts and fittings therefor,  
talking machines, cash registers, automatic  
teller machines; computer hardware and  
software, computer programmes for use in cash  
dispensers and all relating to banking;  
computer software to enable sharing of  
multimedia content and comments among users  
about businesses operations, to send and  
receive electronic messages and conduct audio  
and video teleconferences; scientific,  
research, navigation, surveying, photographic,  
cinematographic, audiovisual, optical,  
weighing, measuring, signalling, detecting,  
testing, inspecting, life-saving and teaching  
apparatus and instruments; apparatus and  
instruments for conducting, switching,  
transforming, accumulating, regulating or  
controlling the distribution or use of  
electricity; apparatus and instruments for  
recording, transmitting, reproducing or

processing sound, images or data; recorded and downloadable media, computer software, blank digital or analogue recording and storage media; mechanisms for coin-operated apparatus; cash registers, calculating devices; computers and computer peripheral devices; diving suits, divers' masks, ear plugs for divers, nose clips for divers and swimmers, gloves for divers, breathing apparatus for underwater swimming; fire-extinguishing apparatus; all included in class 9.

Class 35:
